Let Jamie Glowacki, potty-training expert, show you how it's done. Her six-step, proven process to get your toddler out of diapers and onto the toilet has already worked for tens of thousands of kids and their parents. Here's the good news: your child is probably ready to be potty trained EARLIER than you think (ideally, between 20–30 months), and it can be done FASTER than you expect (most kids get the basics in a few days—but Jamie's got you covered even if it takes a little longer). If you've ever said to yourself: -How do I know if my kid is ready? -Why won't my child poop in the potty? -How do I avoid "potty power struggles"? -How can I get their daycare provider on board? -My kid was doing so well—why is he regressing? -And what about nighttime?! Oh Crap! Potty Training can solve all of these (and other) common issues. This isn't theory, you're not bribing with candy, and there are no gimmicks. Imagine infants free from painful diaper rash, new parenthood without thousands of dollars wasted in diapering costs, toilet training that is natural and noncoercive, and, most important, happier babies and parents As Christine Gross-Loh reveals in her progressive, enlightening book, all this is possible and more. Infants are born with the ability to communicate their need to "go," just as they communicate hunger or sleepiness. Gross-Loh, a mother of two children who were diaper-free at eighteen and fifteen months, uses the tenets of "elimination communication," or EC, to teach parents how to identify and respond to their baby or toddler's natural cues. Unlike the all-or-nothing approach of some parenting books, *The Diaper-Free Baby* addresses three categories of parents: full-time, part-time, and occasional EC'ers. Parents can practice EC as much or as little as fits their family and lifestyle. A support group within a book, *The Diaper-Free Baby* also includes inspiring testimonials throughout every chapter. Parents who have successfully practiced EC identify common struggles, share experiences and problem-solving tips, and provide encouragement for those new to the technique. Their motivational stories together with Gross-Loh's practical advice will appeal to all parents interested in a fresh alternative to traditional toilet training.

A perfect way to teach children about potty training and how to be a good older sibling!

Oh Crap! Potty Training Familius Stop changing diapers?start potting your baby. Over half the world's children are potty trained by one year old, yet the average potty training age in the United States is currently three years old. This leaves parents wondering: What did people do before diapers? and How do I help my own baby out of diapers sooner?Elimination Communication, also known as EC, is the natural alternative to full-time diapers and conventional toilet training. Although human babies have been pottied from birth for all human history, we've modernized the technique

to work in today's busy world. *Go Diaper Free* shows parents of 0-18 month babies, step-by-step, how to do EC with confidence, whether full time or part time, with diapers or without. "Diaper-free" doesn't mean a naked baby making a mess everywhere - it actually means free from dependence upon diapers. With this book, new parents can avoid years of messy diapers, potty training struggles, diaper rash, and unexplained fussiness. Also helpful for those considering EC, in the middle of a potty pause, or confused about how to begin. This 6th edition includes a new section on The Dream Pee, a full text and graphic revision, more photos of EC in action, and a complete list of further resources. MULTIMEDIA EDITION: includes the book and access to private video library, helpful downloads, additional troubleshooting, and our private online support group run by our Certified Coaches. For less than the cost of a case of diapers, you can learn EC hands-on, the way it's meant to be learned.

How to Potty Train a Dinosaur Harmony Conventional wisdom tells parents that they should delay potty training to toddler age, and only after seeing signs of readiness. But is that really the best way? In *Diaper-Free Before 3*, Dr. Jill Lekovic presents the new case that early training--beginning as early as nine months olds--is most natural, healthy, and beneficial for your child, based on medical evidence. By incorporating the potty into your child's routine early on, toilet training becomes far less stressful for both parent and child. Dr. Lekovic's method, which she has used successfully with her own kids and recommends to patients, helps children become better aware of their body's signals, boosts confidence, and decreases the risk of urinary health problems. The guide includes informative chapters on bedwetting, accidents, and adapting the method for day care, special-needs

children, and older toddlers. Offering a technique that really works and turns toilet training into a positive experience, *Diaper-Free Before 3* is sure to become a new parenting classic.
