*A Gluten Free Christmas* Zondervan

As kitty gift books go, this is "the best, funniest, most inspiring" of them all, according to the Village Voice and tens of thousands of dedicated readers. Now out on the prowl with a new cover that's the cat's meow, it's ready to inspire a second wave of cats and their owners to relax into a catnap. Author and illustrator Alice M. Brock (of Arlo Guthrie's "Alice's Restaurant" fame) counsels cat owners to approach the cat quietly with palms "up and open." Beginning at the rear, the masseur works all the way around the cat using a "vigorous kneading motion," then rubs, presses, twists, and tugs the cat into a state of complete relaxation. We are assured that a well-massaged cat may remain in a state of prolonged calm "for some time." Brock's instructions are accompanied by charming illustrations sure to inspire a mischievous chuckle in both friends and foes of felines everywhere.

*Wacky Waving Inflatable Tube Guy* Chronicle Books

The very first of its kind, this miniature Wacky Waving Inflatable Tube Guy is the perfect desktop companion, tiny marketing tool, or hilarious gift! Finally, the joyous dancing tube man -- who's been featured everywhere from Ricky Martin's stage to Broad City -- is available in a tiny, desk-friendly size. This box includes: An 18-inch waving tube man with fan in base to make him dance, wiggle, and shake just like the real thing (batteries not included) A 32-page mini book exploring the larger than life (and utterly surprising!) origins of everyone's favorite flailing arm man PLEASE NOTE: This product can be powered by a 9-volt battery or by a specific AC adapter. (Battery nor AC adapter included with purchase.) Please read and follow the instructions included in the box to ensure optimal performance. If using a battery: A rechargeable Ni-MH battery is recommended for best performance and is a more cost-effective alternative to a common Alkaline (single-use) battery. If using an Alkaline battery, it must be NEW and preferably a PREMIUM brand. DO NOT use a Carbon-Zinc battery (often labeled "Heavy-Duty"). This type of battery cannot produce enough power to operate the motor. To get the most life out of the battery, use in intervals no greater than 5 to 10 minutes. Operating in this manner will yield approximately 45 minutes of use. If your tube guy begins to get stuck in a downward position, it is time to replace the battery or recharge if using a rechargeable battery. If using an AC adapter, it must follow the below specifications: Input: AC 100-240V (50-60 Hz) Output: DC 9V (1A or 2A)
