APLS: The Pediatric Emergency Medicine Resource, Revised Fourth Edition offers the information necessary to assess and manage critically ill or injured children during the first hours in the emergency department. The Revised Fourth Edition of APLS is truly the body of knowledge in pediatric emergency medicine. If you want the newest, most comprehensive reference on pediatric emergency medicine, the Revised Fourth Edition will meet your needs. Developed by expert authors, editors, and faculty from both AAP and ACEP, the new APLS is a unique teaching and learning system for individual physicians, residents, students, and APLS instructors and course directors. The Fourth Edition of APLS has been revised and expanded to cover new conclusions drawn from reason, fact, and experience to the benefit of sick and injured children worldwide. Together, AAP and ACEP developed

APLS into a new, stand-alone course, offering continuing medical education units and an APLS course completion card. The course is highly interactive with small group scenarios, hands-on skill stations, and case-based lectures.

Pediatric Education for Prehospital Professionals (PEPP), Fourth Edition is an evidence-based resource of essential medical content for the assessment and management of infants and children in the field. This respected and ground-breaking program paired physicians and EMS providers together to ensure the content reflects current best practices and the realities of the field. Developed by the American Academy of Pediatrics, PEPP is designed to give prehospital professionals the knowledge, skills, and confidence they need to effectively assess and manage pediatric patients. PEPP combines world-class content with engaging features and an interactive course to truly prepare prehospital professionals to care for pediatric patients. The Fourth Edition Includes: A new chapter on Behavioral Emergencies A top-flight EMS author team working with AAP physician reviewers to ensure exceptional medical content with a focus on how it is applied in the "streets" New procedures on tourniquet application and intranasal medication administration Features Include: The Pediatric Assessment Triangle (PAT) represents the essence of the PEPP patient assessment method,

which includes assessing appearance, work of breathing, and circulation to the skin. The Patient Assessment Flowchart provides students with an easy-to-understand reference of the pediatric patient assessment process. Case Studies provide an opportunity for students to apply the foundational knowledge presented in the chapter and strengthen their critical-thinking skills. Procedures provide step-by-step explanations and visual summaries of vital BLS and ALS pediatric care skills. Flexible Course Options: PEPP Course Coordinators may offer a 2-day onsite course or a 1-day enhanced hybrid course at the BLS or ALS level. The onsite course features interactive case-based lectures where students apply their knowledge in a safe environment. The hybrid course features case-based online modules with engaging interactivities, including rapid skills demonstration videos that students complete before attending the onsite portion for hands-on skill station coaching and small-group discussions. The BLS-level courses are geared toward emergency responders and EMTs, while the ALS-level courses are geared toward AEMTs and Paramedics.

Steven "Kelly" Grayson has seen the best of us at our worst. When hearts stop working, when blood alcohol levels exceed limits we shouldn't contemplate, when bodies are extricated from car wrecks, he's been there to pick up the pieces, save our lives, and watch us slip away. *En Route* is an unflinching look at the heart of a paramedic and the profession that shaped him. Grayson's touching stories of life and death and the hilarious ones of times in between are here to give us an insight of what happens after we call 911, the ambulance doors close, or even what happens inside the ER when the nurse shows the family to the waiting room.

The first volume in the "What Do I Do Now?: Emergency Medicine" series, *Pediatric Medical Emergencies* uses a case-based approach to cover common and important topics in the examination, investigation, and management of acutely ill children. Each chapter provides a discussion of the diagnosis, key points to remember, and selected references for further reading. Areas of controversy are clearly delineated with a discussion regarding evidence-based options and a balanced view of treatment and disposition decisions. The book addresses a wide range of topics including neonatal fever, pediatric sepsis, intussusception, and more, and is suited for emergency medicine providers and pediatricians. *Pediatric Medical Emergencies* is an engaging collection of thought-provoking cases which clinicians

can utilize when they encounter difficult pediatric patients. The volume is also a self-assessment tool that tests the reader's ability to answer the question, "What do I do now?"

The importance of early prevention and treatment of sepsis has never been greater. In the UK alone sepsis contributes to more deaths than lung cancer, from bowel cancer and breast cancer combined, and approximately one third of patients who suffer from severe sepsis die. The ABC of Sepsis provides a much needed introduction and an invaluable aid in the increasing efforts to reduce hospital infection and improve patient safety. As growing numbers of junior medical staff experience emergency medicine, critical care and acute medicine as part of the Foundation Programme, there is an increasing need to develop the skills required to treat severe sepsis. The editors are

involved with the Survive Sepsis campaign - developed to improve the recognition, diagnosis and treatment of sepsis - and are perfectly placed to guide junior medics, GPs, specialist nurses, critical care nurses and primary care staff through this core aspect of acute medicine.

