This Kindergarten Math Workbook is a great way for your little champion to learn basic math skills in a fun and easy way. This workbook is organized in a progressive skill-building way to get plenty of math practice. This book requires guidance from a teacher, parent, or caregiver to help the child to develop motor control for writing and counting numbers well while also learning math. To help your child be successful, we have formatted this book in sections. The activities in this book gradually increase in difficulty. Completing the easy activities first will help your child feel confident and motivated to keep going. This 6 in 1 guided math workbook progressively builds confidence in math start with: ✓ Part 1: Number Tracing ✓ Part 2: Addition ✓ Part 3: Subtraction ✓ Part 4: Math Game ✓ Part 5: Greater Than and Less Than ✓ Part 6: Table I hope you find this book helpful in teaching your child to learn basic mathematical skills and that your child enjoys working through the pages of this book! Young children learn best when the material is fun, and the games and activities in this book were intended for just that I hope you enjoy working with and watching your little one having fun, lighting up with each achievement, and most of all, loving learning! Be sure to go through the book at your child's pace. You will know when your child is ready for an activity if they are excited and want to continue working through the book. An uneager or struggling child is a sign that an activity may be too difficult for now. If this happens, either offer more help or wait until the child is a bit older to move ahead. Learning is fluid, and what is too hard today may become easier to master in the near future. This workbook comes with: Premium cover designed especially for kids 100 pages of high-quality Kindergarten Math Workbook. 8.5 x 11 inches - large size provides lots of space for writing High-quality white paper - 60gm Buy today to help your little champion take their first step confidently into the fun world of math.

Addition and Subtraction Workbook for Preschoolers
Millbrook Press™

Kindergarten Word Problems : Addition and Subtraction within Ten { Ideal for Special Education } for Kindergarten, Word Problem Kindergarten : This pack includes 31 addition and subtraction word problems workbook designed for students to "Read-Along, Sketch and Solve." The format is ideal for special

education, intervention groups or guided math groups. Each problem is presented in a full-page format to give students enough space to investigate multiple ways to solve the problem. The word "sketch" is intentionally used on all pages. Before students begin work, we often discuss how to represent objects using quick sketches as opposed to time-consuming detailed pictures. These word problems for kindergarten are designed with the rigor of the Common Core in mind and support the following standards: CCSS.Math.Content.K.OA.A.2 Solve addition and subtraction kindergarten word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem. CCSS.Math.Content.1.OA.A.1 Use addition and subtraction within 20 to solve kindergarten math word problem involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem. (These are beginning of the year first grade problems - working within groups of ten.) Each sheet includes: A place for students to sketch the problem. A ten frame for students to utilize. I encourage students to cross out items that are taken away as they work with the ten frame for subtraction. A number path on which students show their work. A space for an equation. A space to fill the answer in. As I introduce the first few word problems kindergarten with a group, we work through each section together and students complete each box on the sheet. Once students are familiar with the ways these sheets support their problem solving, I often have each student choose at least 2 ways to show and check their work. This allows each student to utilize the methods that are most efficient for him/her. I love to give students time to discuss why they chose certain methods to solve a problem! Each sheet includes an extension/bonus question at the bottom. These question cans be used in a variety of ways. Many parents want to help their child develop math concepts, but are not sure how. These bonus questions are perfect extension activities for students to discuss and complete at home with a family member. I love to see the extension work that students return! Many parents have commented that they appreciate the challenging nature of these questions. When these word problem kindergarten are used for whole-group instruction, it is common for some students to have completed tasks while others still need support. "Early finishers" can read-along with you as you introduce the bonus question, flip their paper over and work on this challenge question while you provide individual and/or small group instruction as needed. In this way, these bonus questions help teachers differentiate during group lessons. Many thanks for stopping by and taking a look! Sincerely, Enjoy :) All Educate School

140 PAGES OF ADDITION AND SUBTRACTION WITH PICTURES AND NUMBERS The workbook is designed in a such a way so that your child will progress to more difficult addition and subtraction questions with ease. This math workbook consists of 6 parts: ADDITION:The two numbers being added are represented by a corresponding number of pictures. The total is represented by pictures and the kids have to write the correct number. ADDITION: The two numbers being added are represented by a corresponding number of pictures. For the total, the kids are required to choose one of two results represented by numbers and a corresponding number of pictures. ADDITION: The two numbers being added are represented by a corresponding number of pictures and the kids are required to write the correct answer. without any help, but only by looking back at the two numbers being added. ADDITON: Addition with one number unknown. The kids are given the total represented by a number and a corresponding number of pictures and one of the numbers being added. They have to figure out the outhr number. SUBTRACTION: The kids are presented with a line of pictures. The objects being subtracted are crossed out. The problem is also represented by numerals only. The kids simply have to count the objects that are not crossed out to get the final result. SUBTRACTION: the kids are presented with a line of pictures along with the numerical representation of the subtraction problems. The kids are required to cross out the objects that are being subtracted and count the remaining number of objects to get the final result.
