Nero's ascent to the throne was only the beginning....Now Margaret George, the author of *The Confessions of Young Nero*, weaves a web of politics and passion, as ancient Rome's most infamous emperor cements his place in history. With the beautiful and cunning Poppaea at his side, Nero commands the Roman empire, ushering in an unprecedented era of artistic and cultural splendor. Although he has yet to produce an heir, his power is unquestioned. But in the tenth year of his reign, a terrifying prophecy comes to pass and a fire engulfs Rome, reducing entire swaths of the city to rubble. Rumors of Nero's complicity in the blaze start to sow unrest among the populace—and the politicians.... For better or worse, Nero knows that his fate is now tied to Rome's—and he vows to rebuild it as a city that will stun the world. But there are those who find his rampant quest for glory dangerous. Throughout the empire, false friends and spies conspire against him, not understanding what drives him to undertake the impossible. Nero will either survive and be the first in his family to escape the web of betrayals that is the Roman court, or be ensnared and remembered as the last radiance of the greatest dynasty the world has ever known. "A resplendent novel filled with the gilt and marble of the ancient world."—C. W. Gortner, author of *The Romanov Empress*

Demonstrates the centrality of chorality in the social, religious and technological practices of individuals and communities.

Collected Ancient Greek Novels Cambridge University Press

Prose fiction, although not always associated with classical antiquity, flourished in the early Roman Empire, not only in realistic Latin novels but also and indeed principally in the Greek ideal romance of love and adventure. Enormously popular in the Renaissance, these stories have been less familiar in later centuries. Translations of the Greek stories were not readily available in English before B.P. Reardon's first appeared in 1989. Nine complete stories are included here as well as ten others, encompassing the whole range of classical themes: romance, travel, adventure, historical fiction, and comic parody. A foreword by J.R. Morgan examines the enormous impact this groundbreaking collection has had on our understanding of classical thought and our concept of the novel.

The Pregnant Male as Myth and Metaphor in Classical Greek Literature Routledge

This book traces the image of the pregnant male in Greek literature as it evolved over the course of the classical period. The image - as deployed in myth and in metaphor - originated as a representation of paternity and, by extension, 'authorship' of ideas, works of art, legislation, and the like. Only later, with its reception in philosophy in the early fourth century, did it also become a way to figure and negotiate the boundary between the sexes. The book considers a number of important moments in the evolution of the image: the masculinist embryological theory of Anaxagoras of Clazomenae and other fifth century pre-Socratics; literary representations of the birth of Dionysus; the origin and functions of pregnancy as a metaphor in tragedy, comedy and works of some Sophists; and finally the redeployment of some of these myths and metaphors in Aristophanes'

Assemblywomen and in Plato's Symposium and Theaetetus.

[Greek Literature: Greek literature in the Classical period: the poetics of drama in Athens](#) Routledge

Originally published in 1958, this book examines the place of the Athenian novella in ancient literature from pre-Classical literature through to tragedy, comedy and rhetoric. Trenkner attempts to reconstruct the novella of the Attic period from the surviving traces in other sources in order to bridge the gap between the novelle of Herodotus and the better-known late Hellenistic novel. This book will be of value to anyone with an interest in the genesis of the ancient Greek novel.

[Ars Poetica](#) Cambridge University Press

Jean Ducat is the leading French authority on classical Sparta. Here is what is likely to be seen as his magnum opus. Ducat systematically collects, translates and evaluates the sources - famous and obscure alike - for Spartan education. He deploys his familiar combination of good judgement and uncompromising recognition of the limits to our knowledge, while drawing at times on aspects of French structuralism. This book is likely to become the definitive reference on its subject, while also informing and provoking the future work of others. Sparta was admitted by Greeks generally, even by its Athenian enemies, to be the School of Hellas. Ducat's work is thus a major contribution to our understanding of Greek ideas, and indeed to the history of education.

