Transforming Teen Behavior: Parent-Teen Protocols for Psychosocial Skills Training is a clinician's guide for treating teens exhibiting emotional and behavioral disturbances. Unlike other protocols, the program involves both parents and teens together, is intended for use by varied provider types of differing training and experience, and is modular in nature to allow flexibility of service. This protocol is

well-established, standardized, evidence-based, and interdisciplinary. There are 6 modules outlining parent training techniques and 6 parallel and complementary modules outlining psychosocial skills training techniques for teens. The program is unique in its level of parent involvement and the degree to which it is explicit, structured, and standardized. Developed at Children's Hospital Colorado (CHCO), and in use for 8+ years, the book summarizes outcome data indicating significant, positive treatment effects. Useful for teens with varied clinical presentations

If you've ever had  
trouble getting your  
students to open up  
about things they are  
feeling or thinking, try  
doing the opposite of  
what you typically do...  
In Opposite Day, you'll

find more than 600 prompts that will get your students talking about things that matter to them without really saying it. Each prompt will trigger a thought or emotion for your students, and you'll encourage them to share the opposite of what came to mind first. Confused? Give it a try. Imagine you're a student, and in a sentence or two, tell the opposite of how you feel about:

- Geometry
- Instant Messaging
- Allowance
- Dodgeball
- Responsibility
- Parents

Maybe your first thought about geometry was that you failed it and never could understand what a parallelogram was. You may say, "I excel at geometry and find the parallelogram to be one of the most

fascinating yet simple concepts in my class." Use for a discussion starter or an ice-breaker, and watch as your students find themselves talking and laughing about everything from friends to family to faith. Incorporate Opposite Day into your ministry and get your students talking about things that really matter by talking about what doesn't.

#### Parenting beyond the Rules Macmillan

Are you and your favorite teenager having too many conversations like this? "How was school?" "Fine." "Soccer practice?" "Same as always." "Anything interesting happen today?" "Nope." "Nice talking with you!" Let's face it. Teenagers have a PhD in one-word

answers . . . if we don't ask the right questions. In this book, veteran youth expert Jonathan McKee shares 180 creative discussion starters to help teens open up about issues that matter. You'll also find tips for interpreting their responses and follow-up questions. From light-hearted to more serious, these conversation springboards will encourage even the most reluctant teen to talk about friends, school, values, struggles, and much more. "The perfect tool for connecting with today's teenagers." -- Dr. Kevin Leman, author of *Have a New Teenager by Friday* "Few people understand the teenage world like Jonathan McKee. This

book is one of the most helpful and practical tools I have ever seen to get teenagers talking with their parents about important topics."--Jim Burns, PhD, author of *Teenology: The Art of Raising Great Teenagers and Confident Parenting If...* Ballantine Books  
NEW YORK TIMES BESTSELLER • An award-winning guide to the sometimes erratic and confusing behavior of teenage girls that explains what's going on, prepares parents for what's to come, and lets them know when it's time to worry. Look for *Under Pressure*, the companion guide to coping with stress and anxiety among girls, available now. In this sane, highly engaging, and informed guide for

parents of daughters, Dr. Damour draws on decades of experience and the latest research to reveal the seven distinct—and absolutely normal—developmental transitions that turn girls into grown-ups, including *Parting with Childhood*, *Contending with Adult Authority*, *Entering the Romantic World*, and *Caring for Herself*. Providing realistic scenarios and welcome advice on how to engage daughters in smart, constructive ways, *Untangled* gives parents a broad framework for understanding their daughters while addressing their most common questions, including • My thirteen-year-old rolls her eyes when I try to talk to her, and only does it

more when I get angry with her about it. How should I respond? • Do I tell my teen daughter that I'm checking her phone? • My daughter suffers from test anxiety. What can I do to help her? • Where's the line between healthy eating and having an eating disorder? • My teenage daughter wants to know why I'm against pot when it's legal in some states. What should I say? • My daughter's friend is cutting herself. Do I call the girl's mother to let her know? Perhaps most important, *Untangled* helps mothers and fathers understand, connect, and grow with their daughters. When parents know what makes their daughter tick, they can embrace and enjoy the

challenge of raising a healthy, happy young woman. BOOKS FOR A BETTER LIFE AWARD WINNER “Finally, there’s some good news for puzzled parents of adolescent girls, and psychologist Lisa Damour is the bearer of that happy news. [Untangled] is the most down-to-earth, readable parenting book I’ve come across in a long time.”—The Washington Post “Anna Freud wrote in 1958, ‘There are few situations in life which are more difficult to cope with than an adolescent son or daughter during the attempt to liberate themselves.’ In the intervening decades, the transition doesn’t appear to have gotten any easier which makes Untangled such

a welcome new resource.”—The Boston Globe

ECHO: A Vocal

Language Program for

Easing Anxiety in

Conversation is for

clinicians supporting

individuals who may

experience social

anxiety related to

speaking in specific

situations, or with

certain individuals.

Anxiety has a negative

impact on working

memory, which can

make it difficult for

individuals to

communicate with

ease. With reduced

experiences talking to

a variety of people in

various situations,

speaking often

becomes more

challenging. The ECHO

program was developed to build ease and comfort with social pragmatic communication, focusing on improving conversational skills for children from later elementary through teenage years. The program can be implemented by speech-language pathologists, psychologists, educators, and other facilitators (including parents), who support the needs of children and teens with selective mutism, stuttering, and those in need of social communication support. This unique intervention program combines methods of vocalization and verbalization to enhance conversational skills with role-play

simulations for real-life application. There are three modules in the ECHO program that build upon each other: Module 1 uses interactive games to focus on vocal control, helping the child or teen learn how to initiate voice, modulate intonation and volume with greater ease, and produce classes of speech sounds in words and sentences. Module 2 provides targeted skills for the child or teen to use language for different purposes, change language for the listeners or situation, and follow rules for conversation and storytelling; all with online interactive games to become a more spontaneous communicator. Module 3 builds on the previous two modules

by providing conversational role-plays which simulate real-life situations in school, at home, and in social and public settings. A cognitive behavioral therapy (CBT) framework is applied to help reduce cognitive distortions. Key Features \* Three modules bridging the gap from vocalization to conversation \* The ECHO Checklist to identify communication needs \* Social Communication Skills Pragmatics Checklist \* The ARC model for understanding anxiety tolerance, rescue reduction, and communication confidence \* Thirty-five interactive games and activities with over 150 photos (online and printed) to help children and teens gain skills necessary to

vocalize and engage in conversation
