Yogi, a small, scrappy Jack Russell terrier, has a pain in the neck, and after a month in the hospital, he still can't walk. Charlie, a charismatic rescued racing thoroughbred, has a bad back and can no longer stand the weight of a saddle.

Mikey's posttraumatic stress syndrome transforms this wise feline into an anxious fellow who rips out clumps of belly hair. The mysterious tortoise Sheldon T. has disappeared, leaving only questions in his muddy wake, and Angel, an achingly beautiful, otherworldly cockatoo, has strange symptoms that defy every antibiotic known to science. Meet just a few of the compelling, complex characters in *The Last Chance Dog*, a twenty-first-century *All Creatures Great and Small* filled with entertaining, instructive, and moving true-life tales from the files of a pioneering holistic veterinarian. Dr. Donna

Kelleher recounts her most intriguing cases as she takes us through the intuitive art of diagnosing animals and effecting miraculous cures with safe, natural treatments that succeed where conventional medicine has failed. Holistic medicine is their last chance, and over and over again, Kelleher heals with the gentle powers of acupuncture, animal nutrition, herbal treatments, and chiropractic. Her stories of unforgettable, ailing animals -- and the people who fight to save them -- are truly inspirational as she transforms the animals' health and the lives of those who love them. *The Last Chance Dog*

includes advice on everything from vaccinations and commercial pet foods to step-by-step instructions for simple, safe remedies for a multitude of common conditions, including allergies, digestive problems, urinary tract infections, pain, hot spots, itchy skin, fear, and anxiety.

The Canine Chef Cookbook CABI

The perfect gift for dog lovers and readers of *Inside of a Dog* by Alexandra Horowitz—this New York Times bestseller offers mesmerizing insights into the thoughts and lives of our smartest and most beloved pets. Does your dog feel guilt? Is she pretending she can't hear you? Does she want affection—or just your sandwich? In their New York Times bestselling book *The Genius of Dogs*, husband and wife team Brian Hare and Vanessa Woods lay out landmark discoveries from the Duke Canine Cognition Center and other research facilities around the world to reveal how your dog thinks and how we humans can have even deeper relationships with our best four-legged friends. Breakthroughs in cognitive science have proven dogs have a kind of genius for getting along with people that is unique in the animal

kingdom. This dog genius revolution is transforming how we live and work with dogs of all breeds, and what it means for you in your daily life with your canine friend.

Dogwise Publishing

There's a reason why pets beg at your table—they want real food! Not the kibble manufactured by pet food companies, drained of nutrients. If we are dedicated to preparing healthy meals for ourselves in the comfort and safety of our own kitchens, shouldn't we be doing the same for our pets? *Dinner PAWsible* is a collection of more than fifty cat and dog food recipes that will teach you how to whip up a fresh, balanced meal for your hungry critters. Written by a veterinarian certified in food therapy and an advocate for pet food safety, these recipes are also based on the National Research Council requirements for dogs and cats. Recipes for Dogs include: Turkey & Oats Lasagna Beef, Egg & Rice Chicken, Shrimp, and Veggies Salmon & Cabbage And more! Recipes for cats include: Turkey Meatloaf Turkey & Salmon Hash Steak & Eggs Fish Salad Gumbo And more! Debunk the myth that pet food companies are the only

entities qualified to feed your pets. Instead, beat pet obesity, disease, and sickness by reaching into your pantry or refrigerator, turning on the stove, and starting to cook yourself! Making food at home will also decrease those exorbitant pet food bills. It's time to go back to the table. Know exactly what your pet is eating and serve it a variety of real food that it deserves. Be a responsible pet parent by balancing your pet's diet and pleasing its palate. Cooking for your pet is paws-ible!