The New Science and English Literature in the Classical Period. A Dissertation Cambridge University Press

New York Times Bestseller and Man Booker Prize Finalist: A novel of ancient Greece by the author Hilary Mantel calls "a shining light." Alexander the Great stands alone as a leader and strategist, and Fire from Heaven is Mary Renault's unsurpassed dramatization of the formative years of his life. His parents fight for their precocious son's love: On one side, his volatile father, Philip, and on the other, his overbearing mother, Olympias. The story tells of the conqueror's two great bonds—to his horse, Oxhead, and to his dearest friend and eventual lover, Hephaestion—and of the army he commands when he is barely an adult. Coming of age during the battles for southern Greece, Alexander the Great appears in all of his colors—as the man who first takes someone's life at age twelve and who swiftly eliminates his rivals as soon as he comes to power—and emerges as a captivating, complex, larger-than-life figure. Fire from Heaven is the first volume of the Novels of Alexander the Great trilogy, which continues with The Persian Boy and Funeral Games. This ebook features an illustrated biography of Mary Renault including rare images of the author. "Mary Renault is a shining light to both historical novelists and their readers. She does not pretend the past is like the present, or that the people of ancient Greece were just like us. She shows us their strangeness; discerning, sure-footed, challenging our values, piquing our curiosity, she leads us through an alien landscape that moves and delights us." —Hilary Mantel

This volume is available on its own or as part of the seven volume set, Greek Literature. This collection reprints in facsimile the most influential scholarship published in this field during the twentieth century. For a complete list of the volume titles in this set, see the listing for Greek Literature [ISBN 0-8153-3681-0]. A full table of contents can be obtained by email: reference@routledge-ny.com.

The Cambridge History of Classical Literature: Volume 1, Greek Literature, Part 3, Philosophy, History and Oratory Routledge

What does it mean to write in and about sound? How can literature, seemingly a silent, visual medium, be sound-bearing? This volume considers these questions by attending to the energy generated by the sonic in literary studies from the late nineteenth century to the present. Sound, whether understood as noise, music, rhythm, voice or vibration, has long shaped literary cultures and their scholarship. In original chapters written by leading scholars in the field, this book tunes in to the literary text as a site of vocalisation, rhythmic and dissonance, as well as an archive of soundscapes, modes of listening, and sound technologies. Sound and Literature is unique for the breadth and plurality of its approach, and for its interrogation and methodological mapping of the field of literary sound studies.

[Greek Literature: Greek literature in the Hellenistic period](#) The Greek Novella in the Classical Period

This volume provides a valuable contribution to our knowledge of eighteenth- and nineteenth-century intellectual life inside and outside Germany. —Prof. Karl S. Guthke, Harvard University This elegant collection of essays ranges across eighteenth and nineteenth-century thought, covering philosophy, science, literature and religion in the 'Age of Goethe.' A recognised authority in the field, Nisbet grapples with the major voices of the Enlightenment and gives pride of place to the figures of Lessing, Herder, Goethe and Schiller. These eleven essays range widely in their compass of thought and intellectual discourse, dealing incisively with themes including the philosophical implications of literature and the relationship between religion, science and politics. The result is an accomplished reflection on German thought, but also on its rebirth, as Nisbet argues for the relevance of these Enlightenment thinkers for the readers of today. The first half of this collection focuses predominantly on eighteenth-century thought, where names like Lessing, Goethe and Herder, but also Locke and Voltaire, feature. The second has a wider chronological scope, discussing authors such as Winckelmann and Schiller, while branching out from discussions of religion, philosophy and literature to explore the sciences. Issues of biology, early environmentalism, and natural history also form part of this volume. The collection concludes with an examination of changing attitudes towards art in the aftermath of the 'Age of Goethe.' The essays in this volume have been previously published separately, but are brought together in this collection to present Nisbet's widely-acclaimed perspectives on this fascinating period of German thought. It will be of interest to scholars and students of the intellectual life of Europe during the Enlightenment, while its engaging and lucid style will also appeal to the general reader.

