Your complete step-by-step guide to starting a profitable senior concierge service in just 30 days. With over 50 million seniors over 65 in the U.S. alone, the demand for senior concierge services is skyrocketing. As seniors age, they need more help with many of the daily activities younger folks take for granted, like running errands, pet care, household management and dozens of other tasks. If you have a "can-do" attitude, common sense and compassion for elders, you will do well in this business. A senior concierge services offers you: A flexible schedule. Be your own boss. A recession-proof business. Start with just a few hundred dollars. In this book, you'll discover: Secrets of six-figure concierges. How to set your hourly rates. 8 sources for free local referrals. The 22 most in-demand services to offer. The essential form you must have (included in chapter 5.)

There have always been homeless people in the United States, but their plight has only recently stirred widespread public reaction and concern. Part of this new recognition stems from the problem's prevalence: the number of homeless individuals, while hard to pin down exactly, is rising. In light of this, Congress asked the Institute of Medicine to find out whether existing health care programs were ignoring the homeless or delivering care to them inefficiently. This book is the report prepared by a committee of experts who examined these problems through visits to city slums and impoverished rural areas, and through an analysis of papers written by leading scholars in the field.

Critical Care Emergency Medicine Jones & Bartlett Learning

About Emergency Care and Transportation of the Sick and Injured, Twelfth Edition: Since 1971, Emergency Care and Transportation of the Sick and Injured has advanced how EMS education is delivered to help train exceptional EMS professionals around the globe. Fifty years later, the Twelfth Edition is now the most advanced EMT teaching and learning system ever developed. Current State-of-the-Art Medical Content Comprehensive coverage of the National EMS Education Standards and the 2020 American Heart Association (AHA) Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care (ECC). Evidence-based medical concepts are incorporated to ensure that students and instructors have accurate, insightful interpretation of medical science as it applies to prehospital medicine today. Updated coverage of PPE and CDC guidelines for safe patient care during COVID-19 pandemic. A Focus on Career Readiness and Employability Greater emphasis on soft skill development, including empathy, teamwork, interpersonal skills, and problem solving, and how critical these skills are for better patient outcomes. Enhanced content on provider mental health, wellness, and safety. Evolving patient case studies that deliver clinical education and help prepare students to care for patients in the field. The cases offer increased focus on EMS provider leadership and critical thinking skills throughout the text. A new "Street Smarts" feature that helps bridge the gap between the classroom and field environment by addressing nontechnical skills that improve patient and co-worker interactions. A Foundation for Success The textbook design and layout have been revised to improve visualization of key content and overall readability.

Comprehensive anatomy, physiology, pathophysiology, and medical terminology content is delivered in early chapters, and subsequently reinforced in related chapters throughout the textbook. Valuable student resources, including audiobook, interactive lectures, test prep, soft-skill simulations, and videos cater to a variety of learning styles and needs. Educators are supported by a broad range of instructional and assessment resources to fully enable traditional, hybrid, and flipped course delivery.

Start Your Own Senior Transportation Business McGraw Hill Professional

When a non-emergency medical transportation vehicle came up for sale in 2005, Arnel Possi bought it for his car dealership. But something strange happened: Buyers were willing to pay much more than what Possi spent on the vehicle. Suddenly, he found himself interested in the non-emergency medical transportation business. With some research, he discovered that non-emergency medical transportation vehicles can transport patients with the same ailments, physical limitations or disabilities as emergency vehicles—the only difference is that when NEMT vehicles transport someone, there is no perceived emergency at the time of transport. In this guidebook to building your own NEMT business, you'll learn where to find vehicles, how to find Medicaid clients, and how to run the business before spending any money. You'll also find out how to anticipate what to expect on a typical business day; deal with drivers, clients, and the businesses you contract with, and get acquainted with government agency staff. Unravel the mysteries of the NEMT business, and reap the financial rewards that come along with providing a valuable service for your community.

Homelessness, Health, and Human Needs Jones & Bartlett Publishers

Based on careful analysis of burden of disease and the costs of interventions, this second edition of 'Disease Control Priorities in Developing Countries, 2nd edition' highlights achievable priorities; measures progress toward providing efficient, equitable care; promotes cost-effective interventions to targeted populations; and encourages integrated efforts to optimize health. Nearly 500 experts - scientists, epidemiologists, health economists, academicians, and public health practitioners - from around the world contributed to the data sources and methodologies, and identified challenges and priorities, resulting in this integrated, comprehensive reference volume on the state of health in developing countries.

