A Foodie Afloat is the story of a cook’s

journey through France on a barge. Di Murrell takes us on a gentle journey across France; her main preoccupation being to make sure that tasty food arrives on the table each day. As she voyages across the country she shows, through her recipes, how the cuisine changes with the landscape. Whether bought in the market, dug from a lock-keeper's garden or even foraged along the towpath, the food she finds and cooks is always seasonal and local to the region. This book is more than just a collection of recipes though. It is the result of a life spent on the waterways of Europe. She talks to lock-keepers, skippers of working barges and those, who, like her, find their sustenance on or near the canal. Di's enjoyment of good champagne, foie gras and truffles leads

to an eclectic mix of simplicity and sophistication in her cooking. The boating life, though rarely sensational, is full of small events and chance encounters. This is an enticing story of slow boats and slow food. Di makes it come alive, and her combination of travel and recipe book tempts us to give up everything and join her on the waterways of Northern and Central France. A Foodie Afloat is the 2020 UK winner of the World Gourmand Cookbook Awards in the Food Tourism category. *1D Poster Collection* John Wiley & Sons A revealing look at work environments that lead to greater loyalty and an increase in productivity Exploring the premise that the best way to attract and retain people, and their knowledge, will come from designing environments that

When a mother feels the same way, she dumps her own children and walks away. Readers will find out: - Why God created the ideal family. - The

importance of family values. - Why people fail in parenting. - The role modern technology has played.

In *The Rule of Law in the Real World*, Paul Gowder defends a new conception

of the rule of law as the coordinated control of power and demonstrates that the rule of law, thus understood, creates and preserves social equality in a state. In a highly engaging, interdisciplinary text that moves seamlessly from theory to reality, using examples ranging from Ancient Greece through the present, Gowder sheds light on how societies have achieved the rule of law, how they have sustained it in the face of political upheaval, and how it may be measured and developed in the future. *The Rule of Law in the Real World* is an essential work for scholars, students, policymakers, and anyone else who believes the rule of law is critical to the proper functioning of society.

Marcia Willett's *The Garden House* is a charming and heartwarming novel about family, yearning, and long-buried secrets ... Fresh out of university and right on the precipice of adulthood, El is trying her best to figure out what it is she really wants from life. This is complicated by the fact that she is also dealing with the loss of her father, Martin. After his sudden death, El inherits and moves into his home just outside Tavistock, in the Devon countryside. Her stepbrother and sort-of friend, Will, comes to help her through her grief and to go through her father's belongings. As El spends time in her father's home, she uncovers more about his life, and the secrets he had been keeping from her and her family. This includes mysterious messages on his phone from someone El suspects

may have been more than just a friendly acquaintance. Julia is also mourning Martin, but for many reasons, they thought best to keep their relationship a secret. So she must now grieve entirely on her own. All she has to remember of her love are the text messages they sent to each other in their secret code, and the memories of their time spent at *The Garden House*: a beautiful community garden and teashop nearby. It is where they met, fell in love, and where their secret affair will inevitably be uncovered one day. As El and Will begin to decipher the messages on Martin's phone, and piece together her father's long-buried secrets, they are brought closer and closer to each other, to Julia, and to a truth that is difficult for all to face.

Author David Thomson and Jim Bourassa have founded the Quantum AetherDynamics Institute, an organization dedicated to understanding the Aether. For the first time in human history, the Aether is fully quantified based upon empirical data. Through a very simple observation noted nearly 200 years ago by Charles Coulomb, the electromagnetic units have been corrected of an error that has led physics

astray for so long. Now, electrodynamics expresses in simple dimensional equations, the neurosciences unite with quantum and classical physics, and we can precisely model the geometry of subatomic particles.