NEW SCIENCE & ENGLISH LITERATURE A&C Black

Literature has its own strategies for ordering information. In this elegant and insightful book about the formation of knowledge in seventeenth-century France, Harriet Stone asks what those strategies conveyed about the limits of science and about the cultural environment of the period. A propensity for reason and control pervaded literature as well as science, allowing classical literature to serve as a unique laboratory for exploring the model of representation developed by science. Literary texts have influenced the establishment and transformation of the paradigms grounding knowledge by drawing attention to meanings that the paradigms fail to name. Stone identifies not only the momentous achievement of the discovery of the scientific method but also the more subtle process of experimentation in literature through which ideas were continually tested and redefined. She offers close readings of works by Rotrou, Corneille, Racine, Moliere, La Rochefoucauld, and Lafayette, as well as by Descartes, Furetiere, and Pascal. Her first and last chapters frame the literary texts within a discussion of Foucault's analysis of classical science. Classical writers began to encode their own world. Once they did, not only science but literature became an authority for mapping knowledge. Notwithstanding the classical period's efforts to affirm the unity of knowledge, Stone concludes that knowledge was never complete or certain. Literature's capacity to rework the model through which it assigns meanings proves essential to unfolding both the art and the science of representation.

[Classical Literature](#) Routledge

In music, the period from the middle of the eighteenth century to the beginning of the nineteenth is usually referred to as the 'Classical' Era. This was a period in which the art, literature and architecture of Ancient Greece and Rome were being rediscovered and re-evaluated, which in turn strongly influenced the 'modern' art of the time. But this was also a period of immense social change and political unrest, with challenges to the old established order culminating in the French Revolution of 1789. Discover Music of the Classical Era shows how all this was reflected in the music written during those turbulent but also intensely creative years.

[The Classical Model](#) Cambridge University Press

This volume ranges in time over a very long period and covers the Greeks' most original contributions to intellectual history. It begins and ends with philosophy, but it also includes major sections on historiography and oratory. Although each of these areas had functions which in the modern world would not be considered 'literary', the ancients made a less sharp distinction between intellectual and artistic production, and the authors included in this volume are some of Europe's most powerful stylists: Plato, Herodotus, Thucydides and Demosthenes.

[Essays in English Literature of the Classical Period](#) Cambridge University Press

Traditional and still prevalent accounts of late antique literature draw a clear distinction between 'pagan' and 'Christian' forms of poetry: whereas Christian poetry is taken seriously in terms its contribution to culture and society at large, so-called pagan or secular poetry is largely ignored, as though it has no meaningful part to play within the late antique world. The Myth of Paganism sets out to deconstruct this view of two contrasting poetic traditions and proposes in its place a new integrated model for the understanding of late antique poetry. As the book argues, the poet of Christ and the poet of the Muses were drawn together into an active, often provocative, dialogue about the relationship between Christianity and the Classical tradition and, ultimately, about the meaning of late antiquity itself. An analysis of the poetry of Nonnus of Panopolis, author of both a 'pagan' epic about Dionysus and a Christian translation of St John's Gospel, helps to illustrate this complex dialectic between pagan and Christian voices.

Arabic Literature in the Post-Classical Period Cambridge University Press

This elegant collection of essays ranges across eighteenth and nineteenth-century thought, covering philosophy, science, literature and religion in the 'Age of Goethe.' A recognised authority in the field, Nisbet grapples with the major voices of the Enlightenment and gives pride of place to the figures of Lessing, Herder, Goethe and Schiller.

Palala Press

Late Antiquity has attracted a significant amount of attention in recent years. As a historical period it has thus far been defined by the transformation of Roman institutions, the emergence of distinct religious cultures (Jewish, Christian, Islamic), and the transmission of ancient knowledge to medieval and early modern Europe. Despite all this, the study of late antique literary culture is still in its infancy, especially for the Greek and other eastern texts examined in this volume. The contributions here presented make new inroads into a rich literature notable above all for its flexibility and unparalleled creativity in combining multiple languages and literary traditions. The authors and texts discussed include Philostratus, Eusebius of Caesarea, Nonnos of Panopolis, the important St Polyuktos epigram, and numerous others. The volume makes use of a variety of interdisciplinary approaches in an attempt to provoke discussion on change (Dynamism), literary education (Didacticism), and reception studies (Classicism). The result is a study which highlights the erudition and literary sophistication characteristic of the period and brings questions of contextualization,

linguistic association, and artistic imagination to bear on little-known or undervalued texts, without neglecting important evidence from material

culture and social practices. With contributions by both established scholars and young innovators in the field of late antique studies, there is no work of comparable authority or scope currently available. This volume will stimulate further interest in a range of untapped texts from Late Antiquity.