Home Healthcare Business Startup on a Budget Do you have what it takes to start, run, and grow an in-home care business? When I was faced with the reality of caring for my mother when she became ill while also caring for my elderly grandma, I realized that I needed more education (and help) for my situation. While I loved them both dearly, my love itself wasn't enough to properly care for them. I decided to gain that education and eventually became a CNA. When my mother and then grandmother finally passed away, I continued in this field of providing at-home care. Caring for a family member at home while they are recovering, terminally ill, or in the final stages of life can be stressful. The burden can be eased when you're able to bring in qualified help to assist you. Home healthcare encompasses a large range of skilled nursing and unskilled home care services that can be accomplished in a client's home after an injury or illness. It can also apply to services that are for an older or disabled person who might require assistance with daily activities such as cooking, bathing, running errands, shopping, and more. Do you have a caring, compassionate heart? Do you want to start a business where you know you will be assisting people when they need it most? Do you want to be your own boss and run an agency of skilled professionals who you trust to do the hands-on work? In this Home Healthcare Business Startup on a Budget book, I will outline the different levels of care that your agency might provide according to the need you see in your community. This could range from simple companion care services with light housekeeping and friendly faces, to more skilled nursing and palliative care. The fact is that you need not be personally professionally skilled to be an agency director. You can have a heart for starting the business, do the back-end work, and hire trained professionals to work for you. I'll show you how! This book will discuss all aspects of starting an in-home care services company, with variations on skilled and unskilled service providers. I guide you through starting this business from scratch, step-by-step. Once we have the business established, I will talk you through how to grow and run your operation from marketing, advertising, and dealing with employees. Be sure to check out the table of contents to see exactly what my book will provide to you in terms of information. I would strongly encourage you to get your hands on any and everything you can read about starting a business like this before you take the leap. We will Discuss Topics such as: What home healthcare means If you're cut out for this line of work What different levels of care encompass The different types of services your new agency might provide What a day in the life of an in-home care provider looks like 8 steps for building your business How to gain clients through advertising and partnerships How to craft a solid business plan What licensing you'll have to obtain How to get paid How to hire staff and manage employees in your day-to-day operations All this and much much more is contained in this book. I also describe to you some True-to-Life, Real-World Illustrations of what I'm teaching you in action with personal stories from those who have experiences with this field. I hope that reading about the concepts in action will give you a better understanding.

Disease Control Priorities in Developing Countries National Academies Press

In the United States, chronic diseases currently account for 70 percent of all deaths, and close to 48 million Americans report a disability related to a chronic condition. Today, about one in four Americans have multiple diseases and the prevalence and burden of chronic disease in the elderly and racial/ethnic minorities are notably disproportionate. Chronic disease has now emerged as a major public health problem and it threatens not only population health, but our social and economic welfare. Living Well with Chronic Disease identifies the population-based public health actions that can help reduce disability and improve functioning and quality of life among individuals who are at risk of developing a chronic disease and those with one or more diseases. The book recommends that all major federally funded programmatic and research initiatives in health include an evaluation on health-related quality of life and functional status. Also, the book recommends increasing support for implementation research on how to disseminate effective longterm lifestyle interventions in community-based settings that improve living well with chronic disease. Living Well with Chronic Disease uses three frameworks and considers diseases such as heart disease and stroke, diabetes, depression, and respiratory problems. The book's

recommendations will inform policy makers concerned with health reform in public- and private-sectors and also managers of communitybased and public-health intervention programs, private and public research funders, and patients living with one or more chronic conditions.

Welcome to the gold standard in critical care transport training. Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), and endorsed by the University of Maryland, Baltimore County (UMBC) and the International Association of Flight and Critical Care Providers (IAFCCP), *Critical Care Transport, Second Edition*, offers cutting-edge content relevant to any health care provider training in critical care transport. Authored by leading critical care professionals from across the country, *Critical Care Transport, Second Edition*, contains state-of-the-art information on ground and flight transport that aligns with the latest evidence-based medicine and practices. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, tra

Caring for Our Parents Jones & Bartlett Learning

Catastrophic disasters occurring in 2011 in the United States and worldwide-from the tornado in Joplin, Missouri, to the earthquake and tsunami in Japan, to the earthquake in New Zealand-have demonstrated that even prepared communities can be overwhelmed. In 2009, at the height of the influenza A (H1N1) pandemic, the Assistant Secretary for Preparedness and Response at the Department of Health and Human Services, along with the Department of Veterans Affairs and the National Highway Traffic Safety Administration, asked the Institute of Medicine (IOM) to convene a committee of experts to develop national guidance for use by state and local public health officials and health-sector agencies and institutions in establishing and implementing standards of care that should apply in disaster situations-both naturally occurring and man-made-under conditions of scarce resources. Building on the work of phase one (which is described in IOM's 2009 letter report, *Guidance for Establishing Crisis Standards of Care for Use in Disaster Situations*), the committee developed detailed templates enumerating the functions and tasks of the key stakeholder groups involved in crisis standards of care (CSC) planning, implementation, and public engagement-state and local governments, emergency medical services (EMS), hospitals and acute care facilities, and out-of-hospital and alternate care systems. *Crisis Standards of Care* provides a framework for a systems approach to the development and implementation of CSC plans, and addresses the legal issues and the ethical, palliative care, and mental

health issues that agencies and organizations at each level of a disaster response should address. Please note: this report is not intended to be a detailed guide to emergency preparedness or disaster response. What is described in this report is an extrapolation of existing incident management practices and principles. *Crisis Standards of Care* is a seven-volume set: Volume 1 provides an overview; Volume 2 pertains to state and local governments; Volume 3 pertains to emergency medical services; Volume 4 pertains to hospitals and acute care facilities; Volume 5 pertains to out-of-hospital care and alternate care systems; Volume 6 contains a public engagement toolkit; and Volume 7 contains appendixes with additional resources.
