SINGH HATFIELD

The Complete Works of Zhuangzi UBC Press

An engaging, informative, and personal exploration of some of the great rivers of North America. The physical nature of rivers has influenced the course of human history and development, whether it be in the prosecution of major conflicts (US Civil War), patterns of development and social change (dams on the Columbia River), the economy (gold rushes, agricultural development), or international relations (US and Mexico and the Colorado River). The centrality of human-river interactions has had great impacts on the biodiversity of rivers (salmon and other threatened species) that have been the focus of historical and current intense conflicts of values (e.g., water in the Sacramento-San Joaquin system and California "water wars" in general). Of the thousands of rivers in North America, 10 are profiled in *Rivers Run Through Us: Mackenzie River Yukon River Fraser River Columbia River Sacramento-San Joaquin River Colorado River Rio Grande/Rio Bravo River Mississippi River Hudson River St. Lawrence River* In this engaging new work, Eric Taylor takes readers on a grand tour of 10 of North America's more important river systems, exploring one fundamental issue for each that illustrates the critical role each particular stream has had -- and will have -- in the human development of North America.

Birds of British Columbia Penguin

APSA's Style Manual for Political Science prepares authors for manuscript submission with sections that include: preparation, writing (punctuation and style), parenthetical citations, notes, tables and figures, and additional resources. The Manual acts as an umbrella submission guide for APSA's four member-wide journals and many section journals.

Geography of British Columbia, 2nd ed. Springer

Featuring over two hundred photographs and illustrations collected from UBC's student archives, this is a visually fascinating presentation and light-hearted narrative of student life at the University of British Columbia from its founding in 1915 until its hundredth year. More than just a year-by-year recap of university life, this book is a lively look at the wider social and cultural trends of the past century. Residence: Vancouver, B.C.

Measuring the Gains from Medical Research [Vancouver], B.C. : The University
 Experimental literature accelerated dramatically in Vancouver in the 1960s as the influence of New American poetics merged with the ideas of Marshall McLuhan. Vancouver poets and artists began thinking about their creative works with new clarity and set about testing and redefining the boundaries of literature. As new gardens in Vancouver explored the limits of text and language, some writers began incorporating collage and concrete poetics into their work while others delved deeper into unsettling, revolutionary, and Surrealist imagery. There was a presumption across the avant-garde communities that radical openness could provoke widespread socio-political change. In other words, the intermedia experimentation and the related destruction of the line between art and society pushed art to the frontlines of a broad socio-political battle of the collective imagination of Vancouver. *Finding Nothing* traces the rise of the radical avant-garde in Vancouver, from the initial salvos of the Tish group, through Blewointment's spatial experiments, to radical Surrealisms and new feminisms. Incorporating images, original texts, and interviews, Gregory Betts shows how the VanGardes signalled a remarkable consciousness of the globalized forces at play in the city, impacting communities, orientations, races, and nations.

The Hundred-Year Trek Harbour Publishing Company

FINALIST FOR 2022 CANADA READS *SHORTLISTED FOR THE 2022 J.W. DAFOE BOOK PRIZE*

SHORTLISTED FOR THE 2022 MANITOBA BOOK AWARDS' MCNALLY ROBINSON BOOK OF THE YEAR AWARD NATIONAL BESTSELLER A gritty and inspiring memoir from renowned Cree environmental