This book is intended as an introductory text from senior undergraduate level up, to be used in courses on international studies and relations, political studies, history, human geography, anthropology and human ecology, futures studies, applied social studies, public health, and other fields. It represents in a coherent fashion the new subject of human security and sets it apart from more traditional models of security. Its approach is deliberately multidisciplinary and transcultural. In addition to a thorough overview of the human security concept, the chapters address problems and opportunities in international law, politics, international relations, human ecology, ethics, law enforcement, development aid, human rights, and public health. The reader is also introduced to specific human security regimes that address human rights violations, peace building and conflict resolution, as well as global environmental governance. The book encourages a vision of the future that acknowledges the certainty of change, extrapolates significant current trends, and questions the values, beliefs and ideals that tend to inform dominant notions of development. Because of its transdisciplinary approach, the book will appeal to a very wide range of interests at the post-secondary/tertiary level. It will be of particular interest to college and university undergraduate students as well as graduate students and researchers, and also to educators from various

disciplines in the natural sciences, social sciences, and humanities.

Whether you're caring for patients on the ground or in the air, this trusted, one-of-a-kind resource is an essential tool for your success in transport nursing. The 4th edition has been extensively revised to keep you up to date with the latest technological advances and help you meet the ever-changing needs of this critical nursing field. Comprehensive overviews familiarize you with the most common diseases and injuries encountered in practice, accompanied by important management considerations to help you ensure the most effective communication and the safest patient care in all transport settings. Case studies presented at the end of each clinical chapter demonstrate how to apply concepts to scenarios similar to those you'll encounter in practice. Special Populations Unit helps you meet the unique care needs of pregnant, neonatal, pediatric, and military patients. Competencies listed at the beginning of each chapter help you identify key components of effective patient care. Collaborative, multidisciplinary focus meets the educational and reference needs of all transport health care providers and emphasizes the importance of teamwork in ensuring successful patient outcomes. 3 new chapters highlight emerging trends in transport care: The Use of Technology During Transport, including ventricular assist devices, a chapter devoted to Mechanical Ventilation, and Military Transport with EnRoute care. Updated content throughout provides a balance of ground and air coverage and reflects the recently published Flight and Ground Transport Nursing Core Curriculum to help you prepare

for the CTRN or CFRN examination. Expanded disaster management coverage addresses front-line response to major disasters. Expanded disaster management coverage addresses important concerns for improving front-line response to major disasters. Additional pathophysiology content helps you better understand the effects of diseases and injuries on the body's normal physiologic processes. Clear instructions for reading radiographs and CT scans simplify the use of these diagnostic tools and help you improve related outcomes. Information based on the latest updates from the Federal Aviation Association and the National Transportation Safety Board alerts you to important safety regulations. Obesity considerations included in the Patient Assessment and Preparation for Transport chapter outline special challenges and possible solutions for the care of obese patients.

The 1st edition of Structural Fire Fighting: Initial Strategy and Tactics is intended to provide fire personnel with the knowledge needed to deploy resources in the first 10 minutes of any structural fire incident. The manual is designed to help the reader develop a logical decision-making process for determining incident priorities, strategies, and tactics regardless of the available resources or configuration of the emergency services organization. Scenarios for residential, commercial, and special hazard incidents are included with recommended best practices and considerations. Training officers can use these scenarios,

modified to local resources and realities, to develop classroom discussions or field simulations. This manual is a companion to Structural Fire Fighting: Truck Company Skills and Tactics, 2nd edition and the soon to be released Structural Fire Fighting: High Rise Fire Fighting. Each chapter of the manual contains learning objectives, key terms, and review questions to assist the reader in understanding the material.

In a series of newly commissioned essays from the leading scholars and advocates in criminal justice, Invisible Punishment explores, for the first time, the far-reaching consequences of our current criminal justice policies. Adopted as part of "get tough on crime" attitudes that prevailed in the 1980s and '90s, a range of strategies, from "three strikes" and "a war on drugs," to mandatory sentencing and prison privatization, have resulted in the mass incarceration of American citizens, and have had enormous effects not just on wrong-doers, but on their families and the communities they come from. This book looks at the consequences of these policies twenty years later.
