In God we trust, the rest

we monitor . . . A former chief of India's external intelligence agency, the Research and Analysis Wing, deconstructs the shadowy world of spies, from the Cold War era to the age of global jihad, from surveillance states to psy-war and cyberwarfare, from gathering information to turning it into credible intelligence. Vikram Sood provides a panoramic view of the rarely understood profession of spying to serve a country's strategic and security interests. As a country's stature and reach grow, so do its intelligence needs. This is especially true for one like India that has ambitions of being a global player even as it remains embattled in its own neighbourhood. The Unending Game tackles these questions while providing a national and international perspective on gathering external intelligence, its relevance in securing and advancing national interests, and why intelligence is the first playground in the game of nations.

Multiple sclerosis is the commonest chronic nerve disorder that occurs in young adults. It is characterised by progressive disability. The features of the disease include weakness, sensory disturbance, pain, and impairment of balance. Paul's book tells the story of the impact of the diagnosis of Multiple Sclerosis on a young fit man. It chronicles his determination to realise his potential in life by utilising his personal strengths and drawing on the ethos of 'smiling through adversity' that was instilled during his training as a Royal Marines Commando. I hope that his book will serve as an inspiration to all, but in particular to those who are challenged by multiple sclerosis or other chronic disease in early adult life. Sir Ranulph Fiennes

A Teach-Yourself Guide to Italic Handwriting The Italic Way to Beautiful Handwriting is your key to mastering the Italic hand in just minutes a day. Originally developed in the early Renaissance as a "speedwriting" technique by Papal scribes who wanted to combine beauty and legibility with speed, Italic handwriting continues to appear today on diplomas, wedding invitations, and other special announcements. Now through modern teaching methods developed by Fred Eager, this handwriting can be

yours. The foundation of the Eager system is a dual approach: you learn calligraphic and cursive simultaneously--one handsome, the other functional--to synthesize a perfect balance. Eager's techniques have been widely used throughout the United States and inspired the resurgence of Italic classes and clubs from coast to coast. In this step-by-step, trace-and-copy manual, renowned Italic instructor Fred Eager shows how to develop the ideal handwriting--legible and beautiful, yet characteristically your own.

New Managers Abrams

Opposites attracting, billionaires getting kidnapped, a Papillon who's smarter than you are, and near-death at a dog show....Jericho Jones is giving up on social life. What social life? Six-foot-five and packed with muscles he barely earned, Jericho looks like an alpha top, when he's actually a gentle bottom who teaches first grade and lives with his hypochondriac mother. When Jericho's friends,

Finn and Em, suggest he accompany Finn to a dog show as the handler for their Papillon, Batshit, he decides, while he might be the world's least likely Papillon prancer, he'd be grateful for a new experience and a few days away from Mama. Jericho's prepared to take dog handling seriously, but he's not prepared for the pure lust he feels for wealthy dog owner, Brees Apollonia, a guy totally out of Jericho's league. But Brees's family issues make Jericho's look tame - his father wants to marry him to the daughter of a prospective business partner. When Brees starts being followed by unknown guys, he thinks his father's trying to scare him and uses it as an excuse to be "protected" by big, hunky Jericho. But pretend gets way out of control, and suddenly the only thing between Brees and possible death is a smart dog with big ears, three intrepid women, and gentle wimp, Jericho Jones.

Color Your Own Happy Martingale

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the

evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

A designer's deep dive into seven science fiction films, filled with "gloriously esoteric nerdery [and] observations as witty as they are keen" (Wired). In *Typeset in the Future*, blogger and designer

Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics, discovering how they create compelling visions of the future through typography and design. The book delves deep into 2001: A Space Odyssey, Star Trek: The Motion Picture, Alien, Blade Runner, Total Recall, WALL-E, and Moon, studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills, concept art, type specimens, and ephemera, plus original interviews with Mike Okuda (Star Trek), Paul Verhoeven (Total Recall), and Ralph Eggleston and Craig Foster (Pixar). Typeset in the Future is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds.