activist Clayton Thomas-Muller, who escaped the world of drugs and gang life to take up the warrior's fight against the assault on Indigenous peoples' lands—and eventually the warrior's spirituality. There have been many Clayton Thomas-Mullers: The child who played with toy planes as an escape from domestic and sexual abuse, enduring the intergenerational trauma of Canada's residential school system; the angry youngster who defended himself with fists and sharp wit against racism and violence, at school and on the streets of Winnipeg and small-town British Columbia; the tough teenager who, at 17, managed a drug house run by members of his family, and slipped in and out of juvie, operating in a world of violence and pain. But behind them all, there was another Clayton: the one who remained immersed in Cree spirituality, and who embraced the rituals and ways of thinking vital to his heritage; the one who reconnected with the land during summer visits to his great-grandparents' trapline in his home territory of Pukatawagan in northern Manitoba. And it's this version of Clayton that ultimately triumphed, finding healing by directly facing the trauma that he shares with Indigenous peoples around the world. Now a leading organizer and activist on the frontlines of environmental resistance, Clayton brings his warrior spirit to the fight against the ongoing assault on Indigenous peoples' lands by Big Oil. Tying together personal stories of survival that bring the realities of the First Nations of this land into sharp focus, and lessons learned from a career as a frontline activist committed to addressing environmental injustice at a global scale, Thomas-Muller offers a narrative and vision of healing and responsibility. *Teaching Learning and New Technologies in Higher Education* University of Chicago Press
 A unique field guide brimming with detailed descriptions, vibrant photos, and fascinating facts about British Columbia's most common and most distinctive mushroom species.

Scrapbook for a Golden Anniversary Columbia University Press

History in BC grows profusely and luxuriantly, but with odd undergrowth," observed historian J.M.S. Careless many years ago. This claim is fully borne out by this impressive anthology of some of the province's most distinguished historians, geographers, and writers gleaned from over forty years of British Columbia's leading scholarly journal, *BC Studies*. This collection includes fascinating articles on the Fraser Canyon by Cole Harris; on Fort Simpson, Metlakatla, and Port Essington by Daniel Clayton; on Victoria's early Chinese community by Patrick Dunae and others; on the eviction of Kitsilano and Squamish people from Vancouver and Stanley Park by Jean Barman; on early home design styles in Vancouver by Deryck Holdsworth; on the failed utopias of Wallachin and Sointula by Nelson Riis and Mikko Saikku; on life in a 1970s logging camp by Peter Harrison; on fly-fishing and dispossession at Penask Lake by Michael Thoms; and on the perennial lonesome prospector by Megan Davies. The overarching theme is provided by George Bowering in his classic essay, "Home Away," concerning the search for a home on the West Coast—a new one for settlers and an old one for indigenous peoples.

Plants of Western Oregon, Washington, and British Columbia Finding Nothing

Norma Fontaine lives in a world of handy tips and sensible advice. Whether it's choosing the right girdle or honing her feminine allure, she measures life by the standards set in women's magazines. But Norma discovers that the real world is less delightful—and more sinister—than the one portrayed in the glossies. When dark secrets threaten her brother's blossoming romance, Norma must decide whether to sacrifice life in a woman's world for the sake of her brother's happiness. As her decision is slowly revealed, readers realize that, like life in the magazines, Norma isn't quite what she seems. A stunning visual tour de force painstakingly assembled from 40,000 fragments of text snipped from women's magazines, *Woman's World* is a powerful reflection on society's definition of what it means to be a woman.

Mushrooms of British Columbia Heritage House

Captain Cook Rediscovered is the first modern study to frame Captain James Cook's career from a North American vantage. Although Cook is inextricably linked to the South Pacific in the popular imagination, his crowning navigational and scientific achievements took place in the polar regions.

David L. Nicandri acknowledges the cartographic accomplishments of the Australasian first voyage but focuses on the second- and third-voyage discovery missions in the extreme latitudes, where Cook pioneered the science of iceberg and icepack formation. A truly modern appraisal of early polar science, *Captain Cook Rediscovered* resonates in the climate change era.

