The loss of hearing - be it gradual or acute, mild or severe, present since birth or acquired in older age - can have significant effects on one's communication abilities, quality of life, social participation, and health. Despite this, many people with hearing loss do not seek or receive hearing health care. The reasons are numerous, complex, and often interconnected. For some, hearing health care is not affordable. For others, the appropriate services are difficult to access, or individuals do not know how or where to access them. Others may not want to deal with the stigma that they and society may associate with needing hearing health care and obtaining that care. Still others do not recognize they need hearing health care, as hearing loss is an invisible health condition that often worsens gradually over time. In the United States, an estimated 30 million individuals (12.7 percent of Americans ages 12 years or older) have hearing loss. Globally, hearing loss has been identified as the fifth leading cause of years lived with disability. Successful hearing health care enables individuals with hearing loss to have the freedom to communicate in their environments in ways that are culturally appropriate and that preserve their dignity and function. *Hearing Health Care for Adults* focuses on improving the accessibility and affordability of hearing health care for adults of all ages. This study examines the hearing health care system, with a focus on non-surgical technologies and services, and offers recommendations for improving access to, the affordability of, and the quality of hearing health care for adults of all ages.

Worry less. Plan more. Do you want a secure retirement, free from worry, stress, and confusion? The Bucket Plan® is a must-read book for anyone serious about creating a practical and sensible financial plan for his or her retirement years. The financial planning process outlined in this book is based on a three-bucket philosophy of strategically positioning assets to plan for and mitigate the risks and dangers that can occur in retirement. Readers will learn: • The three biggest dangers for your financial future and how The Bucket Plan helps protect from them • A formula for calculating whether you will have an income deficit and, if so, how much money is needed to prevent it • A surefire way to avoid taking on too much investment risk on money you may need in the near future • Much, much more When readers strategically allocate their money using Jason Smith's three-bucket philosophy, they can create a plan that mitigates risk and offers an opportunity for growth into the future, allowing them to feel more secure about retirement.

Emerging Adults and Substance Use Disorder Treatment addresses how a societal shift in the timing of developmental tasks affects treatment outcomes for substance use disorders, which are among the most highly prevalent and costly mental health problems in the United States. It presents

readers with a summary of the developmental period of emerging adulthood as well as a comprehensive review of state-of-the-art substance use disorder treatments for this group. There are an estimated 30.6 million emerging adults living in the US, and as many as 34.5% of them have serious problems with substances that often require clinical treatments. That equates to 10.5 million emerging adults ages 18-25 in the United States with a substance use disorder. However, research on substance use disorder treatments for emerging adults lags behind that for adolescents and older adults. This book fills a gap for academic audiences on this important and up-and-coming area of research. The first half of this volume address developmental issues associated with emerging adulthood, paying specific attention to how developmental features influence diagnosis and treatment. The second half of the book presents the state-of-the-science on interventions for emerging adults, with each chapter summarizing either a body of work on a particular type of intervention or a special topic affecting intervention delivery to emerging adults.

Plunkett's E-Commerce & Internet Business Almanac 2008: E-Commerce & Internet Business Industry Market Research, Statistics, Trends & Leading Companies Greenleaf Book Group

Early in the twenty-first century, a quiet revolution occurred. For the first time, the major developed economies began to invest more in intangible assets, like design, branding, and software, than in tangible assets, like machinery, buildings, and computers. For all sorts of businesses, the ability to deploy assets that one can neither see nor touch is increasingly the main source of long-term success. But this is not just a familiar story of the so-called new economy. *Capitalism without Capital* shows that the growing importance of intangible assets has also played a role in some of the larger economic changes of the past decade, including the growth in economic inequality and the stagnation of productivity. Jonathan Haskel and Stian Westlake explore the unusual economic characteristics of intangible investment and discuss how an economy rich in intangibles is fundamentally different from one based on tangibles. *Capitalism without Capital* concludes by outlining how managers, investors, and policymakers can exploit the characteristics of an intangible age to grow their businesses, portfolios, and economies.

This new volume contains profiles of nearly 500 of the best, rapidly-growing mid-size employers of 100 to 2,500 employees. These are highly-successful companies, located nationwide, that are of vital importance to job-seekers of all types.

Automotive News Food & Agriculture Org.

One of the main objectives of the Agreement on Agriculture (AoA) negotiated under the Uruguay Round is to improve the access of developing countries to foreign markets. Constraints in the domestic supply chains of many countries, along with weak marketing support and trade facilitation services, have prevented them, however, from exploiting the opportunities provided by the AoA and by other agreements to improve market access. The aim of this guide is to inform policy analysts on issues that should be considered while developing policies and measures to break the main processing and marketing constraints that prevent their countries from fully exploiting their agrifood export potential.
