JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. "The son of the Wolf" (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, "The Call of the Wild" (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including "The Sea-Wolf" (1904), "White Fang" (1906), "South Sea Tales" (1911), and "Jerry of the South Seas" (1917). One of London's most interesting novels is the semi-autobiographical "Martin Eden" (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

The subject of this book is an important and diverse field of electric machines and drives. The twelve chapters of the book written by renowned authors, both academics and practitioners, cover a large part of the field of electric machines and drives. Various types of electric machines, including three-phase and single-phase induction machines or doubly fed machines, are addressed. Most of the chapters focus on modern control methods of induction-machine drives, such as vector and direct torque control. Among others, the book addresses sensorless control techniques, modulation strategies, parameter identification, artificial intelligence, operation under harsh or failure conditions, and modelling of electric or magnetic quantities in electric machines. Several chapters give an insight into the problem of minimizing losses in electric machines and increasing the overall energy efficiency of electric drives.

The Secrets of LEGO House Aldrich Museum of Contemporary Art

Encompassing the subjects of sexuality and erotica, The Aldrich Contemporary Museum presents this catalogue from the "Contemporary Erotic Drawing" exhibition, featuring more than 35 artists. In describing the immediacy and intimacy of drawing, Joseph Beuys once stated, "Drawing is thinking," and indeed, for many artists, drawing is a highly personal and revealing process in which raw ideas are expressed, allowing spontaneous imagery or thoughts to emerge. And so, to examine the subject of eroticism and human sexuality, it seems appropriate to examine these 100 drawings. Many of the images seem to work against images in the media, and so define what is erotic and titillating in their own terms. This 204-page catalogue includes drawings in various media by artists such as Ida Applebroog, Cecily Brown, Leon Golub, Tracy Nakayama, Mark Dean Veca and Su-en Wong; features two essays by Sue Taylor and Wayne Koestenbaum; and biographical information on the artists.

Moon-face and Other Stories Grand Central Pub

This book provides an innovative theoretical and empirical exploration of the political participation and democratic capability of people living in authoritarian states. Merging perspectives from sociology and political science, the book demonstrates that despite autocratic restrictions on opposition, there is often still leeway for people to express themselves as political agents and to develop democratic capability. The first two chapters problematise political participation and develop an interdisciplinary three-domain framework that allows for critical engagement with and appreciation of the contexts and varied ways in which participatory activities occur. This framework is applied to analyse six country case studies: Singapore, Jordan, Belarus, Cuba, Nigeria, and Vietnam. Drawing on a range of data sources and different analytical entry points, the book investigates the substantive opportunities people have in exercising political agency and the implications for democratic capability. The book concludes by summarising the emergent themes and examining the potential of applying this method of inquiry in other political contexts. Encompassing both governmental and societal practices, the book offers insights into state-society relations and their role in constructing political values and goals for participation, which people negotiate and mediate to inform their choices, modes, and forms of civic engagement. These insights present a broad approach towards the study of participation, with relevance for understanding political participation in various societies under non-democratic and democratic rule alike. This book will be useful for researchers and students interested in political dynamics and intersections with economic, cultural, and social aspects of development. It will also be beneficial for practitioners interested in participatory actions and social change.

God created a game - it's called The Game of Life. Planet Earth is the playing field, the 10 love commandments are the rules, and we humans are the players who can win or lose. The game is played by two teams, like the game of football. One team's head coach is Jesus and the other team's head coach is Satan. All of us on earth are playing for one of these two teams! Gabriel Ansley Erb wrote the book "2028 END" in order to fully elucidate God's game clock scenario for The Game of Life as contained in the game's handbook, the Holy Bible. The handbook says, "God declared the end from the beginning" (Isaiah 46:10) by using 7 days in the creation event. Each 24 hour creation day foretold of a future 1,000 year period for a total 7,000 year plan God had for The Game of Life to be played on planet earth. And amazingly, to confirm this is all true, God hid a secret prophesy in each creation day foretelling the greatest event He had planned to occur in that day's future millennium!Consequently, Creation day 1 foretold Adam & Eve's fall, which was fulfilled during earth's 1st millennium. Creation day 2 foretold Noah's global flood, which was fulfilled during earth's 2nd millennium. Creation day 3 foretold Moses' Red Sea parting, which was fulfilled during earth's 3rd millennium. Creation day 4 foretold of John the Baptist & Jesus Christ, and so they lived and died during earth's 4th millennium. And the prophecies continue with each Creation day!Gabriel proves all of the above, carefully revealing the prophetic Scriptures as well as the fulfillment Scriptures. Then he reveals a dozen Scriptures proving Christ died earth's 4,000 year and will return earth's 6,000 year. Finally, he proves Christ died Feast of Passover AD 28 and will return Feast of Trumpets 2028. For those who read this book, it is an open and shut case: The Game of Life will end 2,000 years from the year of Christ's death on the cross - AD 2028.
