Well there's this talking monkey who won me in a game of Othello in a coffee shop in Amsterdam. He came back to Cornwall with me and has become a prolific reader and dabbler in magic. He also has past life flash backs - the most prominent of which are the Nam special forces ones. We have partially deceased girlfriends who apparently eat dead bodies. The Monkey created a sort of black hole in the spare bedroom and now we have a team of nerds investigating it and trying to stop 'things' coming out of it. A bunch of Oriental hit men who appear to believe he is a god attempted to steal The Monkey's magic lolly pop sticks, but he managed to blow them up in their caravan. We are off to Cambodia in search of a temple from which

came a monkey faced pendant with glowing eyes and we seem to have upset an international cabal who are out to get us. Oh, and did I mention that The Monkey likes a cigar and we regularly get very drunk on Jack Daniels... Interested? Perplexed? Worried? Come on in and join the fun. Written in the form of blog entries this is our story so far...

Praise for *The Monkey Goes Bananas* "This predominantly wordless picture book delivers a substantial helping of slapstick." --Kirkus Reviews "There is a slapstick element to the humor (the monkey is flung around with some regularity), which will resonate with readers as they turn each page to see what the monkey will try next. Throw in an opportunistic shark with an empty belly, and the pieces are in place for a laugh-out-loud story that should earn plenty of repeat readings." --Booklist "Kids will jump right into this rip-roaring flip book-paced tale." --School Library Journal

We have all, at some point, seen science in action on television. Whether it was a show about disasters or weather, nature or the universe, a science commentator, even a crime show depicting

forensic evidence — we have all gleaned tidbits of scientific information while being entertained by our televisions. Or have we? From science channels and documentaries to fictional and children's programming, television brings a myriad of scientific discoveries and theories into the homes of people around the world. But how accurately do these programs represent science? In *Media Mediocrity*, television producer and broadcaster Richard Zurawski argues that the science we learn on television is inaccurate, misleading and sometimes even dangerous. Dealing with issues such as tobacco consumption, global warming and Intelligent Design — and a host of pseudoscientific pursuits like UFOs, ghosts and the afterlife, *Media Mediocrity* examines how television producers' pursuit of ratings and profit trump any desire to provide the audience with an accurate knowledge of science — and argues that there are real consequences for this lack of knowledge. Four out of five viewers gather the bulk of their scientific knowledge from television, making television an important

intermediary between society and its understanding of science. If television gives us misleading — or blatantly false — scientific information, how can we hope to make informed decisions about scientific issues? Equally importantly, who is it that is feeding us this false science? And what do they gain from doing so? If you think your TV has made you an expert, then read this book — and think again.

prehistoric animals. Lavishly illustrated with over sixty original artworks, *All Yesterdays* aims to challenge our notions of how prehistoric animals looked and behaved. As a critique/exploration of palaeontological art, *All Yesterdays* asks questions about what is probable, what is possible, and what is commonly ignored. Kurt Vonnegut's first novel *Player Piano*, published in 1952, heralded the beginning of one of the most diverting and provocative adventures in modern American fiction. Vonnegut went on to write novels that perhaps had greater formal skill and technique, but *Player Piano* is a tour de force of imaginative insight into modern life and a shrewd

satire of American progress.

**The Smartest Kid in the Universe** By Light Unseen Media Vampires are ubiquitous in our popular culture-- from movies to television,

in fiction and art, and even within the hallowed halls of academia. But in the not-so-distant past, these undead creatures held more fear than fascination; they lived in the shadows and were the stuff of nightmares. In 1897, Bram Stoker introduced *Dracula* to the Western world--and our concept of vampires was changed forever. For over sixty years, the undead have bled the television airwaves, appearing in every type of programming imaginable. *Un-Dead TV* catalogues over one thousand unique vampire appearances—and is the first book of its kind to explore this phenomenon to the extent that it truly deserves.

There are many opinions and subsequent interpretations on the Book of Genesis. What did the author of Genesis intend and how can we possibly know, or is the important thing only what the Bible "means to you"? In this book, Dr. Jason Lisle answers questions such as: What are the most common mistakes people make in trying to understand Genesis? What are the necessary rules of biblical interpretation, and what is the proper role of science in understanding the Bible? How does one

identify the various types of biblical literature, and how do the rules of interpretation handle each type – poetic, prophetic, historical, etc.? Is there one correct interpretation of the Bible, or are there many? Discover why alternative positions are rationally impossible. Unlock a powerful understanding of God's Word and equip yourself with a reasoned defense against those who distort the Word of God.
