"An acclaimed historian explodes the myth about the 'special relationship' between Americans and their guns, revealing that savvy 19th century businessmen--not gun lovers--created American gun culture"--

Citadel of the Stars By: Aaron Simons In the spring of 1994, Jim and Tina are nonconformists with the strongest relationship imaginable. They turn eighteen, are about to graduate, go onto college, and have their lives ahead of them. But the next day, Tina goes missing... Five years later, Jim's life has almost completely fallen apart. Tina's parents have moved, he lost his family in a car accident, and he feels his life's about to lose everything. He's with the dog Tina gave him on their birthday and her cat when he decides to give up hope... Then Jim, the dog, and the cat are brought to the magical world where Tina has been lost. She tells him that she had been abducted by a

highly advanced civilization called Pralmist in a parallel dimension. But something went wrong, and she ended up on another world called Maylan, unique in that its reality is everyone has powers that humans only read about in comic books... Now, the Pralmistians are able to transport their armies to other dimensions and have invaded looking for Tina and to bring Maylan under their control. But there is a prophecy that when a woman from an unknown world appears, her abductors will invade. They must bring the Chosen One, the woman's one true love, to Maylan... Facing overwhelming odds, Jim, Tina, and the Maylan Warriors must go on a journey to find the four Sacreida Stones to form the Sacreida Sword, the one weapon on Maylan that can destroy the Pralmistians. Can a peaceful agrarian warrior society lead by a man with no military training bring an entire world together and lead them against the Pralmistians, whose army has completely conquered their entire universe?

**Winchester Slide Action Rifles** Gun Digest Books

From Buffalo Bill to Wild Bill and from Chief Joseph to Geronimo, the most famous guns in the West and the history behind them More than a few of the actual guns once in the hands of the heroes and villains of America's Old West still exist, housed in a dozen museums across the country—from

the Model 1866 .44-40 that Chief Joseph famously surrendered to General Miles to Wild Bill Hickok's Colt Model 1851 revolvers; from Buffalo Bill's .50 caliber breechloading needlegun nicknamed "Lucrezia Borgia" to John Wesley Hardin's 1860 model .44 SA revolvers. Famous Firearms of the Old West follows the life stories of a dozen actual pistols, rifles, and shotguns instrumental in shaping America's history—using them as entrées into the lives of the shooters themselves. This is a vivid portrait of famous Western characters, paired with the guns they used to make themselves famous or, as the case may be, infamous. It is a must for anyone interested in the history and lore of the Wild West, gun hobbyists, and tourists seeking a museum experience with a difference.

**The Bears Ears: A Human History of America's Most Endangered Wilderness** Gun Digest Photographs and text present the history of the Winchester firearm, including their rifles, shotguns and revolvers beginning in 1866 to 1992.

Here's the perfect companion to that most popular starter rifle, the venerable .22. The best isn't always the biggest--and the .22 is not only the perfect first rifle, but also one that many hunters and shooters come back to and use throughout their days afield. Wayne van Zwoll, a longtime expert on the subject, takes experts and beginners alike through the history, variety, and use of the classic .22. He writes appealingly about his first .22, and the ones he bought for later competitive use. He describes hunting with the .22, target shooting, and details the care and upkeep of the weapon. He discusses the evolution of the gun, and the refinements of the ammo that go with it. Included are chapters on: \*The .17 \*Practical scopes \*Squirrel rifles \*Supports \*Browning \*Getting to zero \*Winchester \*Holding a rifle still \*Remington\*The sling \*Cooper\*Prepping for the field \*Ruger\*A bullet's way through the wind \*Savage\*Cleaning \*Real gunstocks \*Ballistics \*Better sights \* . . . and more The .22's accuracy, economy, and versatility have made it an all-time best-seller. Now there's a book to go with every one.