Style Manual for Political Science Little, Brown Spark

This original work makes unprecedented use of some of the most important research to date in plant ecology. It is a guide for assessing site quality, that is, the climate and soil of particular forest and non-forest ecosystems. Foresters have long been interested in using plants as indicators in predicting the growth performance of reforestation sites, but the data have not been readily available. *Indicator Plants of Coastal British Columbia* fully discusses how indicator plants are recognized and demonstrates how indicator plants can be used in site diagnosis. The book presents colour illustrations and descriptions of 419 selected vascular plants, bryophytes and lichens of coastal British Columbia. Indicators with similar values are grouped into indicator species groups which are used to evaluate site quality. These data are supplemented by information on geographic distribution, life-form, shade tolerance, and other ecological characteristics of the species. Three methods are given on how to use indicator plants for the purpose of site diagnosis. *Indicator Plants of Coastal British Columbia* summarizes original research in a format which both students and practitioners will find easy to use.

Chinatown Ghosts UBC Press

"Forall x is an introduction to sentential logic and first-order predicate logic with identity, logical systems that significantly influenced twentieth-century analytic philosophy. After working through the material in this book, a student should be able to understand most quantified expressions that arise in their philosophical reading. This book treats symbolization, formal semantics, and proof theory for each language. The discussion of formal semantics is more direct than in many introductory texts. Although forall x does not contain proofs of soundness and completeness, it lays the groundwork for understanding why these are things that need to be proven. Throughout the book, I have tried to highlight the choices involved in developing sentential and predicate logic. Students should realize that these two are not the only possible formal languages. In translating to a formal language, we simplify and profit in clarity. The simplification comes at a cost, and different formal languages are suited to translating different parts of natural language. The book is designed to provide a semester's worth of material for an introductory college course. It would be possible to use the book only for sentential logic, by skipping chapters 4-5 and parts of chapter 6"--Open Textbook Library.

The Lillooet Language Gordon Soules Book Pub

This book is the first complete descriptive grammar of Lillooet, an Indigenous Canadian language spoken in British Columbia, now threatened with extinction. The author discusses three major aspects of the language sound system, word structure, and syntax in great detail. The classical structuralism method of analysis, as developed in North America by Leonard Bloomfield and his followers, is used to look at every aspect of Lillooet in terms of its function and position within the whole structure of the language. Van Eijk explains terms and procedures in order to make the book accessible not only to the advanced linguist, but also to the undergraduate student with basic linguistic training. Written with great clarity and well organized, the book is illustrated with copious examples drawn from many years of fieldwork in St't'imc territory.

Woman's World Springer Nature

This manual provides illustrated keys to all leaf and scale lichens known to occur in British Columbia. In total, 327 species are included, while 19 taxa are excluded from earlier accounts of the flora. Accompanying the keys are approximately 350 line drawings. The manual briefly summarizes the ecology, distribution, and frequency status of the province's foliose and squamulose lichens. Each genus account provides a common name, a short description, pertinent references, notes on the derivation of the common name, and notes on global status and distribution, taxonomy, chemistry, and/or similar genera. Each species account provides species and author citation, distribution maps, common names, habit, and lichen distribution in B.C.

New York : W.J. Watt

The First Nations of British Columbia, Second Edition, is a concise and accessible overview of First Nations peoples, cultures, and issues in the province. Robert Muckle familiarizes readers with the history, diversity, and complexity of First Nations to provide a context for contemporary concerns and initiatives. This fully revised edition explains the current treaty negotiation process and provides highlights of agreements between First Nations and governments. It also details past and present government policies, identifies the territories of major groups in the province, gives information on populations, reserves, bands, and language groups, and summarizes archaeological, ethnographic, historical, legal, and political issues.

Captain Cook Rediscovered arsenal pulp press

Jim Wong-Chu was the founder of the Asian Canadian Writers' Workshop which spawned many literary stars, including Madeleine Thien, Denise Chong, and Wayson Choy. When he passed away in 2017, at the age of sixty-eight, he left not only a void in the Asian Canadian writing and publishing community but also a legacy of his own work that was never fully recognized. Jim's poems speak eloquently to the Chinese experience in North America, both historical and present-day. This book includes Jim's evocative Chinatown photographs, revealing the soul of a community threatened by gentrification and displacement. This publication meets the EPUB Accessibility requirements and it also meets the Web Content Accessibility Guidelines (WCAG-AA). It is screen-reader friendly and is accessible to persons with disabilities. A book with many images, which is defined with accessible structural markup. This book contains various accessibility features such as alternative text for images, table of contents, page-list, landmark, reading order and semantic structure.

