Biting the Error

Encounter Books

Preventing humanitarian atrocities is becoming as important for the United Nations as dealing with inter-state war. In this book, Ramesh Thakur examines the transformation in UN operations, analysing its changing role and structure. He asks why, when and how force may be used and argues that the growing gulf between legality and legitimacy is evidence of an eroded sense of international community. He considers the tension between the US, with its capacity to use force and project power, and the UN, as the centre of the international law enforcement system. He asserts the central importance of the rule of law and of a rules-based order focused on the UN as the foundation of a civilised system of international relations. This book will be of interest to students of the UN and international organisations in politics, law and international relations departments, as

well as policymakers in the UN and other NGOs.

Virgil became a school author in his own lifetime and the centre of the Western canon for the next 1800 years, exerting a major influence on European literature, art, and politics. This Companion is designed as an indispensable guide for anyone seeking a fuller understanding of an author critical to so many disciplines. It consists of essays by seventeen scholars from Britain, the USA, Ireland and Italy which offer a range of different perspectives both traditional and innovative on Virgil's works, and a renewed sense of why Virgil matters today. The Companion is divided into four main sections, focussing on reception, genre, context, and form. This ground-breaking book not only provides a wealth of material for an informed reading but also offers sophisticated insights which point to the shape of Virgilian

scholarship and criticism to come.

"The prevailing consumerism in Chinese cyberspace is a growing element of Chinese culture and an important aspect of this book. Chinese bloggers, who have strongly embraced consumerism and tend to be apathetic about politics, have nonetheless demonstrated political passion over issues such as the Western media's negative coverage of China. In this book, Jiang focuses upon this passion - Chinese bloggers' angry reactions to the Western media's coverage of censorship issues in current China - in order to examine China's current potential for political reform. A central focus of this book, then, is the specific issue of censorship and how to interpret the Chinese characteristics of it as a mechanism currently used to maintain state control."--Cover description.

Whatever his ratings, Obama remains personally popular, widely

acknowledged for his soaring oratory. His words were one of the lasting legacies of his presidential campaign and are proving to be among his most effective governing weapons. In *Power in Words*, distinguished historian and civil rights activist Mary Frances Berry and former presidential speechwriter Josh Gottheimer introduce Obama's most memorable speeches, from his October 2002 speech against the war in Iraq and his November 2008 election-night victory speech to "A More Perfect Union," his March 2008 response to the Reverend Wright controversy, and lesser-known but revealing speeches, such as one given in Nairobi, Kenya, in August 2006. For each speech, Berry and Gottheimer add a rich introduction that includes political analysis, provides insight and historical context, and features commentary straight from the speechwriters themselves—including Jon Favreau, Obama's chief speechwriter, and several other Obama campaign writers. Compelling and enduring, *Power in Words* delivers the behind-the-scenes account of Obama's rhetorical legacy and is a collection to

What is the best way to tell a story? In this anthology, the first-ever collection of essays by innovative, cutting-edge writers on the theme of narration, forty of the continent's top experimental writers describe their engagement with language, storytelling and the world. The anthology includes renowned writers like Kathy Acker, Dennis Cooper, Nicole Brossard, Daphne Marlatt, Lydia Davis and Kevin Killian, writers who have spent years pondering the meaning of storytelling

and how storytelling functions in our culture, as well as presenting a new generation of brilliant thinkers and writers, like Christian Bök, Corey Frost, Derek McCormack and Lisa Robertson. *Contemporizing the friendly anecdotal style of Montaigne* and written by daring writers of different ages, of different origins, from many different regions of the continent, from Mexico to Montreal, these essays run the gamut of mirth, prose poetry, tall tales and playful explorations of reader/writer dynamics. They discuss aesthetics founded on new explorations in the field of narrative, the mystery that is the body, questions of how representation may be torqued to deal with gender and sexuality, the experience of marginalized people, the negotiation between different orders of time, the 'performance' of outlaw subject matter. *Brave, energetic and fresh, Biting the Error* tells a whole new story about narrative. *Biting the Error* is edited by Mary Burger, Robert Glück, Camille Roy and Gail Scott, the co-founders of the *Narrativity Website Magazine*, based at the Poetry Center, San