A "well-researched and very readable new biography" (The Wall Street Journal) of "the Thomas Edison of guns," a visionary inventor who designed the modern handgun and whose awe-inspiring array of firearms helped ensure victory in numerous American wars and holds a crucial place in world history. Few people are aware that John Moses Browning—a tall, humble, cerebral man born in 1855 and raised as a Mormon in the American West—was the mind behind many of the world-changing firearms that dominated more than a century of conflict. He invented the design used in virtually all modern pistols, created the most popular hunting rifles and shotguns, and conceived the machine guns that proved decisive not just in World Wars I and II but nearly every major military action since. Yet few in America knew his name until he was into his sixties. Now, author Nathan Gorenstein brings firearms inventor John Moses Browning to vivid life in this riveting and

revealing biography. Embodying the tradition of self-made, self-educated geniuses (like Lincoln and Edison), Browning was able to think in three dimensions (he never used blueprints) and his gifted mind produced everything from the famous Winchester "30-30" hunting rifle to the awesomely effective machine guns used by every American aircraft and infantry unit in World War II. The British credited Browning's guns with helping to win the Battle of Britain. His inventions illustrate both the good and bad of weapons. Sweeping, lively, and brilliantly told, this fascinating book that "gun collectors and historians of armaments will cherish" (Kirkus Reviews) introduces a little-known legend whose impact on history ranks with that of the Wright Brothers, Thomas Edison, and Henry Ford.

Reference work for all those interested in the history of military firearms. It charts the British love affair with the 'flipped' bullpup rifle and machine gun - weapons with their firing mechanism positioned behind the trigger - from a faltering start in the Edwardian period, through the controversy of the NATO rifle trials, to the troubled history of the current SA80 family.

A surprising journey from tech support to professional marksman in front of the cameras. Chris Cheng won the title of "Top Shot," a \$100,000 cash prize, and a professional marksman contract with the show sponsor, Bass Pro Shops. How did a tech support guy who didn't shoot a lot of guns beat out seventeen other competitors—including seasoned military veterans, law enforcement officers, and pro marksmen—in History Channel's Top Shot season 4? An excellent guide for beginning shooters, Cheng focuses on the basics and ammunition of pistols, rifles, and shotguns, marksmanship fundamentals, and buying a firearm. Other chapters include: Dry Fire Practice Firearm Accessories Safely Storing Your Firearm Cleaning and Maintaining Your Guns And much more! Additionally, Cheng covers his approach to staying calm under pressure, teamwork, sportsmanship, and leadership. These traits contributed to his coming out on top and staying above the fray. With a foreword written by Top Shot season 3 champion Dustin Ellermann and an afterword written by the original Top Shot champion Iain Harrison, Shoot to Win is sure to please shooters of all stripes, but especially fans of History Channel's program Top Shot. Ernest Hemingway is a mythic writer and alpha male. As a hunter and conservationist, he drew greatly from the strong example of Theodore Roosevelt, and he much enjoyed teaching newcomers to shoot and hunt. Including short excerpts from Hemingway's works, these stories of his guns and rifles tell us as much about him as a lifelong, expert hunter and shooter and as a man.

The U.S. Army fought World War II with materiel much of which was developed in the decade prior to our entry, particularly in the period following the German blitz in Poland. Our efforts to develop munitions to the point where our armies could cope on equal terms with those of potential enemies are covered here in this, the first of three projected volumes on the history of the Ordnance Department in World War II. How well the Ordnance Department succeeded in matching the Germans in quality continues to be a matter of debate both within the Ordnance Department itself, and between the using arms and the Department. That the battle of quantity was won-with the help of a superb industrial machine-can hardly be denied. This volume, the result of diligent research by Dr. Constance McL. Green and her associates, should interest not only military men but also scientists, industrialists, and laymen in general. Among other things, it shows the urgent necessity of a directed, continuous, and intensive research program and the danger in failing to recognize and profit by developments abroad. Also shown is the inherent time interval between the drawing board and the production of the end item in quantity."

A personal and historical exploration of the Bears Ears country and the fight to save a national monument. The Bears Ears National Monument in southeastern Utah, created by President Obama in 2016 and eviscerated by the Trump administration in 2017, contains more archaeological sites than any other region in the United States. It's also a spectacularly beautiful landscape, a mosaic of sandstone canyons and bold mesas and buttes. This wilderness, now threatened by oil and gas drilling, unrestricted grazing, and invasion by Jeep and ATV, is at the center of the greatest environmental battle in America since the damming of the Colorado River to create Lake Powell in the 1950s. In The Bears Ears, acclaimed adventure writer David Roberts takes readers on a tour of his favorite place on earth as he unfolds the rich and contradictory human history of the 1.35 million acres of the Bears Ears domain. Weaving personal memoir with archival research, Roberts sings the praises of the outback he's explored for the last twenty-five years.
