*Principles of Accounting Volume 1 - Financial Accounting*  
Princeton Review

While accounting and audit functions are significantly regulated and standardized in conventional financial industries and activities, through the implementation of International Accounting Standards, and International Financial Reporting Standards, as well as other international, regional, and local regulations, this is not the case for Islamic financial organizations. Rather than having their own set of comprehensive accounting or auditing standards or policies, these are based, in some cases, on the Accounting and Auditing Organization for Islamic Financial Institutions (AAIOFI), the Islamic Financial Services Board (IFSB)'s standards and Shari'ah based local policies. This book is a timely and comprehensive overview of accounting and auditing standards within the doctrine of Shari'ah. It offers a significant contribution to the field and a wealth of technical know-how. It analyzes Islamic accounting and auditing both in theory and practice and from a distinctly international perspective. The chapters are arranged in a systematic and logical way making it easily accessible and engaging. The book evaluates the existing standards and widens the scope of the discourse to include Maqasid al-Shari'ah, Islamic accounting and audit models and standards, as well as, offering practical policy recommendations. The author presents a Shari'ah justified solution to Islamic

Accounting and Audit and offers guidance on overcoming the challenges to implementing Islamic Accounting and Auditing Standards. The book is a unique and exhaustive guide and, as such, will be an invaluable resource for academics, researchers, students, policymakers, as well as, practitioners in accounting and auditing firms and financial institutions.