Raw Meaty Bones Time Inc. Books

4% of the pet lover population feed their dog or cat a raw food diet because it's species appropriate. Kimberly Gauthier, Dog Nutrition Blogger for Keep the Tail Wagging(R), is sharing her experience as a raw feeder, including how feeding a species appropriate diet to her dogs cured allergies, digestive issues, joint issues, chronic ear infections, yeast infections, some behavior issues, and more. Five years ago, a veterinarian told Kimberly that one of her dogs, Rodrigo, would live a short life. Today, Rodrigo is a happy, active, healthy dog and his health issues are in the past. Rodrigo used to go to the

vet every other month, today, he goes annually for a check up. Imagine the money saved. Kimberly is raising four dogs on a raw food diet, treating any health issues that come up naturally and through nutrition with the help of two local holistic veterinarians. Raw feeding is becoming more mainstream as pet owners are looking for a healthy alternative to kibble and canned pet food. A Novice's Guide to Raw Feeding for Dogs is a great introduction to a species appropriate diet that is changing dogs' lives. Kimberly is the type of person who jumps back and forth between chapters when she reads a book, so she wrote this book with that type of reader in mind. Learn more about her mindset when she wrote A Novice's Guide here: <https://youtu.be/KxjIUJfjBTA>

The Intelligence of Dogs Dogwise Publishing
#1 New York Times Bestseller In this pathbreaking guide, two of the world's most popular and trusted pet care advocates reveal new science to teach us how to delay aging and provide a long, happy, healthy life for our canine companions. Like their human counterparts, dogs have been getting

sicker and dying prematurely over the past few decades. Why? Scientists are beginning to understand that the chronic diseases afflicting humans—cancer, obesity, diabetes, organ degeneration, and autoimmune disorders—also beset canines. As a result, our beloved companions are vexed with preventable health problems throughout much of their lives and suffer shorter life spans. Because our pets can't make health and lifestyle decisions for themselves, it's up to pet parents to make smart, science-backed choices for lasting vitality and health. The Forever Dog gives us the practical, proven tools to protect our loyal four-legged companions. Rodney Habib and Karen Becker, DVM, globetrotted (pre-pandemic) to galvanize the best wisdom from top geneticists, microbiologists, and longevity researchers; they also interviewed people whose dogs have lived into their 20s and even 30s. The result is this unprecedented and comprehensive guide, filled with surprising information, invaluable advice, and inspiring stories about dogs and the people who love them. The Forever Dog prescriptive plan focuses on diet and nutrition, movement, environmental

exposures, and stress reduction, and can be tailored to the genetic predisposition of particular breeds or mixes. The authors discuss various types of food—including what the commercial manufacturers don't want us to know—and offer recipes, easy solutions, and tips for making sure our dogs obtain the nutrients they need. Habib and Dr. Becker also explore how external factors we often don't think about can greatly affect a dog's overall health and wellbeing, from everyday insults to the body and its physiology, to the role our own lifestyles and our vets' choices play. Indeed, the health equation works both ways and can travel "up the leash." Medical breakthroughs have expanded our choices for canine health—if you know what they are. This definitive dog-care guide empowers us with the knowledge we need to make wise choices, and to keep our dogs healthy and happy for years to come.

The Story-book of Science Damn Delicious

Anyone who lives with and loves dogs knows that they are smart. Really smart. They understand our body language and emotions, can be trained to perform

important services, are devoted companions, and enjoy walks, tricks, dog sports or just hangin' out on the couch. So, how "Dog Smart" are you? What do you know or wish to know about the dog's history, perceptions, understanding of humans, and responses to different training methods? These topics and more come under the scrutiny of the Science Dog in Linda Case's latest myth-busting book. Learn to separate fact from fiction about the relationship between dogs and wolves, whether dominance should be a factor in dog training, what forms of reinforcement work best, and how to apply evidence-based training methods. "Dog Smart" will not only help you to be a better trainer, but will give you the tools for communicating the most current information about dogs to others - including the popular Science Dog character, neighbor Joe (who happens to know a lot about dogs).

The Genius of Dogs National Park Service
Yellowstone National Park

Combining heroic stories of dogs with the latest scientific and psychological information, this book has provoked controversy with its lists that rank more

than 100 breeds and its exciting new insights into the thoughts, emotions, and inner lives of dogs.

Feed Your Best Friend Better Penguin
Cooking for dogs according to traditional Chinese medicine food therapy including recipes.

