Excerpt from *The Law of Struggle* We have promised ourselves that this War is to be the last. Still, how do we know? We did not seek it, yet it came. We are in the grip of momentous currents, we know not how. Evidently, we still do not know the laws by which we live. Tho we have stored up great accumulations of miscellaneous, unrelated, unassimilated facts concerning ourselves, these accumulations have only served to make confusion worse confounded. And yet, the great problems with which the world is wrestling so bloodily to-day are compounded of the measure and quality of our self-knowledge. We still do not know our place in the scheme of things; and the blows of the Germans resounding against the gates of Paris, beat also upon the faith in the hearts of men. If the Great War, which has descended upon us like a visitation from another world, is not really native to our true nature as human beings, why does it have such a hold upon us? Whence does it derive its power to stretch forth its gruesome hand and drag us, open-eyed, protesting, horror-stricken, into its dread vortex? Why are we finally fascinated by it and go exulting into the fray? To accuse the world of inconsistency and hypocrisy provides us with no explanation. Beneath every cover of duplicity is concealed some earnestness of purpose. What is it? What is the blundering purpose of the world? Some years ago - in the year 1911, to be precise - I wrote a book in which I attempted to set forth this riddle and its answer. This book - which is the result of several years of research, discussion, writing and re-writing - consists of three parts and eight chapters. The first part is given by the two first chapters introducing the issue of validity and facticity in law. The second part (Chapters 3, 4 and 5) is the core of this study and tries to present a theory based on a specific view about language and social practice. The third part deal with the issue of value judgments and views about morality and consists of Chapters 6 and 7. Chapter 8 should nally serve as epilogue. In the first chapter a discussion is started about the relationship between law and power, seen as a presupposition for an assessment of the nature of law. As a matter of fact, as has been remarked, "general theories of law struggle to do justice to the multiple dualities of the law". Indeed, law has a "dual nature": it is a fact, but it also a norm, a sort of ideal entity. Law is sanction, but it is also discourse. It is effectivity, or facticity, but it is also a vehicle of principles among which the central one is justice. But this duality is not only a phenomenological, or a matter of justification and implementation as two separate moments.

Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein's *The Color of Law* offers "the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation" (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, "virtually indispensable" study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), *The Color of Law* forces us to face the obligation to remedy our unconstitutional past.

Atiyah's *Introduction to the Law of Contract* is a well-known text through which thousands of university students have first encountered the law of contract, and the new edition has long been eagerly awaited by university teachers and students. This sixth edition, updated by Stephen Smith, continues to provide readers with an introduction to the theories, policies, and ideas that underlie the law, placing an equal emphasis on the law and critical analysis. In particular, the discussion of recent cases and legislation is centred on why contract law is the way it is, whether it can be justified, and, if not, what should be done to improve it. The sixth edition has been revised to place the law of contract in a modern context and to account for recent developments in the law, as well as those in academic thinking and writing. Addressing European influences and including perspectives from comparative law, this remains a stimulating and authoritative exposition of the modern law of contract.

"I am Ra. We came to your peoples to enunciate the Law of One. We wished to impress upon those who wished to learn of unity that in unity all paradoxes are resolved; all that is broken is healed; all that is forgotten is brought to light." For thousands of years those of Ra have sought to teach the Law of One to seekers of truth on Earth who wished to learn of the unity or oneness of all things. This basic law of all creation is buried deep within each of our hearts because we really are one in love and in light, the building blocks of the universe. We are all manifestations of the One Infinite Creator. We are the Creator. We are not learning this law for the first time but are remembering it yet again as all mystics have taught throughout Earth's history. Our journey of self-realization is the discovery or remembrance of this essential truth, our essential identity. A waking up, as some have called it, within an illusion of separation. Don Elkins and Carla L. Rueckert worked together for 12 years to perfect the channeling process and receive philosophical inspiration and guidance from extraterrestrial sources. When Jim McCarty joined them in 1980 they began to receive a new and unique type of channeling contact from those of Ra. Through this contact, Ra shared information to help seekers of truth deepen their awareness and acceptance of self and other, and to help Earth move into the emerging fourth density of love and understanding. This book is the transcript from the recording of that conversation between the Questioner and Ra. Through questions & answers, the metaphysical blueprint of spiritual evolution is explored, from the microcosm to the macrocosm, from the particulars of life on this planet to the life of the cosmos, to the possibilities of healing, transformation, and self-realization for spiritual seekers and wanderers. * * * * * The Ra Contact: Teaching the Law of One Volume 2 contains Ra contact sessions 57-106. The Concept of Law Intersentia nv

