Written by a practicing emergency physician, *The White Coat Investor* is a high-yield manual that specifically deals with the financial issues facing medical students, residents, physicians, dentists, and similar high-income professionals. Doctors are highly-educated and extensively trained at making difficult diagnoses and performing life saving procedures. However, they receive little to no training in business, personal finance, investing, insurance, taxes, estate planning, and asset protection. This book fills in the gaps and will teach you to use your high income to escape from your

student loans, provide for your family, build wealth, and stop getting ripped off by unscrupulous financial professionals. Straight talk and clear explanations allow the book to be easily digested by a novice to the subject matter yet the book also contains advanced concepts specific to physicians you won't find in other financial books. This book will teach you how to: Graduate from medical school with as little debt as possible Escape from student loans within two to five years of residency graduation Purchase the right types and amounts of insurance Decide when to buy a house and how much to spend on it Learn to invest in a sensible, low-cost and effective manner with or without the assistance of an advisor Avoid investments which are designed to be sold, not bought Select advisors who give great service and advice at a fair price

Become a millionaire within five to ten years of residency graduation Use a "Backdoor Roth IRA" and "Stealth IRA" to boost your retirement funds and decrease your taxes Protect your hard-won assets from professional and personal lawsuits Avoid estate taxes, avoid probate, and ensure your children and your money go where you want when you die Minimize your tax burden, keeping more of your hard-earned money Decide between an employee job and an independent contractor job Choose between sole proprietorship, Limited Liability Company, S Corporation, and C Corporation Take a look at the first pages of the book by clicking on the Look Inside feature Praise For *The White Coat Investor* "Much of my financial planning practice is helping doctors to correct mistakes that reading this book would have avoided in the first

place." - Allan S. Roth, MBA, CPA, CFP(R), Author of How a Second Grader Beats Wall Street "Jim Dahle has done a lot of thinking about the peculiar financial problems facing physicians, and you, lucky reader, are about to reap the bounty of both his experience and his research." - William J. Bernstein, MD, Author of The Investor's Manifesto and seven other investing books "This book should be in every career counselor's office and delivered with every medical degree." - Rick Van Ness, Author of Common Sense Investing "The White Coat Investor provides an expert consult for your finances. I now feel confident I can be a millionaire at 40 without feeling like a jerk." - Joe Jones, DO "Jim Dahle has done for physician financial illiteracy what penicillin did for neurosyphilis." - Dennis Bethel, MD "An excellent practical personal finance guide for physicians in training and in practice from a non biased source we can actually trust." - Greg E Wilde, M.D Scroll up, click the buy button, and get started today!

Written by two longtime Professional Fiduciaries, "Ethics for Trustees", A Guide for All Who Serve as Trustee, is intended as a guideline for everyone who serves as a Trustee of a Trust; Experienced or inexperienced; Attorneys, Fiduciaries, CPAs, Family Members and Friends, etc. Quotes and concepts have been drawn from personal experience, from the Professional Fiduciary Association of California (PFAC) Code of Ethics and from the most recent California Probate Code (2011). Review by an experienced Trusts and Estates Attorney: Ethics for Trustees is an excellent guidebook that draws together important resources and reference materials. It covers some topics few other writers have addressed, and the authors draw on wealth of personal experience. The writing is clear and concise. It is a valuable addition to my professional library. Meredith G. Alcock Trusts and estates attorney www.aalpc.com Review by an Independent Financial Advisor: Whether you are already serving as a professional trustee or considering taking on this role for the first time, we recommend this book. Serving as a trustee is a challenging responsibility. This book will help you understand what is expected of you and how to best meet the role of trustee. Troy B. Daum, CFP Principal Wealth Analytics www.WealthAnalytics.com The Authors: Jane B. Lorenz, CPA, CLPF has been practicing as a CPA since 1975 and started serving as a Professional Trustee around

1990. Marguerite C. Lorenz, CTFA, CLPF began working with Jane in 2003 and has been serving as a Professional Trustee ever since. This book is a labor of love. They know from experience the challenges facing today's Fiduciary, whether amateur or professional. Many professional Fiduciaries operate as sole proprietors, without partners or staff. Jane and Marguerite have benefitted so much from their partnership and business model, they feel good about sharing some of what they have learned. The Readers: Everyone who is in the Estate Planning Process can benefit from a better understanding of what their Successor can and should do. The documents alone do nothing. The selection of the appropriate Successor Trustee is vitally important, as this is the one trusted to fulfill the Estate Plan provisions. How can the right Successor be selected if the one choosing is not familiar with what the job entails? Reading this concise volume gives the reader just what is needed. Before one accepts the role of Trustee he/she should understand the liability, the ethical issues and the depth of responsibility. We believe that reading this book may prevent family upset and financial disaster.

