Generate solid, long-term profits with a portfolio allocated for your investing needs Asset allocation is the key to

investing performance. Unfortunately, no single approach works perfectly—developing the right balance requires a clear-eyed look at the many models available to you, various investing methodologies, and your or your client’s level of risk tolerance. And that’s where this important guide comes in. Written by a leading allocation expert from T. Rowe Price, *Beyond Diversification* provides the knowledge, insights, and approaches you need to make the best allocation decisions

for your goals. This deep dive into the how’s and why’s of asset allocation is organized by the three decisive components of a successfully allocated portfolio: Return Forecasting discusses the desired return investors seek. Risk Forecasting covers the level of risk investors are prepared to assume to achieve that return. Portfolio Construction calibrates the stock-bond mix that balances the risks and returns. With examples from T. Rowe Price’s asset allocation team showing

you how the process works in the real world, *Beyond Diversification* provides everything you need to find the asset combination that will deliver the results you seek. Finance McGraw Hill Professional Investors who build diversified, multi-asset portfolios, have an ever increasing range of investment assets at their disposal. In order to invest effectively - and build a solid, performing portfolio - it is essential for investors to understand each of these single asset classes and how to use them in portfolios. The Investment Assets Handbook covers the full spectrum of different asset classes and investment types

available today, providing investors with the definitive information they need to reach an understanding of the broad range of investment assets. The Handbook is divided into four parts: 1. An introduction to asset classes, including how they should be defined, the main features that can be used to characterise asset classes and the roles that different assets fulfil within a multi-asset portfolio. 2. Traditional assets, including global

equities, fixed income and cash. 3. Alternative assets, including real estate, commodities, private equity and hedge funds. 4. New alternative investments, including currency, infrastructure, structured finance, leveraged loans, structured products, alternative or smart betas, volatility, art, insurance-linked securities and timber. Each asset chapter within these sections provides a description of the asset and its characteristics, its historic performance, how