Just as she's done in her previous books, Cynthia Bourgeault asks us to take a look at an idea from traditional Christianity—this time the formula of Father, Son, and Holy Spirit—as though we're looking at it for the first time. And as usual, she reveals it to be something we hadn't expected at all. She finds in the idea of the Holy Trinity a striking vision of the nature of reality. What she claims, in a nutshell, is that embedded within this theological formula that Christians recite mostly on autopilot lies a powerful metaphysical principle that could change our understanding of Christianity and give us the tools so long and so sorely needed to reunite our shattered cosmology, rekindle our visionary imagination, and cooperate consciously with the manifestation of Jesus's "Kingdom of Heaven" here on earth. She looks to the history of Christian theology, to her own years of contemplative practice, and to the ideas of G. I. Gurdjieff. Her tone is, as ever, as accessible as it is compelling, and it's a wild ride. "I will do my best to make the ride as smooth as possible," she says, "but in the end, my commitment is to getting there, because I know beyond all personal doubt that there is indeed a ham radio concealed inside this Trinitarian tea cupboard. And in the midst of this long winter of our Christian discontent, when spiritual imagination and boldness are at an all-time low and the church itself hovers at the edge of demise for lack of an animating vision, perhaps now more than ever the

time is ripe to remove the packing boards from this tea cupboard and release its contents."

No matter who you are or what you believe, you have the power to manifest what you want in life—a dream job, wealth, love, and health. In this concise and fascinating book, Tony Burroughs shows readers how to work with the Law of Agreement to change old beliefs about money, relationships, and health issues that are holding them back. He shares stories from his years of working with people from all over the world who are practicing living intentionally bringing into their lives that which serves the higher good and discarding the rest. The Law of Agreement says that as we lend our agreement to any belief, we reinforce it and make it stronger. Alternatively, as we refrain from lending our agreement to an idea that isn't likely to give us the results we're looking for, we dilute it and weaken its power over us and over everyone else simultaneously. Burroughs offers examples and stories that show how the Law of Agreement and its partner, the Law of Adversity, work simultaneously. What happens when we don't get what we want? What is the opportunity in adversity? The Law of Agreement shows how adversity can lift us up and out of our routines and help us to reach deep inside ourselves for answers to life's hardest questions. Full of real-life stories, examples, and solutions, *The Law of Agreement* is a practical and world changing book.

Lars Muhl has had a lifelong burning interest in Jesus, not only as an archetype, saviour, bodhisattava and elder brother, but also in relation to the Essenes from the Dead Sea. *The Law of Light* is the result of his many years spent studying Aramaic and the techniques of Yeshua (Jesus). Yeshua spoke Aramaic. Through the Aramaic language, his teachings offer not just another interpretation of the New Testament, but the unveiling of a secret message that attempts, once and for all, to settle centuries-old conceptions of sin, and to once again connect man with the heavenly spiritual source. The core of Yeshua's Aramaic message is intimacy, freedom, selfless awareness, unconditional love, compassion and forgiveness. In all he says, there exists a hidden invitation to us to be present in, and dedicated to, everything with which we engage. Five minutes of total devotion is worth more than hours of hectic exertion. The aim is to set mankind free and to dismiss everything that is bound up in false notions.

A concise, accessible, and engaging guide to the law of treason, written by the nation's foremost expert on the subject. The only crime defined in the United States Constitution, treason is routinely described by judges as more heinous than murder. Today the term is regularly thrown around by lawmakers and pundits on both sides of the aisle. But as these heated accusations flood the news cycle, it's not always clear what the crime of treason truly is, or when it should be prosecuted. Drawing on over two decades of research, constitutional law and legal history scholar Carlton Larson takes us on a grand tour of the Treason Clause of the United States Constitution. Despite the

Clause's apparent simplicity, Larson demonstrates that it is a form of constitutional quicksand in which seemingly obvious intuitions are often far off the mark. From the floors of the medieval British Parliament that codified the Statute of Treasons upon which the American law was based to the treason of Benedict Arnold, our nation's founding traitor, to more recent events, including WWII's "Tokyo Rose" and the allegations against Edward Snowden and Donald Trump, Larson provides a riveting account of treason law in action. On Treason is an indispensable guide for anyone who wants to understand this fundamental aspect of our legal system. With this short, accessible look at the law's history and meaning, Larson clarifies who is actually guilty--and readers won't need a law degree to understand why.