Socially responsible investors are similar to conventional investors in some ways but different in others. Like conventional investors, socially responsible investors want high returns and low risk, but socially responsible investors also want their portfolios to conform to their values, whether promotion of worker rights, opposition to war, or protection of the environment. Financial advisors new to socially responsible investing ask important questions. How can we make sense of socially responsibility when it means different things to different people? Is it right to mix financial goals with social goals. And won't such mixing violate our fiduciary duties? Socially responsible investing often means different things to different people, but so does risk. It is the role of advisors to explore clients' social, ethical and religious preferences, just as they explore attitudes toward risk. Social questionnaires can facilitate that task as risk questionnaires do. Mixing non-financial preferences with financial goals is not really new to any financial advisor. For example, advisors routinely accommodate the "home bias" of clients by titling portfolios away from foreign stocks, even when such tilts diminish the benefits of diversification. And socially responsible investing does not violate advisors'

fiduciary duties when clients direct such investing in the investment policy statement. This article presents, in their own words, four financial advisors who advise socially responsible investors. They tell about the life experiences that have drawn them to socially responsible investing and offer lessons about serving socially responsible clients.

Praise for The Four Pillars of Retirement Plans "This up-to-the-minute book shows how the Supreme Court's recent LaRue decision has reshaped the world of retirement plans. Rules governing fiduciaries of defined benefit plans may no longer protect fiduciaries of defined contribution plans and may actually harm them. The Four Pillars of Retirement Plans is indispensable for plan sponsors and other fiduciaries, and for all those advising them, including investment advisors and attorneys." —W. Scott Simon, JD, CFP, AIFA, author of The Prudent Investor Act: A Guide to Understanding and Morningstar "Fiduciary Focus" columnist "This book is a must-read for all plan sponsors, financial advisors, and ERISA attorneys if they have any hope of defending themselves from the mountain of litigation looming on the horizon for all participant-directed retirement plans and provides a road map to easily modify antiquated procedures born in the defined benefit era that contradict today's participant-directed retirement plans. Plaintiff's counsel is sure to have read this book; if you don't, you will be defenseless in these suits." —Edward Siedle, Esq., "The Pension Detective" and President of Benchmark Financial Services, Inc. "If you are a trustee, plan sponsor, or financial advisor serious about the retirement plan marketplace, you MUST read this book, or you will be ill-equipped to deal with the fiduciary meltdown non-readers will be facing." —John Lohr, ERISA attorney and author

Governance is a word that is increasingly

heard and read in modern times, be it corporate governance, global governance, or investment governance. Investment governance, the central concern of this modest volume, refers to the effective employment of resources—people, policies, processes, and systems—by an individual or governing body (the fiduciary or agent) seeking to fulfil their fiduciary duty to a principal (or beneficiary) in addressing an underlying investment challenge. Effective investment governance is an enabler of good stewardship, and for this reason it should, in our view, be of interest to all fiduciaries, no matter the size of the pool of assets or the nature of the beneficiaries. To emphasize the importance of effective investment governance and to demonstrate its flexibility across organization type, we consider our investment governance process within three contexts: defined contribution (DC) plans, defined benefit (DB) plans, and endowments and foundations (E&Fs). Since the financial crisis of 2007–2008, the financial sector's place in the economy and its methods and ethics have (rightly, in many cases) been under scrutiny. Coupled with this theme, the task of investment governance is of increasing importance due to the sheer weight of money, the retirement savings gap, demographic trends, regulation and activism, and rising standards of behavior based on higher expectations from those fiduciaries serve. These trends are at the same time related and self-reinforcing. Having explored the why of investment governance, we dedicate the remainder of the book to the question of how to bring it to bear as an essential component of good fiduciary practice. At this point, the reader might expect investment professionals to launch into a discussion about an investment process focused on the best way to capture returns. We resist this temptation. Instead, we contend that achieving outcomes on behalf of beneficiaries is as much about managing risks as it is about capturing returns—and we mean "risks" broadly construed, not just fluctuations in asset values.

