ESTES JANIYAH

Financial and Business Management for the Doctor of Nursing Practice CRC Press

Project Planning and Management: A Guide for Nurses and Interprofessional Teams, Third Edition serves as a primary resource for students developing and implementing clinical projects as a requirement for course completion.

Fast Facts for Making the Most of Your Career in Nursing F.A. Davis

This unique text explores the role and responsibilities of nurse and therapist consultants, providing a clearer understanding of the terms. The information clarifies the advanced specialist practitioner post and how it relates to the nursing and healthcare professions and specific posts. Each chapter is based around reflective activities, case studies and summaries of key points, giving further references to recommended reading and useful resources.

Project Planning & Management Springer Publishing Company
Prepared under the auspices of the International Council of Nurses (ICN), this first volume provides a comprehensive overview of the rapidly emerging field of advanced nursing practice. It addresses central issues in the role and practice development that are fundamental to defining and differentiating the nature of this field. Topics include defining the role, role characteristics, scope of practice, education, regulation and research. Obstacles to and facilitators of that role are addressed and include ethical questions arising in the context of practice development. With an international focus, this volume examines international developments in the field, as reflected in country-specific case studies and examples. It offers a valuable resource for advanced practice nurses, educators and administrators at healthcare institutions.

Nursing: Transition to Professional Practice Springer

This book provides the very latest in position statements, and new, forward-thinking in administrative strategies. Addresses fiscal management of outpatient cancer centers, including

financial systems models, use of CPT codes, cost effectiveness and clinical applications of evidence-based practice guidelines.

Project Planning and Management Pearson UK

This is a comprehensive, practical guide which looks at the advantages and limitations of new data analysis techniques being introduced across public health and administration services. The Affordable Care Act (ACT) and free market reforms in healthcare are generating a rapid change of pace. The "electronification" of medical records from paper to digital, which is required to meet the meaningful use standards set forth by the Act, is advancing what and how information can be analyzed. Coupled with the advent of more computing power and big data analytics and techniques, practitioners now more than ever need to stay on top of these trends. This book presents a comprehensive look at healthcare analytics from population data to geospatial analysis using current case studies and data analysis examples in health. This resource will appeal to undergraduate and graduate students in health administration and public health. It will benefit healthcare professionals and administrators in nursing and public health, as well as medical students who are interested in the future of data within healthcare.

Mentoring Nursing and Healthcare Students SAGE

It is essential for nursing students to access current and reliable information to succeed in academic assignments and nursing practice, yet there are increasingly diverse information sources available, which can raise questions about the authenticity and reliability of information provided. This book presents a practical and clear guide to mastering information skills. It shows the reader how to effectively plan and implement a search for information and make judgements on the quality of the sources found. It also gives strategies for storage and retrieval of information, helping nurses to maximise the time they have available for keeping up to date.

Public and Community Health Nursing Practice Jones & Bartlett Learning

The transition from student to newly registered nurse can be daunting but with the right preparation, you can step into your new role with confidence. This book provides valuable guidance on what to expect, practical strategies for easing the transition

and advice for supporting your ongoing personal and professional development. Key features o Each chapter is mapped to the new 2018 NMC standards o A new chapter on contemporary trends in nursing covers digital skills, peer facilitation, integrated working and more o Self-assessment tools and reflective activities help you to examine your competencies and identify goals for your development o A chapter on health and wellbeing illustrates the importance of self-care and recommends strategies to reduce stress and build resilience

Nurse Entrepreneur IOS Press

What does effective mentoring mean in actual practice? How can I be a good mentor? This book answers these questions and is designed to offer nursing and healthcare students a foundation in effective mentoring. Chapters examine the roles and responsibilities of the mentor, and how they enhance the process of mentorship. By examining the relevant competencies and knowledge base, the book provides an essential framework for developing the practice skills needed for successful mentoring.

