## SANTOS ODOM

Jumpstarters for the Human Body, Grades 4 - 12 Carson-Dellosa Publishing

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

*Concepts of Biology* LernerClassroom

STEM Labs for Life Science by Mark Twain includes 26 fun, integrated labs that help students understand concepts such as: - life -human body systems -ecosystems This middle school life science book encourages students to collaborate and communicate to solve real-world problems. The STEM Labs for Life Science book for sixth-eighth grades features introductory materials to explain STEM education concepts and provides materials for instruction and assessment. Correlated to meet current state standards, each lab combines the following essential STEM concepts: -communication -creativity -teamwork -critical thinking The Mark Twain Publishing Company provides classroom decorations and supplemental books for middle-grade and upper-grade classrooms. These products are designed by leading educators and cover science, math, behavior management, history, government, language arts, fine arts, and social studies. *ACCIDENTLY TURNED ASPIRATIONAL MR* S. Chand Publishing No anatomical reference is as inexpensive and as loaded with meticulously detailed, beautifully illustrated structures of the

human digestive system, clearly and concisely labeled for easy identification. There are over 10 million QuickStudy anatomy guides in print, all with illustrations by award-winning and best-selling medical illustrator Vincent Perez, whose life mission is cataloging the beauty and detail of our complicated body systems for the medical professional, the formative student and the inquisitive layperson. 6-page laminated guide includes illustrated and labeled: Anterior Digestive System & Viscera Posterior Digestive System & Viscera Lateral Mouth & Tongue Mouth & Throat Muscles Mouth, Tongue, Taste Buds Tooth Cross Section Mouth & Salivary Glands Small Intestine (Schematic), Large Intestine Stomach, Stomach & Pancreas Lymphatics Large Intestine Lymphatics Hepatic Portal Veins Liver, Gallbladder & Pancreas Liver Lobule (Micro) Pancreas Anterior Nervous System Ileocecal Sphincter & Appendix Rectum Esophagus, Stomach (Micro Cross Section) Small Intestine, Large Intestine (Micro Cross Section) Suggested uses: Students - handy reference that is compact and easily reviewed on a daily basis Administrative - use for billing and coding Doctors - use guide to educate patients or for reference with staff