Food Pets Die for Ballantine Books
A book about metals, plants, animals, and planets.

Shiver Elsevier Health Sciences
Highlighting the dangers of modern pet food--how it is unbalanced, creates addiction, and often contains ingredients that can literally poison your pet, this book destroys the myths propounded by pet food companies that human food is bad for pets, and that natural food diets are unsafe. Three veterinarians share their expertise and scientific evidence, providing an in-depth appraisal of the pet food industry and what people are feeding to their cats and dogs. This revolutionary book teaches how to read pet food labels and what ingredients to avoid, how to save on pet bills by preventing diet-related disease in pets, why veterinarians are often ignorant of the health effects of manufactured pet food, how a change in

diet can cure many diet-related illnesses, and why organic farming practices and suppliers can be the best choice for pets. Armed with this information, people will be able to provide a better and healthier life for their animals.

Deafness in Dogs and Cats Scholastic UK
This third book from Dr. Ian Billinghurst was written to help pet owners either understand or expand their knowledge of evolutionary diets for both dogs and cats. It contains important background research from his first two books together with lots of new information. Experienced "BARFers" will benefit from a number of new suggested recipes and practical information to assist in the home production of BARF diets - now everyone can do the BARF diet for their pets!
[Unlocking the Canine Ancestral Diet](#) Simon and Schuster

Updating recommendations last made by the National Research Council in the mid-1980s, this report provides nutrient recommendations based on physical activity and stage in life, major factors that influence nutrient needs. It looks at how nutrients are metabolized in the bodies of dogs and cats, indications of

nutrient deficiency, and diseases related to poor nutrition. The report provides a valuable resource for industry professionals formulating diets, scientists setting research agendas, government officials developing regulations for pet food labeling, and as a university textbook for dog and cat nutrition. It can also guide pet owners feeding decisions for their pets with information on specific nutrient needs, characteristics of different types of pet foods, and factors to consider when feeding cats and dogs.

A Novice's Guide to Raw Feeding for Dogs Dogwise Publishing

Ancestors and canine cousins of our dogs didn't eat "krunchy kibble" or "meat 'n gravy in a can." They ate what they found or caught... and it wasn't cooked or "enriched" either! It was high in protein, with balanced fats, and usually included a few fruits, vegetables and grasses. Steve Brown, an expert on canine nutrition, shows how you can bring the benefits of the canine ancestral diet to your dog by feeding him differently as little as just one day a week. And no, you won't need to lead a pack of dogs on a hunting expedition! Just follow Steve's well-

researched and easy to follow ABCs to make improvements to whatever your dog currently eats. BONUS! Raw food or home prepared feeders will learn how to balance nutrients more precisely, especially fats, for optimum health. A dog diet to get wild about! • Learn about the latest research on the importance of protein and healthy fats in your dog's diet. • Find out why commercial foods can't include these fragile-but-crucial nutrients, and how you can make sure your dog gets them. • Just one day a week, or more frequently if you choose, follow the simple recipes that balance the nutrition in the commercial food you are feeding—wet or dry!

The Dog Cancer Survival Guide Simon and Schuster

Written by experts in different areas, this book presents an up-to-date account of the behavioral biology of dogs. Split in three parts, the book addresses the specific aspects of behavioral biology. The first part deals with the evolution and development of the dog, whereas the next part deals with basic aspects of dog behavior. The final part emphasizes on the behavioral problems, their prevention and cure.

Muller and Kirk's Small Animal Dermatology - E-BOOK Greenleaf Book Group

Human nutrition expert and author of the critically acclaimed *What to Eat*, Marion Nestle, Ph.D., M.P.H., has joined forces with Malden C. Nesheim, Ph.D., a Cornell animal nutrition expert, to write *Feed Your Pet Right*, the first complete, research-based guide to selecting the best, most healthful foods for your cat or dog. Human nutrition expert and author of the critically acclaimed *What to Eat*, Marion Nestle, Ph.D., M.P.H., has joined forces with Malden C. Nesheim, Ph.D., a Cornell animal nutrition expert, to write *Feed Your Pet Right*, the first complete, research-based guide to selecting the best, most healthful foods for your cat or dog. A comprehensive and objective look at the science behind pet food, it tells a fascinating story while evaluating the range of products available and examining the booming pet food industry and its marketing practices. Drs. Nestle and Nesheim also present the results of their unique research into this sometimes secretive industry. Through conversations with pet food manufacturers and firsthand