Introduction to Advanced Nursing Practice Springer

First Edition Awarded Second Place in 2013 AJN Book of the Year Awards! The second edition of this award-winning text, designed specifically for the DNP course in health care economics and finance, remains the only book to embed economic and financial concepts in the context of nursing practice and nursing health care systems. Well organized and clearly written, the second edition is updated to encompass key changes to reimbursement and health care regulations and provides revised statistics throughout. It offers new information on ambulatory care, cost and ratio analysis, additional examples of financial statements, and an updated sample business plan. Enhanced teaching strategies include real life case studies, challenging critical thinking questions, learning games, key words in each chapter, and an extensive glossary. New PowerPoint slides add to the text's value as a robust teaching tool. Written by experienced DNP executives for DNPs, the book emphasizes critical skills nurse leaders need to participate in strategic health care planning. It delivers a practical approach to business, finance, economics, and health policy that is designed to foster sound business and leadership. The text clearly explicates the relationship between

cost of care, quality of care, and ethics, and examines the economic and financial implications of evidence-based practice and quality. Also included is a special section on finance for independent practitioners. Additionally, the book delivers required competencies of the AACN Essentials and the AONE. New to the Second Edition: Updated statistics throughout New information on ambulatory care A cost and ratio analysis Additional examples of financial statements Updated business plan Enhanced faculty support PowerPoint slides

Managing in Health Care Learning Matters

Provides final year nursing students with comprehensive guidance on how to make the leap from student to registered nurse, helping you to master the skills needed to progress from supervised to professional practice. Packed with key information, theory and advice, this book covers essential topics such as leadership and management, decision-making, professional development, assessment, law and ethics. It also provides you with an insightful overview of global nursing, exploring the issues of nurse migration and outlining the specific requirements for registering as a nurse in countries outside of the UK. To further support your learning, the book includes engaging activities that encourage you to use critical reflection, real-life example scenarios to help improve your decision-making, and references to the author's personal experiences of professional development. *International Council of Nurses* Lippincott Williams & Wilkins "Project Planning and Management: A Guide for CNLs, DNP's, and Nurse Executives provides a step-by-step approach to developing, implementing, and evaluating a project plan. This book serves as a guide to refining the idea or question, reviewing relevant evidence to support a best practice intervention, and outlining process dynamics, outcomes management, and evaluation strategies. Features throughout the text include chapter objectives, key terms, summaries, evidence-based examples, boxed articles, case studies, and review questions, as well as PowerPoint presentations and exam questions. This is the perfect resource for capstone courses and field studies as well as an ideal reference for professionals"--BOOK JACKET.

Developing Successful Health Care Education Simulation Centers
The Management Advantage, Inc.

Dr. Ford shows nursing home professionals how to master methods for implementing quality processes to stay ahead of the

competition. Both Administrators and Directors of Nursing have to rely on staff to accomplish all that must be done. Marketing to the community and motivating staff sometimes conflict with enforcement agency requirements. Dr. Ford explains how to meet the compelling needs of today's nursing home management in the face of all these various demanding constituencies.

Clinical Leadership in Nursing and Healthcare SAGE Publications
Written by and on behalf of the Association of Occupational Health Nurse Practitioners (AOHNP). This textbook provides a practical guide for those training as, or practising within, occupational health nursing. Concerned with the health of the people at work and the effects of work on health and health on work, this distinctive branch of public health nursing requires specific knowledge and skills. Contemporary Occupational Health Nursing includes chapters on: Public Health, Leadership, Health Promotion and Protection, Health Surveillance, Health Assessment, Case Management and Rehabilitation, Mental Health, Management of Occupational Health Services, Epidemiology and Research and Quality Assurance and Auditing. Discussion of ethical issues is woven throughout and each chapter is written by an experienced occupational health practitioner and includes features such as case studies, activities, learning outcomes, and chapter summaries. This book is designed as a text for those undertaking specialist community public health nursing qualifications and as an important resource for all nurses new to occupational health practice.

Information Skills for Nursing Students McGraw-Hill
Education (UK)

To successfully complete the transition from being a final year pre-reg nursing student to becoming a qualified staff nurse, students need to understand and practice the responsibilities and roles of the registered nurse. This book outlines the principles of professional practice and the skills of the qualified nurse.

Study Skills for Nurses Springer Publishing Company

A resource for anyone working as a nurse mentor and looking for guidance on how to stay up-to-date, this practical guide explains the ins and outs of competence and is designed to help you judge competence in line with NMC standards.

Becoming a Registered Nurse CRC Press

This eagerly anticipated book equips readers to understand the dynamics of policy processes, relevant decision-making and the

significance of key decision-makers. It also emphasizes the usefulness of negotiation and diplomacy skills in order to support the development of an advanced nursing practice (ANP) initiative that involves the identification of pivotal issues to ensure that nurses unlock their full potential. Topics include a definition of strategic planning, essential factors to bear in mind, and frameworks to use in the context of formulating effective policies. By addressing outcome indicators and research, this volume offers a comprehensive approach to coordinated planning, and will appeal to advanced practice nurses, healthcare planners and policymakers, as well as administrators at hospitals and healthcare institutions.
