The Battle of the Bulge, sometimes known as "Hitler's Last Desperate Gamble", was a massive German offensive beginning in December of 1944. The Allies did not believe such an offensive was possible in the thick forest of the Ardennes region. As a result, the Allies were caught completely off-guard and the German advance created a "bulge" in their lines. German defeat would result from poor logistics and Allied resolve. This defeat in the Ardennes would cripple German ability to wage war and seal

the end of the Third Reich in May 1945. Instructions included in this volume are: (Germans) Schwimmwagen, SdKfz 234-2 Puma, Panzer IV L/70, Marder III ausf M, Panther Ausf , Messerschmitt Bf-109 ¿Kurfurst¿ (USA) WWII Jeep, WC56 KD Ambulance, GMC CCKW 2 1/2 Ton Cargo Truck, M3A1 Half Track, M18 Hellcat, M36 Jackson, P-51D "Blue Nose" Mustang. This volume is printed on heavy-weight glossy paper with a special lay-flat spiral binding. Also included is a vinyl sticker sheet with vehicle markings, insignia, and uniforms for 17 figures. Each model includes a parts list to help locate all of the parts needed to build your model. Awesome LEGO Creations with Bricks You Already Have Taylor & Francis

This book examines the linkages between exchange rates and India's merchandise trade since the 1990s. It looks at India's trade in the post-liberalisation period through its two main components: commodities and trading partners, and provides a bird's eye view through aggregate analyses accompanied by a historical narrative of the evolution of trade and exchange rate dynamics. Presenting a comprehensive analysis of bilateral and

product-specific trade, the book explores the impact of exchange rate on labour intensive sectors and charts out major development. It also offers compelling evidence to suggest that if some commodities are identified as integral to India's export plans, then the impact of exchange rate must be weighed by the Reserve Bank of India (RBI) prior to a market intervention. This timely volume will be of interest to scholars and researchers of economics, business and finance, development studies, trade, business, and industry as well as practitioners, think-tanks, and policy makers.