Francisco State University. *Vanity Fair's Schools For Scandal* Cambridge University Press

The companion volume to *12 Rules for Life* offers further guidance on the perilous path of modern life. In *12 Rules for Life*, clinical psychologist and celebrated professor at Harvard and the University of Toronto Dr. Jordan B. Peterson helped millions of readers impose order on the chaos of their lives. Now, in this bold sequel, Peterson delivers twelve more lifesaving principles for resisting the exhausting toll that our desire to order the world inevitably takes. In a time when the human will increasingly imposes itself over every sphere of life—from our social structures to our emotional states—Peterson warns that too much security is dangerous. What's more, he offers strategies for overcoming the cultural, scientific, and psychological forces causing us to tend toward tyranny, and teaches us how to rely instead on our instinct to find meaning and purpose, even—and especially—when we find ourselves powerless. While chaos, in excess, threatens us with

instability and anxiety, unchecked order can petrify us into submission. Beyond Order provides a call to balance these two fundamental principles of reality itself, and guides us along the straight and narrow path that divides them.

Progress. It is one of the animating concepts of the modern era. From the Enlightenment onwards, the West has had an enduring belief that through the evolution of institutions, innovations, and ideas, the human condition is improving. This process is supposedly accelerating as new technologies, individual freedoms, and the spread of global norms empower individuals and societies around the world. But is progress inevitable? Its critics argue that human civilization has become different, not better, over the last two and a half centuries. What is seen as a breakthrough or innovation in one period becomes a setback or limitation in another. In short, progress is an ideology not a fact; a way of thinking about the world as opposed to a

description of reality. In the seventeenth semi-annual Munk Debates, which was held in Toronto on November 6, 2015, pioneering cognitive scientist Steven Pinker and bestselling author Matt Ridley squared off against noted philosopher Alain de Botton and bestselling author Malcolm Gladwell to debate whether humankind's best days lie ahead.

Drawing on a decade of experience battling for freedom of speech on campus, First Amendment lawyer Greg Lukianoff reveals how

higher education fails to teach students to become critical thinkers: by stifling open debate, our campuses are supercharging ideological divisions, promoting groupthink, and encouraging an unscholarly certainty about complex issues. Lukianoff walks readers through the life of a modern-day college student, from orientation to the end of freshman year. Through this lens, he describes startling violations of free speech rights: a student in Indiana punished for publicly reading a book, a student in Georgia expelled for a pro-environment collage he posted on Facebook, students at Yale banned from putting an F. Scott Fitzgerald quote on a T shirt, and students across the country corralled into tiny "free speech zones" when they wanted to express their views. But Lukianoff goes further, demonstrating how this culture of censorship is bleeding into the larger society. As he explores public controversies involving Juan Williams, Rush Limbaugh, Bill Maher, Richard Dawkins, Larry Summers—even Dave Barry and Jon Stewart—Lukianoff paints

a stark picture of our ability as a nation to discuss important issues rationally. **Unlearning Liberty: Campus Censorship and the End of American Debate** illuminates how intolerance for dissent and debate on today's campus threatens the freedom of every citizen and makes us all just a little bit dumber.

Renowned psychologist Jordan B. Peterson's answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition with the stunning revelations of cutting-edge scientific research. Humorous, surprising and informative, Dr. Peterson tells us why skateboarding boys and girls must be left alone, what terrible fate awaits those who criticize too

easily, and why you should always pet a cat when you meet one on the street. What does the nervous system of the lowly lobster have to tell us about standing up straight (with our shoulders back) and about success in life? Why did ancient Egyptians worship the capacity to pay careful attention as the highest of gods? What dreadful paths do people tread when they become resentful, arrogant and vengeful? Dr. Peterson journeys broadly, discussing discipline, freedom, adventure and responsibility, distilling the world's wisdom into 12 practical and profound rules for life. **12 Rules for Life** shatters the modern commonplaces of science, faith and human nature, while transforming and ennobling the mind and spirit of its readers.

