When a non-emergency medical transportation vehicle came up for sale in 2005, Arnel Possi bought it for his car dealership. But something strange happened: Buyers were willing to pay much more than what Possi spent on the vehicle. Suddenly, he found himself interested in the non-emergency medical transportation business. With some research, he discovered that non-emergency medical transportation vehicles can transport patients with the same ailments, physical limitations or disabilities as emergency vehicles—the only difference is that when NEMT vehicles transport someone, there is no perceived emergency at the time of transport. In this guidebook to building your own NEMT business, you'll learn where to find vehicles, how to find Medicaid clients, and how to run the business before spending any money. You'll also find out how to anticipate what to expect on a typical business day; deal with drivers, clients, and the businesses you contract with, and get acquainted with government agency staff. Unravel the mysteries of the NEMT business, and reap the financial rewards that come along with providing a valuable service for your community.

Plunkett's Health Care Industry Almanac is the only complete reference to the American Health Care Industry and its leading corporations. Whatever your purpose for researching the health care field, you'll find this massive reference book to be a valuable guide. No other source provides this book's easy-to-understand comparisons of national health expenditures, emerging technologies, patient populations, hospitals, clinics, corporations, research, Medicare, Medicaid, managed care, and many other areas of vital importance. Included in the market research sections are dozens of statistical tables covering every aspect of the industry, from Medicare expenditures to hospital utilization, from insured and uninsured populations to revenues to health care expenditures as a percent of GDP. A special area covers vital statistics and health status of the U.S. population. The corporate analysis section features in-depth profiles of the 500 major for-profit firms (which we call "The Health Care 500") within the many industry sectors that make up the health care system, from the leading companies in pharmaceuticals to the major managed care companies. Details for each corporation include executives by title, phone, fax, website, address, growth plans, divisions, subsidiaries, brand names, competitive advantage and financial results. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

You have a new venture in mind. And you've crafted a business plan so detailed it's a work of art. Don't get too attached to it. As John Mullins and Randy Komisar explain in *Getting to Plan B*, new businesses are fraught with uncertainty. To succeed, you must change the plan in real time as the inevitable challenges arise. In fact, studies show that entrepreneurs who stick slavishly to their Plan A stand a greater chance of failing—and that many successful businesses barely resemble their founders' original idea. The authors provide a rigorous process for stress testing your Plan A and determining how to alter it so your business makes money, solves customers' needs, and endures. You'll discover strategies for: -Identifying the leap-of-faith assumptions hidden in your plan -Testing those assumptions and unearthing why the plan might not work -Reconfiguring the five components of your business model—revenue model, gross margin model, operating model, working capital model, and investment model—to create a sounder Plan B. Filled with success stories and cautionary tales, this book offers real cases illustrating the authors' unique process. Whether your idea is for a start-up or a new business unit within your organization, *Getting to Plan B* contains the road map you need to reach success.

If you've been downsized, outsourced, grown tired of the rat race or just need more income and a brighter future, this book is for you. If you're ready to take charge and become your own boss, this book is for you. The demand for local, fast courier and delivery services is booming. Independent