observations, they reveal how some companies have refused to answer questions or permit visits. The authors also analyze food products, basic ingredients, sources of ingredients, and the optimal ways to feed companion animals. In this engaging narrative, they explain how ethical considerations affect pet food research and product development, how pet foods are regulated, and how companies influence veterinary training and advice. They conclude with specific recommendations for pet owners, the pet food industry, and regulators. A road map to the most nutritious diets for cats and dogs, *Feed Your Pet Right* is sure to be a reference classic to which all pet owners will turn for years to come.

Yin & Yang Nutrition for Dogs North Atlantic Books

One in four pets is obese, and every year owners spend thousands of dollars treating allergies, joint problems, digestive disorders, and serious diseases that could improve dramatically with a nutritious diet. Yet despite promises of complete and balanced meals, most commercial pet foods contain chemical preservatives,

indigestible fillers, and dangerous by-products. If your pets are overweight, ailing, or aging, or you just want them to be as healthy as possible, *THE WHOLE PET DIET* offers a straightforward plan to achieve lifelong health and well-being. Featuring twenty-five easy recipes for homemade meals and treats, a guide to natural supplements, and practical tips for no-stress grooming and play, this holistic approach to pet care creates optimal health for dogs and cats, and it just might change the way you eat, too.

CANINE NUTRIGENOMICS Maui Media
Written by a man passionate about nature and all living creatures, this book reads like a casual conversation you're having with a really good friend over a couple of beers. Someone who you've always respected and knew was really smart, knew what he was talking about. Don't be surprised if *To Your Dog's Health!* makes you apologize to Fido or Fifi for all the years you just opened up any old can or bag of food, put it in a bowl, and left it for the day. And then you get upset, maybe even mad, when you got home from work, tired and maybe a little cranky, only to discover your pet hadn't touched its food.

To Your Dog's Health! just might be your wake up call.

Yellowstone Grizzly Bears Newsage Press
Problems with your dog? It may be his thyroid! If your dog is lethargic, losing his hair, gaining weight or suddenly becomes aggressive, perhaps the last thing you (or your vet!) would think about is his thyroid. Unfortunately, however, thyroid disorders can cause literally dozens of health and behavioral problems in dogs and frequently go undiagnosed or are misdiagnosed. And the real tragedy is that most thyroid problems are treatable with the right medical care and a well-informed owner can often minimize the chance of a thyroid disorder occurring in the first place. Noted veterinarian Jean Dodds and co-author Diana Laverdure have done the dog owning public and their vets a great service by writing *The Canine Thyroid Epidemic*. The book is written in such a way to inform both the average dog owner and animal health care professionals about the ways in which thyroid disorders occur, can be prevented and treated.

Nutrient Requirements of Dogs and Cats Celestial Arts

The debut cookbook by the creator of the

wildly popular blog Damn Delicious proves that quick and easy doesn't have to mean boring. Blogger Chungah Rhee has attracted millions of devoted fans with recipes that are undeniable 'keepers'-each one so simple, so easy, and so flavor-packed, that you reach for them busy night after busy night. In Damn Delicious,

she shares exclusive new recipes as well as her most beloved dishes, all designed to bring fun and excitement into everyday cooking. From five-ingredient Mini Deep Dish Pizzas to no-fuss Sheet Pan Steak & Veggies and 20-minute Spaghetti Carbonara, the recipes will help even the

most inexperienced cooks spend less time in the kitchen and more time around the table. Packed with quickie breakfasts, 30-minute skillet sprints, and speedy takeout copycats, this cookbook is guaranteed to inspire readers to whip up fast, healthy, homemade meals that are truly 'damn delicious!'
