The Knights of the Golden Circle along with the Order of American Knights are finally exposed, unexpectedly in the state of Nebraska. A huge cache was hidden by the secret organizations to fund the next rebellion and part of it was brought to the frontier. This is the first book in the series that will describe Knights of the Golden Circle operations in Nebraska and the members of the organizations involved, including the outlaw Jesse Woodson James. The Lincoln assassination is re-examined with recently discovered evidence pointing to the conspirators that were most likely responsible for the assassination. The book will also shed new light on evidence in Finis Bates's claim that John Wilkes Booth escaped to freedom and lived out his life as John St. Helen whom Bates met in Granbury Texas. The secret organizations of the K.G.C. and the O.A.K. are also linked to the Freemasons with the symbolism and membership of all three organizations overlapping among several members. The K.G.C. ranks reached all the way to the President of the United States. New evidence now links the secret organizations directly to the white house during more than one presidency. The true lives of presidents, prominent politicians, judges, lawyers, bankers, businessmen and their link to the outlaw Jesse Woodson James will now be told.

**NATIONAL BESTSELLER** • In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. Four months later, his decomposed body was found by a moose hunter. This is the unforgettable story of how Christopher Johnson McCandless came to die. "It may be nonfiction, but *Into the Wild* is a mystery of the highest order." —Entertainment Weekly McCandless had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Not long after, he was dead. *Into the Wild* is the mesmerizing, heartbreaking tale of an enigmatic young man who goes missing in the wild and whose story captured the world's attention. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing

from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding—and not an ounce of sentimentality. *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's stoytelling blaze through every page.

How many people can the Earth support? Tucker makes the case that the Earth's 'carrying capacity' is limited to 3 billion humans, and that humanity's century long binge has incurred an unsustainable ecological debt that must be paid down promptly, or else cataclysm awaits. Given that our species has already surpassed 7.5 billion, and is fast approaching 9 billion or more, this is an audacious claim that everyone who cares about the fate of our planet and our species has a responsibility to evaluate for themselves. Tucker, in his exploration of the frontiers of scientific knowledge, urges all of us to question his estimate. He encourages us to marshal our own data and calculations, if we are so inclined, so that we can all engage in this existential debate as educated global citizens equipped to navigate what promises to be an uncertain future. Equal parts history, science, economics, demography, conservation thinking, ethics, and foreign affairs - all through a geographic lens - this provocative book fundamentally redefines how you will think about the fate of humanity, and the planet from which our species evolved. In part a continuation of E.O. Wilson's Half-Earth thesis, Tucker decrypts the complex story of how humanity has come to burden the finite geography of our planet in unsustainable ways. Tucker argues that we in fact have "A People Problem" which goes far beyond the very real perils of climate change and biodiversity loss. Tucker takes us on a journey through the history and geography of the ecological devastation wrought by humanity, and the persistent wastes that we have accumulated, as our population has grown relentlessly. Only by thinking geographically, Tucker argues, can we truly understand the threats to humanity and the Planet Earth that sustains us. In *A Planet of 3 Billion*, biogeography, human geography, and geostrategic thinking collide to illuminate the most pressing issues facing our world today. Beyond a detailed tour of this seemingly insurmountable challenge, Tucker offers solutions. Tucker makes a convincing case that renewal is possible, and that we can indeed find our way to a new sustainable population plateau of 3 billion without some ominous genocide, epidemic, or ecological collapse.

Women - educated, empowered, integrated in to the workforce, and with access to family planning technologies - hold the key to our ecological salvation. All of us bear the responsibility for empowering women if we are to collectively chart a safe path to this new lower population plateau. And, together we must conjure up new ways to give Earth's panoply of unique ecoregions a voice, if we are to achieve an ecologically sustainable planet for our species over the long run. This book is for anyone who is interested in the world around them, concerned about the fate of the planet, and seeking insights that can help them become part of the solutions that would put us on a path to a resilient future.

Modern society emerged in the context of European colonialism and empire. So, too, did a distinctively modern social theory, laying the basis for most social theorising ever since. Yet colonialism and empire are absent from the conceptual understandings of modern society, which are organised instead around ideas of nation state and capitalist economy. Gurminder K. Bhambra and John Holmwood address this absence by examining the role of colonialism in the development of modern society and the legacies it has bequeathed. Beginning with a consideration of the role of colonialism and empire in the formation of social theory from Hobbes to Hegel, the authors go on to focus on the work of Tocqueville, Marx, Weber, Durkheim and Du Bois. As well as unpicking critical omissions and misrepresentations, the chapters discuss the places where colonialism is acknowledged and discussed – albeit inadequately – by these founding figures; and we come to see what this fresh rereading has to offer and why it matters. This inspiring and insightful book argues for a reconstruction of social theory that should lead to a better understanding of contemporary social thought, its limitations, and its wider possibilities.

Felix, a Jewish boy in Poland in 1942, is hiding from the Nazis in a Catholic orphanage. The only problem is that he doesn't know anything about the war, and thinks he's only in the orphanage while his parents travel and try to salvage their bookselling business. And when he thinks his parents are in danger, Felix sets off to warn them--straight into the heart of Nazi-occupied Poland. To Felix, everything is a story: Why did he get a whole carrot in his soup? It must be sign that his parents are coming to get him. Why are the Nazis burning books? They must be foreign librarians sent to clean out the orphanage's outdated library. But as Felix's journey gets increasingly dangerous, he begins to see horrors that not even stories can explain. Despite his grim surroundings, Felix never loses hope. Morris Gleitzman takes a painful subject and expertly turns it into a story filled with love, friendship, and even humor.
