Teachers College Press  
The untold story of the  
root cause of America's  
education crisis--and the  
seemingly endless cycle  
of multigenerational  
poverty. It was only after  
years within the education  
reform movement that  
Natalie Wexler stumbled

across a hidden  
explanation for our  
country's frustrating lack  
of progress when it comes  
to providing every child  
with a quality education.  
The problem wasn't one of  
the usual scapegoats: lazy  
teachers, shoddy  
facilities, lack of  
accountability. It was  
something no one was  
talking about: the  
elementary school  
curriculum's intense focus  
on decontextualized  
reading comprehension

"skills" at the expense of  
actual knowledge. In the  
tradition of Dale  
Russakoff's *The Prize* and  
Dana Goldstein's *The  
Teacher Wars*, Wexler  
brings together history,  
research, and compelling  
characters to pull back  
the curtain on this  
fundamental flaw in our  
education system--one  
that fellow reformers,  
journalists, and  
policymakers have long  
overlooked, and of which  
the general public,

including many parents, remains unaware. But The Knowledge Gap isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our

neediest children, we have no choice but to pay attention.

"This book will make the case for multiple, diverse kinds of analysis to be taught in the high school English classroom. In addition to showing what written analysis looks like "in the wild," the authors will provide readers with a framework of fundamental analytical skills for instruction. Importantly,

Marchetti and O'Dell will advocate for framing analytical writing around students' (of all levels and abilities) passions and expertise. And just as they do in their previous Heinemann book, *Writing with Mentors*, they will share resources for bringing many different kinds of analytical writing into the classroom"--

 The Handbook for Literary Analysis: How to Evaluate Prose Fiction, Drama, and Poetry reclaims the metaphor, rhetoric, and literary analysis. It has a high view of the reader, the critic, and the student. This Handbook explains and illustrates a wide range of significant literature. Readers explore inspired examples, including biblical examples. Finally, readers read real literary

analytical essays by American high school students. "Dr. Stobaugh's Handbook is an outstanding resource for educators and the students. Over the past several decades, the influence of literature produced by Christians has significantly declined I highly recommend it."  
 Ray Traylor, Homeschool Dad. "This book is appropriate for junior high students through adults."

In the age of Buzzfeeds, hashtags, and Tweets, students are increasingly favoring conversational writing and regarding academic writing as less pertinent in their personal lives, education, and future careers. *Writing and Literature:*

*Composition as Inquiry, Learning, Thinking and Communication* connects students with works and exercises and promotes student learning that is kairotic and constructive. Dr. Tanya Long Bennett, professor of English at the

In this Newbery Honor book classic, young Sarah learns how to be brave even when the world is strange and new. In 1707, young Sarah Noble and her father traveled through the wilderness to build a new home for their family. “Keep up your courage, Sarah Noble,” her mother had said, but Sarah found that it was not always easy to feel brave inside. The dark

woods were full of animals and Indians, too, and Sarah was only eight! The true story of Sarah’s journey is inspiring. And as she cares for her father and befriends her Indian neighbors, she learns that to be afraid and to be brave is the greatest courage of all. The New York Times Book Review described this book as one “to be long remembered for its beautifully written simplicity and dignity.”

Because of the emphasis

placed on nonfiction and informational texts by the Common Core State Standards, literature teachers all over the country are re-evaluating their curriculum and looking for thoughtful ways to incorporate nonfiction into their courses. They are also rethinking their pedagogy as they consider ways to approach texts that are outside the usual fare of secondary literature classrooms. The Third Edition of *Critical Encounters in Secondary English* provides an

integrated approach to incorporating nonfiction and informational texts into the literature classroom. Grounded in solid theory with new field-tested classroom activities, this new edition shows teachers how to adapt practices that have always defined good pedagogy to the new generation of standards for literature instruction. New for the Third Edition: A new preface and new introduction that discusses the CCSS and their implications for literature instruction. Lists

of nonfiction texts at the end of each chapter related to the critical lens described in that chapter. A new chapter on new historicism, a critical lens uniquely suited to interpreting nonfiction and informational sources. New classroom activities created and field-tested specifically for use with nonfiction texts. Additional activities that demonstrate how informational texts can be used in conjunction with traditional literary texts. “What a smart and useful book!” —Mike Rose,

University of California, Los Angeles “[This book] has enriched my understanding both of teaching literature and of how I read. I know of no other book quite like it.” —Michael W. The secondary ELA classroom is an amazingly important place. It's where students transition from "learning to read" to "reading to learn," and they need a tremendous amount of guidance to make that leap. In Big

Ideas for Little Books, authors Shevonne Elliott and Dawn LaFleur present opportunities to help teachers tap into secondary students' childhoods and carry the excitement of story time into more complex concepts. Detailed and engaging, these forty-five lessons use the simple text of children's books to introduce and reinforce the skills required in the secondary ELA classroom. The easy-to-follow lesson plans require little prep work and employ creative methods for helping

students learn about concepts such as argumentation, characterization, dialect, imagery, irony, parody, parallelism, and more. Ideas for extension accompany every lesson and provide opportunities for teachers to differentiate instruction and meet the needs of all learners. Big Ideas for Little Books is an ideal resource for teachers who

want to engage their students' imaginations while teaching literary analysis and cohesive writing skills. It offers a fresh approach to energizing students and generating excitement about learning. *Writing about Literature* Incentive Publications This scarce antiquarian book is a facsimile reprint of the original. Due to its

age, it may contain imperfections such as marks, notations, marginalia and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving, and promoting the world's literature in affordable, high quality, modern editions that are true to the original work.