The Sacred Headwaters Ministry of Forests Research Program

Only by inhabiting Dao (the Way of Nature) and dwelling in its unity can humankind achieve true happiness and freedom, in both life and death. This is Daoist philosophy's central tenet, espoused by the person—or group of people—known as Zhuangzi (369?-286? B.C.E.) in a text by the same name. To be free, individuals must discard rigid distinctions between good and bad, right and wrong, and follow a course of action not motivated by gain or striving. When one ceases to judge events as good or bad, man-made suffering disappears and natural suffering is embraced as part of life. Zhuangzi elucidates this mystical philosophy through humor, parable, and anecdote, deploying non sequitur and even nonsense to illuminate a truth beyond the boundaries of ordinary logic. Boldly imaginative and inventively worded, the Zhuangzi floats free of its historical period and society, addressing the spiritual nourishment of all people across time. One of the most justly celebrated texts of the Chinese tradition, the Zhuangzi is read by thousands of English-language scholars each year, yet only in the Wade-Giles romanization. Burton Watson's pinyin romanization brings the text in line with how Chinese scholars, and an increasing number of other scholars, read it.

Open and Distance Education in Australia, Europe and the Americas Timber Press (OR)

Descriptions, maps, illustrations and tables of British Columbia's biogeoclimatic zones, as well as an overview of how the biogeoclimatic zone system was developed.

Ecosystems of British Columbia National Geographic Books

Why is British Columbia unique within Canada? What physical processes have made this province so rugged and produced such remarkable variation in climate and vegetation? Why did non-Natives come to British Columbia, and what impact did they have on First Nations? Why did so many Asian immigrants come to this province and then leave for other parts of Canada? How were resources developed in the past and how are those resources developed today? Geography of British Columbia discusses these and many other aspects of the growth of this distinctive province. Brett McGillivray focuses first on the combination of physical processes that produced a spectacular variety of mountains, rivers, lakes, islands, fjords, forests, and minerals, explaining the forces that created the province and the natural hazards that can reshape it. A concise examination of B.C. historical geography follows, covering First Nations ways of life, colonization, Asian immigration, and the sad history of institutionalized racism. The second half of the book contains a detailed description of the economic geography of the province, with chapters on forestry, the salmon fishery, metal mining, energy supply and demand, agriculture, water, and the tourism industry. It addresses the present-day issues of urbanization, economic development, and resource management, providing a thorough background to these topics and suggesting what the future might hold. This up-to-date and comprehensive exploration of the rich historical geography and development of British Columbia will be welcomed by teachers, students, scholars, and everyone with an interest in the province.

Cultural Psychology State University of New York Oer Services

More species of birds breed in British Columbia annually than anywhere else in Canada. Additionally, hundreds of migratory birds spend a portion of the year here, making BC a birdwatcher's paradise. It doesn't matter if you're a gung-ho, out-in-the-field birdwatcher or if you enjoy winged friends from the serenity of your back porch, *Birds of British Columbia* is an easy way to get the best views of more than 100 of the different birds in this province. From the rare Marbled Murrelet to the common Steller's Jay, ferocious falcons to timid towhees, Glenn Bartley has captured the beauty of BC's feathered fliers in this stunning collection of photographs. Whether you're looking for an elusive Boreal Owl or simply want to revel in the magnificence of a swooping Peregrine Falcon, Bartley's incredible photographs of birds in their natural habitats will make even the ubiquitous gull look extraordinary.

Life in the City of Dirty Water UBC Press

The most contemporary and relevant introduction to the field, *Cultural Psychology*, Fourth Edition, is unmatched in both its presentation of current, global experimental research and its focus on helping students to think like cultural psychologists.
