Why do I need a teacher when I've got Google? is just one of the challenging, controversial and thought-provoking questions Ian Gilbert poses in this urgent and invigorating book. Questioning the unquestionable, this fully updated new

edition will make you re-consider everything you thought you knew about teaching and learning, such as: • Are you simply preparing the next generation of unemployed accountants? • What do you do for the 'sweetcorn kids' who come out of the education system in pretty much the same state as when they went in? • What's the real point of school? • Exams – So whose bright idea was that? • Why 'EQ' is fast becoming the new 'IQ'. • What will your school policy be on brain-enhancing technologies? • Which is the odd one out between a hamster and a caravan? With his customary combination of hard-hitting truths, practical classroom ideas and irreverent sense of humour, Ian Gilbert takes the reader on a breathless rollercoaster ride through burning issues of the twenty-first century, considering everything from the threats facing the world and the challenge of the BRIC economies to the link between eugenics and the 11+. As wide-ranging and exhaustively-researched as it is entertaining and accessible, this book is designed to challenge teachers and inform them – as well as encourage them – as they strive to design a twenty-first century

learning experience that really does bring the best out of all young people. After all, the future of the world may just depend on it

The ability of the foundations and rules of the UK to evolve and in doing so adapt to changing circumstances has been a great strength. England, despite being home to 83% of the population of the UK, is yet to join the other nations of the Union in having effective devolution. Outside London, most decisions about England are still taken centrally by the UK Parliament though many decisions in the devolved parts of the Union are also taken centrally in the sense that they are made by the devolved Administrations and Legislatures for the whole of that part of the Union. 'Prospects for codifying the relationship between central and local government' (HC 656-I, ISBN 9780215052544) outlined a way in which devolution for England could be taken forward using local councils as the vehicle. Among the options is a national forum, or pre-convention, for England to discuss the most appropriate

method to address the English Question. A strong, lasting democratic settlement for the UK must be built upon two principles: those of devolution and union. That is to say, a broad acceptance of the role and powers of the Union, allied to a respect for different but agreed forms of devolution for the nations that make up the Union. The development of bespoke devolution, rather than one size fits all, is welcomed but the more this is within a context of an agreed role for the UK, the more sustainable the settlement will be
