 In this fascinating new study, Aneeda Jan examines an enduring problem prevailing on an international scale. In the absence of any comprehensive approach, the phenomenon of honor killings is mainly viewed as a social menace than a criminal act demanding global solutions. Why is the menace of honor killing so rampant? How can we analyze or focus on social and legal measures adopted by different countries to prevent honor killings? To what extent have judicial bodies provided guidance to set standards regarding the prevention and control of honor killings? How much have social, moral, religious, and ethical values contributed towards the prevalence or prevention of honor killings? Honor Killings studies variations of the phenomenon and attempts to answer the questions posed above. Examining honor killings in India, Pakistan, Jordan, Honor Killings is both doctrinal and non-doctrinal in its approach. Perpetrators of honor killings, which are not restricted to any one country or segment of society, demand absolute exemption from punishment. In certain states honor killing is neither recognized nor identified as a crime. It is only recently in certain states, including India, that this crime now falls within the rarest of rare cases deserving harsher punishments as interpreted by the judiciary. Honor killings are rarely reported, and thus the magnitude and extent of the crime cannot be correctly and accurately ascertained. Honor Killings gathers results from qualitative research. The non-doctorial part of the research is

based on the data and information collected by questionnaires and interviews. The qualitative approach utilized in this research is uniquely suited to access the actual socio-legal perspective of honor killings. It was only by speaking to the people in their native environments and asking open-ended questions on the topic in the course of interaction that a sense of how honor killings are perceived and maintained in social, legal, moral and religious spheres. **Seiser & Kumli on California Juvenile Courts Practice and Procedure** Xpl Pub
 From the preface: "The issues around which the juvenile justice system is centered frequently evoke anger and impatience. These emotions arise because the issues are so important and movement concerning the same issues seems nonexistent. The persons who are involved with those same issues, however, elicit respect and, often, affection. The Executive Sessions of the Kennedy School of Government combine the two elements - issues and persons - with the stated goal of advancing fruitful and effective public policy. The Executive Session on the Future of the Juvenile Justice System regularly brought to the same table, over a period of almost two years, persons who understand the issues well, who are professionally and personally invested in certain positions on the issues, and who were willing to engage themselves fully in the exchange of ideas, both theoretical and practical, which an Executive Session demands. This book is one of the products of that process. The editor, who chaired the meetings of the Session, takes certain positions regarding the future of the juvenile justice system and what the system should look like ten years from now." 1

 Rubin's book is a well-written examination of the issues and conflicts that are faced by the juvenile courts on a daily basis: it takes readers behind the scenes for a realistic analysis. The opening chapter depicts an exchange that might occur between judge, child, parents, lawyers, probation officials, and social workers during a typical day. The bulk of the book contains chapters on five distinguished working juvenile judges, describing the style of each. A final chapter simulates a meeting between the five judges to discuss policy.

Juvenile Justice and Delinquency

Most people accessing mental health and addiction services have experienced trauma. For those working in community services, treatment agencies and hospitals, providing "trauma-informed care" requires an understanding of the effects of trauma, and of how to create

programs, spaces and policies that place priority on trauma survivors' safety, choice and control. *Becoming Trauma Informed* describes trauma-informed practice at the individual, organizational and systemic levels. This multi-authored collection brings together the voices of those who have integrated trauma-informed principles into various mental health and addiction treatment and social service environments, and of the diverse groups with which they work. *Becoming Trauma Informed* is an important resource for those who are working, or who are planning to work as addiction and mental health practitioners and program and system planners."