For immigrants, their descendants, and anyone else looking to learn the unbiased truth about investing, Close the Gap & Get Your Share is a step-by-step guide to generating and passing on wealth in the US—dispelling financial myths and offering a secure path to building generational wealth. Despite the American Dream's promises of prosperity and security, many immigrants still discover a seemingly insurmountable wealth gap upon their arrival to the United States. And while this gap is caused by innumerable (and sometimes inevitable) factors, its deep persistence is in many cases linked to the financial behaviors of immigrants themselves, who may not be familiar with the country's financial institutions, and who often subscribe to financial myths that lead to major mistakes. Close the Gap & Get Your Share will also be useful to non-immigrants wanting to learn about evidenced-based investing and how to build generational wealth. From Dr. Julio Cacho, Cole Conkling, and Juan Carlos Herrera, managing directors of Inscription Capital, Close the Gap & Get Your Share is a crucial resource that explains US-based investing in a way that makes sense to immigrants (as well as novice investors) and allows them to skip years of learning

and catch up to their non-immigrant peers in attaining financial prosperity—without jeopardizing their families' existing resources. Close the Gap & Get Your Share does away with the usual Wall Street practice of overcomplicating investment advice in favor of fact-based, straightforward strategies and puts the reader's financial wellbeing first. Drawing on the authors' combined four decades of financial experience, Close the Gap & Get Your Share teaches immigrants and their families how to: Overcome the hidden and unnecessary risks that face immigrants and all novice investors Invest in practice, including topics about what a market is, risk and return, risk tolerance, and how to properly balance risk and return Deal with investor behavior, including recognizing and understanding behavioral biases and how to properly overcome them so you can achieve long-term financial security For all generations of immigrants and nonimmigrants alike motivated to grow their wealth and pass it on, Close the Gap & Get Your Share is a robust guide to closing the ever-growing wealth gap with accessible and distilled financial literacy and strategy—and a tool to help them and their families not only amass wealth, but also flourish.

This book addresses an essential need felt by many who seek to promote best business practices in China and East Asia – namely the need for culturally appropriate instructional materials (basic information, case studies and ethical perspectives) that will allow managers and entrepreneurs to understand and embrace the challenge of moral leadership in business. In an era characterized by globalization and the increasing importance of the economies of China, India, Japan and SE Asia, international business ethics must reflect the concerns of the people living and working in this area, the moral and spiritual traditions that have nurtured them and their specific contributions to sustainable development. This book presents twenty important case studies, taken from newsworthy events of the past few years, in which Asians and others have attempted to respond to this challenge. Each case study has been selected and shaped in order to highlight various aspects of doing business in Asia, starting with basic principles and moving on to the specific responsibilities that businesses have towards their various stakeholders. The authors contend that the best way to appreciate the relevance of Asian moral and spiritual traditions is to determine their specific contribution to virtue ethics, where the ancient traditions of both East and West converge in their

focus on the qualities of moral leadership that form the basis of best business practice. Exploring the case studies will enable readers to appreciate the continued relevance of these ethical perspectives in Asian business. Best business practice clearly involves learning to do business and playing the game according to the rules; but the necessity of playing by the rules is not likely to become clear until one takes up the path that leads to a virtuous life in business, developing a moral character chiefly based on integrity.

Today, financial clients are profoundly skeptical. They've been burned. Their consultants and advisors talk too much, use too much confusing technical jargon, work from too many boilerplate scripts, repeat too many generic caveats and useless disclaimers. Above all, clients say, their advisors don't listen well, and don't link their own needs and views to the recommendations they present. To succeed in today's radically new environment, financial advisors must first transform the way they communicate. In *The Financial Professional's Guide to Communication*, one of the world's leading experts on the financial client relationship shows them how to do precisely that. Drawing on his experience training elite financial professionals worldwide, Bob Finder shows how to actively listen, speak plainly with precision and passion, and engage clients with uncommon effectiveness. Finder demonstrates how to focus relentlessly on what matters most to each individual client, and then deliver intensely relevant recommendations with clarity and impact, in your own voice. You'll learn how to bring imagination, creativity, and even entertainment to your presentations and conversations, and use constructive criticism to keep improving with every new client meeting. Using these proven techniques, you can deliver truly extraordinary levels of professionalism and service, gain the powerful new competitive edge you're desperately searching for - and earn equally powerful rewards for yourself.