The Munk Debates is Canada's premier international debate series, a highly anticipated cultural event and feast of ideas. Launched in 2008 by philanthropists Peter and Melanie Munk, these debates bring together some of the world's greatest thinkers to discuss the most pressing

political, social, and cultural issues that are shaping the course of world events. This volume includes an Introduction by Peter Munk and the first five debates in the series: British historian and bestselling author Niall Ferguson, top-ranking American diplomat Richard Holbrooke, Washington Post columnist Charles Krauthammer, and human rights scholar and Pulitzer Prize-winning author Samantha Power discuss global security and the 2008 U.S. presidential election, Former U.S. Ambassador to the United Nations John Bolton, former Foreign Minister of the Australian Parliament and President and Chief Executive of the International Crisis Group Gareth Evans, actor and humanitarian Mia Farrow, and former Chief of the Defence Staff of the Canadian Forces General Rick Hillier debate the pros and cons of humanitarian intervention. Professor of Economics Paul Collier, economist Hernando De Soto, former UN Secretary-General Stephen Lewis, and bestselling author of *Dead Aid* Dambisa Moyo explore the opportunities and hazards of foreign

aid. Former British politician and bestselling author Lord Nigel Lawson, adjunct professor at the Copenhagen Business School and bestselling author Bjørn Lomborg, environmental activist and Leader of the Green Party of Canada Elizabeth May, and journalist and bestselling author George Monbiot tackle one of the great public policy questions of our time: how should the world respond to climate change? Intelligent, informative, and entertaining, *The Munk Debates* is a lively forum of ideas and opinions that aims to reinvigorate public discourse and civic dialogue, and captures the prevailing moods, clashing opinions, and most imperative issues of our time.

Political Correctness Gone Mad? *Munk Debates Semiotics* is the theory of signs, and reading signs is a part of everyday life: from road signs that point to a destination, to smoke that warns of fire, to the symbols buried within art and literature. Semiotic theory can, however, appear mysterious and impenetrable. This introductory book decodes that mystery using visual examples instead of abstract theory.

This new edition features an expanded introduction that carefully and clearly presents the world of semiotics before leading into the book's 76 sections of key semiotic concepts. Each short section begins with a single image or sign, accompanied by a question inviting us to interpret what we are seeing. Turning the page, we can compare our response with the theory behind the sign, and in this way, actively engage in creative thinking. A fascinating read, this book provides practical examples of how meaning is made in contemporary culture.

The twenty-fourth semi-annual Munk Debate, held on May 9, 2019, pits former Assistant to the President for National Security Affairs H. R. McMaster and Director for Chinese Strategy at the D.C.-based Hudson Institute think tank Michael Pillsbury against former President of the United Nations Security Council Kishore Mahbubani and president of one of China's top independent think tanks, the Center for China Globalization, Huiyao Wang to debate the threat

of China to the liberal international order. Increasingly in the West, China is being characterized as a threat to the liberal international order, one that must be overcome through economic, political, technological, and even military means. For those who believe that the policies of the Chinese Communist Party pose a threat to free and open societies, the U.S. and like-minded nations must band together to preserve a rules-based international order. For others, this approach spells disaster; it ignores the history and dynamics propelling China's rise to superpower status. Rather than threatening the post-war order, China is its best, and maybe only, guarantor in an era of declining U.S. leadership, increased regional instability, and slowing global growth.

Intellectual juggernaut and staunch atheist Christopher Hitchens goes head-to-head with former British Prime Minister Tony Blair, one of the Western world's most openly devout political leaders, on the highly charged topic of religion.

Few world leaders have had a greater hand in shaping current events than Blair; few writers have been more outspoken and polarizing than Hitchens. In this edition of The Munk Debates -- Canada's premier international debate series -- Hitchens and Blair square off on the contentious questions

that continue to dog the topic of religion in our globalized world: How does faith influence our actions? What is the role of people of faith in the public sphere? Is religious doctrine rigid, or should we allow for flexibility in our interpretations? This exclusive debate, which played out to a sold-out

audience, is now available in print form, along with candid interviews with Hitchens and Blair. Sharp, provocative, and thoroughly engrossing, Hitchens vs. Blair is a rigorous and electrifying intellectual sparring match on the oldest question: Is religion a force for good in the world?
