This text focuses
student-learning on the

key communication
competencies
recommended by the
National
Communication
Association. With
applied examples and
a vibrant and engaging
design, this text covers
all the expected topics

in an introductory course (foundations of communication, interpersonal communication, small group communication, and public speaking - plus a special appendix on interviewing). Scenarios begin each chapter with a problem to which students can relate and then solve as they learn about the concepts discussed in each chapter. A concentrated focus on careers in communication, highlighted in a two-page spread near the end of each chapter, brings home the relevance of communication outside the classroom and helps students learn more about how studying communication can help them throughout their lives. Additional

emphasis on topics such as ethics, culture, gender, and technology is found throughout the text. *Wooing and Winning Business* Ten Speed Press

The interior designers of tomorrow require a professional practice text that is contemporary and innovative enough to prepare them for the rapidly evolving landscape of the 21st century workplace. *Professional Practice for Interior Designers in the Global Marketplace* arms students of the Millennial Generation with the know-how they'll need to launch and evolve their careers. It emphasizes the essential skills and knowledge required to work in a firm as an entry-level designer,

while providing an overview of what is involved in starting, owning, and operating an interior design business. Although rooted in fundamentals, the book incorporates up-to-the-minute developments including globalization, changing demographics, the rise of networking technologies, sustainable design, social responsibility, and global economics. Simon and Schuster Learning professionals have a wide variety of options when it comes to using learning tools to get the learners' interest, expand concepts, clarify relationships, model tasks or behaviors, stay on track, and improve retention and application. But what

are all those options and how does the learning professional select the appropriate one for his or her needs? This issue provides descriptions of 11 learning tools organized into three categories: for use in training rooms, for use in and out of training rooms, and for use out of training rooms. It describes the advantages and disadvantages of each tool along with basic presentation and preparation tips.

[Presentation Zen](#) Taylor & Francis Paul Iles provides a distinctive approach to managing staff selection and assessment in organizations. He discusses not only the

dominant psychometric model but also draws upon perspectives from strategic management theory, social psychology, and critical theory. This is an accessible text which discusses developments both in the UK and internationally, provides specific organizational case studies, and describes recent research findings and their implications for organizational practice. It locates techniques and procedures in the contexts of corporate strategy, structure and culture. It shows how organizations have sought to use assessment strategically in the search for competitive advantage: recruiting, selecting, appraising and developing staff in

order to bring about organizational and cultural change. The book concludes by applying its frameworks to an area of key significance : the identification, assessment and development of managerial competence.