Seminar paper from the year 2011 in the subject Pedagogy - School System, Educational and School Politics, grade: A, (Atlantic International University) (School of Human and Social Studies), course: Education and Law, language: English, abstract: For many of education managers the phrase "law" immediately becomes an incomprehensible maze of acts, administrative policies and judicial decisions. Every situation that arises in a school is governed by laws, rules and regulations, and every educator needs to be familiar with these and respect the rights and responsibilities of all interested parties. Every education manager and educator also be familiar with and understand education law so that they can use it to enhance learning and teaching. An understanding of the legal framework starts with an understanding of what it meant by the notion of "law". This concept forms part of the daily life of every person in all nations in the world. In many aspects of education, like legal issues that govern students, it can be said that it is the law that provides the best means that should be used in disciplining students. With this regard therefore, the law and regulatory issues dictate either in individual school or in all schools what is the best method of disciplining them. Lines. In the early days, the management of education and more specifically schools in many countries was in the hands of the state government. This shows that the government at federal or regional level was responsible in determining educational funding, methods of disciplining teachers and students, and accreditation in schools. Whatever the case may be, in order to achieve the intended goal of education policy and plan of the country all individuals in a school should have freedom of speech but this is not what is happening in most countries as school administrators usually restricts students' freedom of speech. It is of paramount importance that all educators and policy formulators should pay much attention to the law concerning education in order to make sure that the law is not bent in the process of providing education to citizens.

Intestate Succession is the second volume in the Comparative Succession Law series which examines the principles of succession law from a comparative and historical perspective. This volume discusses the rules which apply where a person dies either without leaving a valid will, or leaving a will which fails to dispose of all of the person's assets. Among the questions considered are the following: What is the nature of the rules for the disposal of the deceased's assets? Are they mechanical or is there an element of discretion? Are particular types of property dealt with in particular ways? Is there entitlement to individual assets (as opposed to money)? Do the rules operate in a parentelic system or a system of some other kind? Are spouses treated more favourably

than children? What provision is made for extra-marital children, for adopted children, for step-children? Does cohabitation give rise to entitlement? How are same-sex couples treated? Broader questions also arise of a historical and comparative nature. Where, for example, do the rules in intestate succession come from in particular legal systems? Have they been influenced by the rules in other countries? How are the rules explained and how are they justified? To what extent have they changed over time? What are the long-term trends? And finally, are the rules satisfactory, and is there pressure for their reform? As in the first volume, this book will focus on Europe and on countries which have been influenced by the European experience such as Australia, New Zealand, South Africa, the United States of America, Quebec, and the countries of Latin America. Further chapters are devoted to Islamic Law and Nordic law. Opening with a discussion on Roman law and concluding with an assessment of the overall development of the law in the countries surveyed, this book will provide a wider reflection on the nature and purpose of the law of intestate succession.

First published in 1985, D. M. Armstrong's original work on what laws of nature are has continued to be influential in the areas of metaphysics and philosophy of science. Presenting a definitive attack on the sceptical Humean view, that laws are no more than a regularity of coincidence between stances of properties, Armstrong establishes his own theory and defends it concisely and systematically against objections. Presented in a fresh twenty-first-century series livery, and including a specially commissioned preface written by Marc Lange, illuminating its continuing importance and relevance to philosophical enquiry, this influential work is available for a new generation of readers.

Excerpt from The Modern Law of Personal Property The present work is intended to be the complement of the Modern Law of Real Property; in consequence of the favorable reception accorded to that work the Author has been induced to undertake this one. The same method has been adopted in particular, where it has appeared desirable, statutes have been quoted verbatim, and in like manner expositions of the law by Judges and Writers are given in their own words. What is common both to realty and to personalty and has been already treated of in the earlier work has not been repeated in this. The subjects of Bankruptcy and of Bills of Sale have been fully treated separate chapters have been devoted to the Bills of Exchange Act, to the Patents, Designs, and Trade Marks Act, and to the laws of Copyright; in the seventh, eighth, and twelfth Chapters will be found an outline of the law relating to Companies the provisions of the Married Women's Property Act, which has effected so many changes, will be found passim. This is the account of an American teenager who discovered a monastery in Tibet that was the inspiration for the legend of Shangri La. It might be categorized as a 'new age' or philosophy book, like the Celestine Prophecy, since it focuses on his spiritual training and their teachings in a novel-like format. Hard to believe, but interestingly, the sub-tropical region amongst the Himalayas that he describes finding, was later documented by explorers from National Geographic, then 'covered up'

(there is still evidence of this). Also interesting is that the author was apparently mentioned in the Edgar Cayce readings (the famous American psychic whose books have sold millions of copies), as someone who would one day bring an important message to the world.
