You Can Do It! is the vision of Lauren Catuzzi Grandcolas, a heroine of United Flight 93 and a woman who was an inspiration to all who knew her. Lauren's dream was to create the ultimate self-empowering resource, a book to help women of all ages realize their dreams. Inspired by her beloved Girl Scout badges, nurtured to publication by her family and friends led by Lauren's two sisters, Vaughn and Dara You Can Do It! is the merit badge handbook for every grown-up girl who's said, "I wish I could..." Jam-packed with practical advice, here is step-by-step instruction and kick-in-the-pants encouragement for achieving 60 exciting badge activities. Start your own business, go back to school, speak in public, play a musical instrument, fix the car whatever the ambition, each activity features a female expert to mentor the reader and guide her to success with clear how-to, practical resources, and the wisdom of experience. Learn a new language with Susan Carvalho of Middlebury College, take a great photograph with Lauren Greenfield, climb a mountain with Annapurna expedition leader Arlene Blum. These 512 can-do pages are about dusting off fantasies, overcoming fears, and achieving long-held desires. And to top it all off, the book includes 60 colorful badge stickers a fun reward for goals accomplished. With its warm and encouraging message, You Can Do It! will help women everywhere discover that, yes, they can! A portion of the proceeds from You Can Do It! will go to the Lauren Catuzzi Grandcolas Foundation, which supports charitable causes and scholarships for women.

Rifle Shooting Storey Publishing

A reprint of the first Boy Scouts handbook from 1911 covers woodcraft, camping, signs and signaling, first aid, chivalry, and games.

The Greatest: Muhammad Ali Del Rey

Don't miss this timely contemporary young adult novel from Alex Flinn, the #1 New York Times bestselling author of *Beastly*, about a teenage boy's struggle to break free from the cycle of abuse. "Gripping." —Publishers Weekly Intelligent, popular, handsome, and wealthy, sixteen-year-old Nick Andreas is pretty much perfect—on the outside, at least. What no one knows—not even his best friend—is the terror and anger that Nick faces every time he is alone with his father. Then he and Caitlin fall in love, and Nick thinks his problems are over. Caitlin is the one person he can confide in, the only person who understands him. But when Nick's anger and jealousy overtake him, things begin to spiral out of control and Nick realizes that he's more his father's son than he wants to be. Now Nick must confront his inner demons to stop the history of violence from repeating itself. Outlines requirements for pursuing a merit badge in music and bugling.

Spice Up Your Speech!

A comprehensive account of how energy has shaped society throughout history, from pre-agricultural foraging societies through today's fossil fuel-driven civilization. "I wait for new Smil books the way some people wait for the next 'Star Wars' movie. In

his latest book, *Energy and Civilization: A History*, he goes deep and broad to explain how innovations in humans' ability to turn energy into heat, light, and motion have been a driving force behind our cultural and economic progress over the past 10,000 years. —Bill Gates, *Gates Notes*, Best Books of the Year Energy is the only universal currency; it is necessary for getting anything done. The conversion of energy on Earth ranges from terra-forming forces of plate tectonics to cumulative erosive effects of raindrops. Life on Earth depends on the photosynthetic conversion of solar energy into plant biomass. Humans have come to rely on many more energy flows—ranging from fossil fuels to photovoltaic generation of electricity—for their civilized existence. In this monumental history, Vaclav Smil provides a comprehensive account of how energy has shaped society, from pre-agricultural foraging societies through today's fossil fuel-driven civilization. Humans are the only species that can systematically harness energies outside their bodies, using the power of their intellect and an enormous variety of artifacts—from the simplest tools to internal combustion engines and nuclear reactors. The epochal transition to fossil fuels affected everything: agriculture, industry, transportation, weapons, communication, economics, urbanization, quality of life, politics, and the environment. Smil describes humanity's energy eras in panoramic and interdisciplinary fashion, offering readers a magisterial overview. This book is an extensively updated and expanded version of Smil's *Energy in World History* (1994). Smil has incorporated an enormous amount of new material, reflecting the dramatic developments in energy studies over the last two decades and his own research over that time.

The Yellow Kid in McFadden's Flats

TINKERACTIVE WORKBOOKS: 2ND GRADE ENGLISH is part of an exciting workbook series that blends traditional exercises with hands-on activities. Tinker, make, and engineer to learn through play! With TINKERACTIVE WORKBOOKS, learning leaps off the page and into the real world. Start with interactive and entertaining exercises that cover the essential second grade English skills. Then, apply what you've learned with exciting hands-on tinkering, making, and engineering activities that utilize

only common household materials. Plus, the charming cast of characters, the MotMots, guide kids through every new concept with cheer and humor. Once you've completed the workbook, unbox a collectible magnet badge hidden in the back cover. Vetted by award-winning educators, TINKERACTIVE WORKBOOKS are designed for all learners. They build your child's fundamental English skills AND inspire them to try new things, discover new skills, and imagine new possibilities. Illustrations by Chad Thomas

Drafting
Greg Bear's Nebula Award-winning novel, *Darwin's Radio*, painted a chilling portrait of humankind on the threshold of a radical leap in evolution—one that would alter our species forever. Now Bear continues his provocative tale of the human race confronted by an uncertain future, where "survival of the fittest" takes on astonishing and controversial new dimensions. Eleven years have passed since SHEVA, an ancient retrovirus, was discovered in human DNA—a retrovirus that caused mutations in the human genome and heralded the arrival of a new wave of genetically enhanced humans. Now these changed children have reached adolescence . . . and face a world that is outraged about their very existence. For these special youths, possessed of remarkable, advanced traits that mark a major turning point in human development, are also ticking time bombs harboring hosts of viruses that could exterminate the "old" human race. Fear and hatred of the virus children have made them a persecuted underclass, quarantined by the government in special "schools," targeted by federally sanctioned bounty hunters, and demonized by hysterical segments of the population. But pockets of resistance have sprung up among those opposed to treating the children like dangerous diseases—and who fear the worst if the government's draconian measures are carried to their extreme. Scientists Kaye Lang and Mitch Rafelson are part of this small but determined minority. Once at the forefront of the discovery and study of the SHEVA outbreak, they now live as virtual exiles in the Virginia suburbs with their daughter, Stella—a bright, inquisitive virus child who is quickly maturing, straining to break free of the protective world her parents have built around her, and eager to seek out others of her kind. But for all their precautions, Kaye, Mitch, and Stella have not slipped below the government's radar. The agencies fanatically devoted to segregating and controlling the new-breed children monitor their every move—watching and

waiting for the opportunity to strike the next blow in their escalating war to preserve “humankind” at any cost.