local couriers can provide the services that are in demand, like same-day deliveries that are just not available from UPS or Fedex. What does a courier do? They pick up and deliver packages, documents, even pets, for businesses and individuals. This service is always in demand, even in smaller in town, as there is always someone who needs a package or document delivered today. A courier service is the perfect "shoestring startup," as it requires very little money to start. All you need is a reliable vehicle and a smartphone.. No formal training is required, just the ability to communicate clearly with customers. Your new courier business can be home-based. This reduces overhead costs, and your only commute is to your next customer! The list of potential customers is almost endless: Architects, engineers, contractors, printers, doctors and medical labs, grocers, pharmacies, caterers, flower shops, accountants, attorneys, busy individuals who don't have the time to run errands and homebound individuals such as seniors and those recovering from an accident or illness. An independent courier service offers you: Flexible hours. Be your own boss. Scalability - grow as big as you want. A recession-proof business. Start on a shoestring. In this book, you'll learn: How to earn an instant income from day one. A simple tax break that could pay for your new delivery van. Software and smartphone apps to help you grow. Free and low-cost marketing ideas that work. How to set up your own website for under \$200. How to pick the right vehicle for your new courier business and make it last 300K miles. Abstract: RideUp, LLC will help to reduce the transportation barrier for the target community so better health outcomes can be achieved through improved treatment plan compliance. By ensuring that drivers and vehicles are trained and equipped to accommodate patients with special or mobility accommodations, RideUp gives clients the peace of mind of secured transportation to and from their health care visits. As the area of patient satisfaction is becoming an indicator for healthcare quality for hospitals, RideUp will adapt this indicator as a main focus for its services. This business proposal will explore the need for NEMT services in the target area and the feasibility of the project. The residents of the city of Santa Monica, and the nearby cities have various modes of transportation at their disposal. With the recent completion of the Metro Yellow Line from downtown Los Angeles to Santa Monica in 2016, more Los Angelinos are able to access Santa Monica than ever before. Additionally, the expansion of public transportation and increasing use of ride hailing applications, such as Lyft and Uber, Santa Monica has its share of congestion resulting from visiting tourists or commuters. However, none of these transportation modes provide a community focused healthcare centered service such as RideUp. Therefore, RideUp will have a competitive advantage as a non-emergency medical transportation service in the area.

"Refugee Solutions in the Age of Global Crisis: Human Rights, Integration, and Sustainable Development addresses the question of what to do about the global refugee crisis. One in every ninety-five people on the planet has been forcibly displaced from their home, the collective response is woefully inadequate. Through comparative case study, this book provides the first policy analysis

of all three durable solutions in the context of the global refugee crisis. The durable solutions are designed to find a permanent place for refugees were developed more than 70 years ago. Last year, fewer than two percent of refugees found their way any of these solutions. Reforming yesterday's solutions requires understanding how they have been used, how they have failed, and how they can be improved. Comparative case studies of the Somali Voluntary Repatriation Program, the Kalobeyei Integrated Settlement, and the Arizona Refugee Empowerment Project provide a comprehensive, global, and timely policy analysis grounded in social work, human rights, and sustainable development. The policy analysis of all three durable solutions is comprehensive, these are rarely considered together. The policy analysis is global in scope as the case studies are from refugee policies and populations from Africa, Asia, the Middle East, and North America. The policy analysis is timely in its focus on contemporary voluntary repatriation, local integration, and third country resettlement programs. This book offers implications for improving refugee solutions to promote human rights, integration, and sustainable development. This is vital to counter the rising tide of restrictionist, anti-refugee sentiment and policies"--

AN INSTANT NEW YORK TIMES BESTSELLER • A REESE'S BOOK CLUB PICK Tired, stressed, and in need of more help from your partner? Imagine running your household (and life!) in a new way... It started with the Sh\*t I Do List. Tired of being the "shefault" parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family—and then sent that list to her husband, asking for things to change. His response was...underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is Fair Play: a time- and anxiety-saving system that offers couples a completely new way to divvy up domestic responsibilities. Rodsky interviewed more than five hundred men and women from all walks of life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With 4 easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, Fair Play helps you prioritize what's important to your family and who should take the lead on every chore, from laundry to homework to dinner. "Winning" this game means rebalancing your home life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space—the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try Fair Play? Let's deal you in.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The first title in PREP's new Business Success Series is designed to help individuals who want to prepare paperwork related to starting, growing, selling, or marketing a business. The book contains real business plans for those contemplating entrepreneurship as well as for those who have an ongoing business which they are interested in selling. Readers will see samples of real business plans used by real organizations to sell a business to public companies. Readers will also see samples of documents, paperwork, and financial statements used by real companies to obtain equity financing and bank loans. A valuable section of the book is the section which shows marketing tools and "business resumes" used to attract new customers and increase profitability.
