The Real Story of Risk HarperCollins
 NEW YORK TIMES BESTSELLER * "GRIPPING...THIS YARN HAS IT ALL." —USA TODAY * "A WONDERFUL BOOK." —Christian Science Monitor * "ENTHRALLING." —Kirkus Reviews (starred review) * "A MUST-READ." —Booklist (starred review) A human drama unlike any other—the riveting and definitive full story of the worst sea disaster in United States naval history. Just after midnight on July 30, 1945, the USS Indianapolis is sailing alone in the Philippine Sea when she is sunk by two Japanese torpedoes. For the next five nights and four days, almost three hundred miles from the nearest land, nearly nine hundred men battle injuries, sharks, dehydration, insanity, and eventually each other. Only 316 will survive. For the first time Lynn Vincent and Sara Vladic tell the complete story of the ship, her crew, and their final mission to save one of their own in "a wonderful book...that features grievous mistakes, extraordinary courage, unimaginable horror, and a cover-up...as complete an account of this tragic tale as we are likely to have" (The Christian Science Monitor). It begins in 1932, when Indianapolis is christened and continues through World War II, when the ship embarks on her final world-changing mission: delivering the core of the atomic bomb to the Pacific for the strike on Hiroshima. "Simply outstanding...Indianapolis is a must-read...a tour de force of true human drama" (Booklist, starred review) that goes beyond the men's rescue to chronicle the survivors' fifty-year fight for justice on behalf of their skipper, Captain Charles McVay III, who is wrongly court-martialed for the sinking. "Enthralling...A gripping study of the greatest sea disaster in the history of the US Navy and its aftermath" (Kirkus Reviews, starred review), Indianapolis stands as both groundbreaking naval history and spellbinding narrative—and brings the ship and her heroic crew back to full, vivid, unforgettable life. "Vincent and Vladic have delivered an account that stands out through its crisp writing and superb research...Indianapolis is sure to hold its own for a long time" (USA TODAY).

My Friend Michale a True Story about the Real Jaws

Capstone

More horrifying than Jaws-- because it's true! Since 1990 there have been 283 shark attacks worldwide-- 40 of which were fatal...In the past 15 years, reports of shark attacks have substantially increased...Over half the attacks occur in water no deeper than five feet... Believe it or not, shark attacks are still a very real threat to humans. These unspeakably bloody encounters happen in shallow water, in "safe" areas, to people just like you-- people who thought it could never happen to them. HONG KONG, 1995: A forty-five-year-old woman swimming in shallow water with fifty other people has one leg and one arm ripped off by the shark-- she dies before reaching the hospital. CALIFORNIA, 1993: A man snorkeling with friends is swallowed headfirst halfway down his body-- luckily, the shark spits him back out with only bite wounds. AUSTRALIA, 1993: A professional diver and mother of five is literally torn in half in front of her horrified family by a fifteen-foot great white shark. HAWAII, 1991: Two vacationing friends out for a swim suddenly see a shark "the size of a car" swim by. After one of the women begins thrashing in panic, the shark attacks and kills her-- her body is later recovered with several limbs missing. Read on for more blood-chilling accounts of people who fell prey to...SHARK ATTACKS.

This is the story of a woman who dared to dive, defy, discover, and inspire. This is the story of Shark Lady. One of the best science picture books for children, Shark Lady is a must for both teachers and parents alike! An Amazon Best Book of the Month Named a Best Children's Book of 2017 by Parents magazine Eugenie Clark fell in love with sharks from the first moment she saw them at the aquarium. She couldn't imagine anything more exciting than studying these graceful creatures. But Eugenie quickly discovered that many people believed sharks to be ugly and scary—and they didn't think women should be scientists. Determined to prove them wrong, Eugenie devoted her life to learning about sharks. After earning several college degrees and making countless discoveries, Eugenie wrote herself into the history of science, earning the nickname "Shark Lady." Through her accomplishments, she taught the world that sharks were to be admired rather than feared and that women can do anything they set their minds to. Shark Lady Henry Holt and Company

At once feared and revered, sharks have captivated people since our earliest human encounters. Children and adults alike stand awed before aquarium shark tanks, fascinated by the giant teeth and unnerving eyes. And no swim in the ocean is undertaken

without a slight shiver of anxiety about the very real—and very cinematic—dangers of shark bites. But our interactions with sharks are not entirely one-sided: the threats we pose to sharks through fisheries, organized hunts, and gill nets on coastlines are more deadly and far-reaching than any bite. In *Sharks and People* acclaimed wildlife photographer Thomas Peschak presents stunning photographs that capture the relationship between people and sharks around the globe. A contributing photographer to National Geographic, Peschak is best known for his unusual photographs of sharks—his iconic image of a great white shark following a researcher in a small yellow kayak is one of the most recognizable shark photographs in the world. The other images gathered here are no less riveting, bringing us as close as possible to sharks in the wild. Alongside the photographs, *Sharks and People* tells the compelling story of the natural history of sharks. Sharks have roamed the oceans for more than four hundred million years, and in this time they have never stopped adapting to the ever-changing world—their unique cartilage skeletons and array of super-senses mark them as one of the most evolved groups of animals. Scientists have recently discovered that sharks play an important role in balancing the ocean, including maintaining the health of coral reefs. Yet, tens of millions of sharks are killed every year just to fill the demand for shark fin soup alone. Today more than sixty species of sharks, including hammerhead, mako, and oceanic white-tip sharks, are listed as vulnerable or in danger of extinction. The need to understand the significant part sharks play in the oceanic ecosystem has never been so urgent, and Peschak's photographs bear witness to the thrilling strength and unique attraction of sharks. They are certain to enthrall and inspire.
