Science K and Up Kumon Publishing North America

Our Sticker Activity Books use engaging and fun activities to introduce children to concepts in science and geography. Each activity is carefully matched with learning goals to promote both enjoyment and understanding. Through stickering, coloring, mazes, and more, children develop a love of learning about their world.

**Grade 4 Decimals and Fractions** Penguin

The Tiger Math series was designed based on my three beliefs toward elementary math education.

1. It is extremely important to build foundation of math by acquiring a sense of numbers and mastering the four operation skills in terms of addition, subtraction, multiplication, and division. 2. In math, one should go through all steps in order, step by step, and cannot jump from level 1 to 3. 3. Practice math every day, even if only for 10 minutes. The goals of Tiger Math Level D - 4 are 1) to practice changing addition to multiplication and 2) to practice and memorize multiplication of 1 digit number by 1 digit number.

*Are You Ready for Kindergarten Pre School Skills* Kumon Reading Workbooks

Designed for children who need a boost improving their basic math skills as well as for children who are ready to take on higher level math concepts. Will cover early Geometry topics such as calculating area, defining shapes, and measuring angles. Grades 3-6.

Maths Olympiad ( Beginner P3 & P4) Unleash The Maths Olympian In You! The Perfect Score Project

What if everything you know about raw talent, hard work, and great performance is wrong? Few, if any, of the people around you are truly great at what they do. But why aren't they? Why don't they manage businesses like Jack Welch or Andy Grove, play golf like Tiger Woods or play the violin like Itzhak Perlman? Asked to explain why a few people truly excel, most of us offer one of two answers: hard work or a natural talent. However, scientific evidence doesn't support the notion that specific natural talents make great performers. In one of the most popular Fortune articles in years, Geoff Colvin offered new evidence that top performers in any field - from Tiger Woods and Winston Churchill to Warren Buffett and Jack Welch - are not determined by their inborn talents. Greatness doesn't come from DNA but from practice and perseverance honed over decades. And not just plain old hard work, but a very specific kind of work. The key is how you practice, how you analyze the results of your progress and learn from your mistakes, that enables you to achieve greatness. Now Colvin has expanded his article with much more scientific background and real-life examples. He shows that the skills of business - negotiating deals, evaluating financial statements, and all the rest - obey the principles that lead to greatness, so that anyone can get better at them with the right kind of effort. Even the hardest decisions and interactions can be systematically improved. This new mind-set, combined with Colvin's practical advice, will change the way you think about your job and career - and will inspire you to achieve more in all you do.

Grade 5 Reading Kumon Publishing North America

The fun, engaging program that will help your child master the subtraction facts once and for all—without spending hours and hours drilling flash cards! Subtraction Facts That Stick will guide you, step-by- step, as you teach your child to understand and memorize the subtraction facts, from 1 - 1 through 9 - 9. Hands-on activities, fun games your child will love, and simple practice pages help young students remember the subtraction facts for good. In 15 minutes per day (perfect for after school, or as a supplement to a homeschool math curriculum) your child will master the subtraction facts, gain a greater understanding of how math works, and develop greater confidence, in just six weeks! Mastery of the math facts is the foundation for all future math learning. Lay that foundation now, and make it solid, with Subtraction Facts That Stick!
