Ammonia is one of the
most important inorganic
basic chemicals, not only
for the manufacture of
fertilizers (85%) but also
for the production of
plastics, fibers,

explosives, and
intermediates for dyes
and pharmaceuticals. It is
an essential reaction
component for the
synthesis of numerous
organic chemicals used as
solvents and
intermediates. The book
provides a practical and
up-to-date account of the
product properties,
synthesis and reaction
mechanisms, including
catalysis and commercial

catalysts, modern
production technology for
different feedstocks,
quality specifications and
environmental health and
safety aspects, uses and
economic data of this
important commodity
chemical. It also discusses
perspectives of future
developments of
commercial ammonia
production. Over 1400
references to the relevant
literature complete this

concise presentation, whose aim is to inform the reader of the present status of the theory and practice of industrial ammonia production. Chemical engineers, engineers and chemists in industry, engineering companies, catalyst manufacturers, equipment makers and chemical engineering university departments will certainly profit from this comprehensive review based on the author's long practical experience in a leading technical management

position of one of the largest European ammonia producers. *Zell's Popular Encyclopedia* Storey Publishing
A comprehensive guide to the language of argument, Rhetorical Style offers a renewed appreciation of the persuasive power of the English language. Drawing on key texts from the rhetorical tradition, as well as on newer approaches from linguistics and literary stylistics, Fahnestock demonstrates how word

choice, sentence form, and passage construction can combine to create effective spoken and written arguments. With examples from political speeches, non-fiction works, and newspaper reports, Rhetorical Style surveys the arguer's options at the word, sentence, interactive, and passage levels, and illustrates the enduring usefulness of rhetorical stylistics in analyzing and constructing arguments. *The Chicken Encyclopedia* e-artnow
This extensive reference

volume presents the etymological history of thousands of English words. The story of how words come to be is the story of how humans think, and how we fashion our civilizations. Words can be the product of long and intertwining histories, migrations from other languages, or new coinages of science or slang. This diversity of origins is part of what gives the English language its beauty and power. In *Dictionary of Word Origins*, etymologist Joseph T. Shipley provides

a fascinating window into the evolution of modern English, from the onomatopoeic aspect of “abash” to the animalistic origins of “zodiac.” *The Illustrated London News Ladies' Home Journal* The Standard American Encyclopedia of Arts, Sciences, History, Biography, Geography, Statistics, and General KnowledgePremium PracticeModern PackagingTide of Advertising and MarketingWoman's Home CompanionTideAmerican DruggistRhetorical Style

A sweeping cultural survey reminiscent of Barzun's *From Dawn to Decadence*. "At irregular times and in scattered settings, human beings have achieved great things. Human Accomplishment is about those great things, falling in the domains known as the arts and sciences, and the people who did them.' So begins Charles Murray's unique account of human excellence, from the age of Homer to our own time. Employing techniques that historians have developed over the

last century but that have rarely been applied to books written for the general public, Murray compiles inventories of the people who have been essential to the stories of literature, music, art, philosophy, and the sciences—a total of 4,002 men and women from around the world, ranked according to their eminence. The heart of *Human Accomplishment* is a series of enthralling descriptive chapters: on the giants in the arts and what sets them apart from the merely great; on

the differences between great achievement in the arts and in the sciences; on the meta-inventions, 14 crucial leaps in human capacity to create great art and science; and on the patterns and trajectories of accomplishment across time and geography. Straightforwardly and undogmatically, Charles Murray takes on some controversial questions. Why has accomplishment been so concentrated in Europe? Among men? Since 1400? He presents evidence that the rate of

great accomplishment has been declining in the last century, asks what it means, and offers a rich framework for thinking about the conditions under which the human spirit has expressed itself most gloriously. Eye-opening and humbling, *Human Accomplishment* is a fascinating work that describes what humans at their best can achieve, provides tools for exploring its wellsprings, and celebrates the continuing common quest of humans everywhere to discover truths, create

beauty, and apprehend the good. *Household Engineering* U of Minnesota Press Each chapter the title of a traditional tune, a celebration of Irish music examines the history, experience, and meaning of the music *America's Munitions 1917-1918* Univ of California Press In the beginning, the World Wide Web was exciting and open to the point of anarchy, a vast and intimidating repository of unindexed confusion. Into this

creative chaos came Google with its dazzling mission—"To organize the world's information and make it universally accessible"—and its much-quoted motto, "Don't be evil." In this provocative book, Siva Vaidhyanathan examines the ways we have used and embraced Google—and the growing resistance to its expansion across the globe. He exposes the dark side of our Google fantasies, raising red flags about issues of intellectual property and

the much-touted Google Book Search. He assesses Google's global impact, particularly in China, and explains the insidious effect of Googlization on the way we think. Finally, Vaidhyathan proposes the construction of an Internet ecosystem designed to benefit the whole world and keep one brilliant and powerful company from falling into the "evil" it pledged to avoid.

In 1998 the author, a

professional prankster, trademarked the phrase "freedom of expression" to show how the expression of ideas was being restricted. Now he uses intellectual property law as the focal point to show how economic concerns are seriously eroding creativity and free speech.

The Jungle portrays the harsh conditions and exploited lives of immigrants in the United States in Chicago and similar industrialized

cities. The book depicts working-class poverty, the lack of social supports, harsh and unpleasant living and working conditions, and a hopelessness among many workers. The primary purpose of the novel in describing the meat industry and its working conditions was to advance socialism in the United States. The main character in the book, Jurgis Rudkus, a Lithuanian immigrant, tries to make ends meet in Chicago. The book begins with his wife Ona

and his wedding feast. He and his family live near the stockyards and meatpacking district where many immigrants, who do not know much English, work. He takes a job at Brown's slaughterhouse. Jurgis had thought the US would offer more freedom, but he finds working-conditions harsh. He and his young wife struggle to survive as they fall deeply into debt and become prey to con men. Hoping to buy a house, they exhaust their savings on the down payment for a

substandard slum house, which they cannot afford. The family is eventually evicted after their money is taken.
