Journal of Gas Lighting Springer Science & Business Media

Tea gowns, bleached damask, and yards of flannel and pillow-case lace, stereoscopes, books of gospel hymns and ballroom gems, the New Improved Singer Sewing Machine, side saddles, anti-freezing well pumps, Windsor Stoves, milk

skimmers, straight-edged razors, high-button shoes, woven cane carpet beaters, spittoons, the Studebaker Road Cart, commodes and washstands, the "Fire Fly" single wheel hoe, cultivator, and plow combined, flat irons, and ice cream freezers. What man, woman, or child of the 1890s could resist these offerings of the Montgomery Ward catalogue, the one book that was read avidly, year after year, by millions of Americans on farms and in small towns across the nation? The Montgomery Ward catalogue provides one of the few irrefutably accurate pictures of what life was "really like" in the gay nineties, for it described and illustrated almost anything that anybody could possibly need or want in the way of "store-bought" goods. In fact, in that pre-department store era, it was usually the only source for such goods. Imagine if Montgomery Ward had issued an

illustrated catalogue in the days of Louis XIV, or Elizabeth I, or Charlemagne: what insights would we have into the daily life of the "common folk," the farmers and shopkeeper, housewives and schoolchildren . . . what sources of information for historians and scholars, collectors and dealers, what models for artists and designers. In 1895, Montgomery Ward was the oldest, largest, and most representative mail-order house in the country. The brainchild of a former traveling salesman, it issued its first catalogue in 1872, a one-page listing of items. By 1895, the catalogue, reprinted here, had grown to 624 pages and listed some 25,000 items, almost all of them illustrated with live drawings. Montgomery Ward was by then a multi-million dollar business that profoundly affected the American economy; and since it reached the most isolated farms and backwoods

cabins, its effect on American culture was almost as great. Now once again available, it is our truest, most unbiased record of the spirit of the 1890s. An introduction on the history of the Montgomery Ward Company and its catalogue has been prepared especially for this edition by Boris Emmet, Ph.D. (Johns Hopkins), a foremost expert on retail merchandising. His monumental work *Catalogues and Counters* has long been recognized as a landmark in the study of American economic history.

Direct Support and General Support Maintenance Manual Courier Corporation

There is more to appraising jewelry than just being parable sales and a value determination. Then, all this able to put a dollar value on an item. The title of ap information, with clear jewelry descriptions, must be praiser distinguishes the individual who is able to iden succinctly put together with photographs and deliv tify, witness, estimate status, excellence, or potential ered to the client. ity, and to determine the authenticity of an article. Today's jewelry appraiser should also be cognizant Many factors impact on a thorough appraisal, espe of the vicissitudes of fashion, how changes impact the cially on estate and period jewelry. jewelry market in a substantial and vital manner in both design and style. A careful look must be given to Developing all this expertise is a lot to ask of practi tioners who only a decade ago were barely making a study of color psychology with an awareness of why specific gemstones and their colors and enamels of cer distinction between a well-written sales receipt and a professional appraisal report. tain colors were used in different periods. Industrial In the past few years bold changes have taken place developments, from machine stamped jewelry, the use in this field. It is now understood that standard ap of aniline dyes in clothing, and development of the praisal concepts and principles can be applied to the electric light, have influenced design and use of gem stones.

The Complete Idiot's Guide to Cigars Penguin

The French Cook: Cream Puffs & Eclairs Rowman & Littlefield

Kentucky Dam, the lowermost and the largest of the multiple-purpose projects of the Tennessee River system, is the key to effective control of discharges from the Tennessee, the largest tributary of the Ohio River. Located at river mile 22.4, Kentucky Dam is only 67.4 river-miles above Cairo, Illinois, and its large reservoir with more than 4,000,000 acre-feet of flood storage capacity occupies a strategic position for the reduction of flood crests on the lower Ohio and Mississippi Rivers. The navigation lock at this project forms the lower gateway to the 184-mile long Kentucky Reservoir, one of a chain of nine reservoirs extending a year-round 9-

foot navigation channel more than 600 miles to Knoxville, Tennessee, and connects this system of reservoirs to the major inland waterways of the great central Mississippi Valley with outlets for navigation to the Great Lakes and the Gulf of Mexico.

Technical Report

A step-by-step, French cooking class on choux pastry with savory and sweet recipes to try—by the award-winning food writer and author of *Tart Love*. The second book in *The French Cook* series, following *The French Cook: Sauces*, classically French trained author Holly Herrick dips into the marvelously versatile world of choux pastry, or *pâte à choux*. The buttery, nutty, even-flavor of this dough invites myriad flavors, in both sweet and savory categories and in many shapes—cream puffs, *éclairs*, rings, and more. Whether it be a savory *petit éclair* filled with an avocado mousse layered with bacon and tomatoes, choux “gnocchi” with a buttered herb sauce, three cheese *gougères* with black pepper, a sweet Dreamsicle orange cream puff with a dark chocolate sauce, a salted caramel macadamia ice cream filled *profiterole* with a warm caramel sauce, an Almond Joy

cream puff, or a hot-from-the-fryer *beignet* with a cool, fresh raspberry sauce, taste delights are found all along the way. Holly also provides tips and recipes for assembling classic cream puff cakes such as the *croquembouche* and *Gâteau St. Honoré*. Holly dedicates the front of the book to the art of demystifying the “puff,” making choux pastry an easy and accessible medium for every cook, novice, professional or anyone in-between. There is a chapter on sweet sauces to go along with the sweet cream puffs and *éclairs* and expert tips on piping, baking and garnishing these uniquely French delights. “An exploration deep into the world of choux and quickly debunks the myth that this best-known French pastry is something too complicated for the home baker...Une délice!”—Huffington Post

Unit Supply

Readers will learn to make wire jewelry like pros with this collection of more than 20 projects from the pages of *Art Jewelry* magazine. Readers can learn basic wireworking tools and techniques and practice skills including coiling, wire weaving, chain mail, wrapping, and making cold connections to create necklaces, rings, bracelets, and more. A great book for jewelry makers of all skill

levels.

Technical Report - United States Tennessee Valley Authority

The names Bloch and Geitner are synonymous with machinery maintenance and reliability for process plants. They save companies like Dow and Equilon millions of dollars a year by extending the life of rotating machinery in their plants. Extending the life of existing machinery is the name of the game in the process industries, not designing new machinery. This series by Bloch and Geitner was the first and is still the best, most comprehensive source for doing just that. This classic text on reliability has been revised to include all new material on risk management, pre-grouted bases, laser alignment, cartridge seals maintenance, and many other topics which have undergone many developments since the last revision. Helps engineers save their companies hundreds of thousands of dollars a year by reducing machinery downtime Now in its third edition, with a twenty-year history of success Details the money-saving techniques used by many of the world's leading companies, including Exxon, DuPont, Dow, and dozens of others
