JUNE PALMER

Report University of Toronto Press

Island in the Stream introduces an original genre of ethnographic history as it follows a community on Mayotte, an East African island in the Mozambique Channel, through eleven periods of fieldwork between 1975 and 2015. Over this 40-year span Mayotte shifted from a declining and neglected colonial backwater to a full department of the French state. In a highly unusual postcolonial trajectory, citizens of Mayotte demanded this incorporation within France rather than joining the independent republic of the Comoros. The Malagasy-speaking Muslim villagers Michael Lambek encountered in 1975 practiced subsistence cultivation and lived without roads, schools, electricity, or running water; today they are educated citizens of the EU who travel regularly to metropolitan France and beyond. Offering a series of ethnographic slices of life across time, *Island in the Stream* highlights community members' ethical engagement in their own history as they looked to the future, acknowledged the past, and engaged and transformed local forms of sociality, exchange,

and ritual performance. This is a unique account of the changing horizons and historical consciousness of an African community and an intimate portrait of the inhabitants and their concerns, as well as a glimpse into the changing perspective of the ethnographer.

Valley of the Wild Stream Xlibris Corporation

Presents three great movements that brought Europe out of the Middle Ages and into Modernity: The Renaissance; The Growth of the English Constitution and, especially, The Growth of the English Parliament; and The Reformation. Focuses on the conflict between the principle of self-government and the principle of despotic government to determine which should rule and direct the lives of men. Volume 5 in the 7-volume *Streams of History* series, which presents a vivid picture of the growth of Western Civilization from the early source of the historic stream back in the Nile, the Tigris-Euphrates and the Indus valleys, and then its widening and deepening as it moves westward. The series highlights the contributions of each culture to the stream of history and shows how its contributions are caught up and carried on to future peoples and nations. The student is led to see how each grows out of that which precedes, and shadows forth what follows, and that the discovery of America, and its subsequent institutional development was the fruitage of a seed

which lay deep in the historic soul of Europe.

"Large organic debris has historically been an important element in small mountain streams of the Pacific Northwest. The debris serves to slow the movement of water and inorganic and fine organic matter through the channel. Debris may remain in the channel for decades or longer, and tends to stabilize some sections of a streambed and stream banks while destabilizing other areas. The combination of clear cutting and the complete removal of large debris in a channel may deprive a stream of this natural feature of streams for a century or longer. The consequences are likely to be downcutting and channelization" of the stream, accelerated transport of fine organic and inorganic sediment, and a possible decrease in biological productivity of the stream ecosystem. Therefore, stream debris management during logging operations should include leaving undisturbed the natural, stable organic debris in the channel.??The principal factors controlling the concentration,

stability, and functions of stream debris are the history and condition of the surrounding timber stand, flushing history of the channel, stability and abundance of bedload material, steepness of the channel and adjacent hillslopes, and slope stability in the drainage. Because of this complexity, each stream presents a unique situation, which should be inspected in the field and considered on an individual basis before a debris management decision is made."

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

Islands in the stream of history Blue Heron Press

The Thomas Ward is like a small stream in the mountains, that emerges from a tiny spring and trickles on down the hillside to join the creek on its way to the river. No attempt has been made to get all the information, about all the people who live, or have lived, within its boundaries. Neither is the material collected, considered to be the most important or free from errors. This book is just "a cup of water" dipped from the little stream, as it journeys on its way, no attempt is made to dip up all the water or stop its flow. It is hoped, that like the cup of cool water from the tiny stream, this book will refresh the reader, and the stream of time flows on. To those pioneers, both young and old who had the courage to combine all the natural resources which the creator so wisely stored in these mountains, rivers and valleys along with the brawn and brain that He gave man. The Miracle of the Desert came to be.

Wright's Unitarian thought from 1805 to 1961 is essentials to any UU history library.

Island in the Stream Routledge

Presents the geography of Italy and the life of Rome at three different periods of her growth: her infancy, her strong manhood, and her old age. Relates how Rome in her early years established herself in Italy, then engaged in conflict with Carthage, her most powerful neighbor and enemy, and finally extended her power all around the Mediterranean, giving to the world peace, law and order, and making unconsciously a highway both for Greek culture and for Christianity to spread to the West. Volume 3 in the 7-volume Streams of History series, which presents a vivid picture of the growth of Western Civilization from the early source of the historic stream back in the Nile, the Tigris-Euphrates and the Indus valleys, and then its widening and deepening as it moves westward. The series highlights the contributions of each culture to the stream of history and shows how its contributions are caught up and carried on to future peoples and nations. The student is led to see how each grows out of that which precedes, and shadows forth what follows, and that the discovery of America, and its subsequent institutional development was the fruitage of a seed which lay deep in the historic soul of Europe. Suitable for ages 9 and up.

Behold the Stream Schary Press

This assessment of the statesmanship, principles, and policies of Robert F. Kennedy places him "in the stream of history," to assess what came before his time in political life, what happened during that time, and what happened to his legacy after his assassination. Terrence Edward Paupp evaluates the themes and issues RFK confronted, responded to, and for which he provided visionary solutions. Paupp first chronicles the influence of Franklin D. Roosevelt's legacy as a prologue to the New Frontier and Great Society. During Robert F. Kennedy's time in power—both in his brother's administration and on his own in the US Senate—he struggled with striking a balance between power and purpose. In the years after John F. Kennedy's assassination, RFK emphasized the need to unite power and purpose, national and international concerns, ideals and practice. Much of this has been ignored, Paupp argues, by what C. Wright Mills called "the power elite." In assessing RFK's statesmanship, Paupp examines his commitments to human and civil rights, which linked themes and ideals within the US to those struggles taking place outside the country. Robert F. Kennedy brought zeal and passion to these problems by discussing the moral necessity of honoring human dignity while articulating practical solutions, policies, and programs to structural injustice. His legacy remains a beacon of light, intelligence, and hope in today's world.

The Stream of Time Holmfield, Man. : Holmfield History Book Committee

Located near the south shore of Long Island at the gateway to Nassau County, the village of Valley Stream has grown from a bucolic farming community in the 1840s to a dense suburban hub full of history and diversity. Consisting of communities named Foster's Meadow, Rum Junction, Skunk's Misery, and Hungry Harbor, the town saw nightlife and leisure blossom after Merrick Road was built and the South Side Railroad pulled in. The village incorporated in 1925, finding itself a center of industry as the location of the Ridgewood Reservoir's conduit pipe, Curtiss Field, Bulova Demco, and later, the birthplace of Snapple. Over the years, Valley Stream gained attention through many of its attractions, including the William R. Gibson Houses, Hoffman's, the Pavilion Royal, Green Acres Mall, the Rio Theatre, Valley Stream State Park, and Itgen's Ice Cream Parlour.

A Universal History of the World Routledge

Shows how the consciousness and sentiment of union gradually grew in the minds of the American people from 1789, when the Constitution was established through 1865, when it was decided by the Civil War that the United States is in reality an indissoluble union. Emphasizes the development of freedom: freedom of religion, freedom of labor, freedom of the press, freedom of the ballot, and freedom of education. Encourages the reader to enlarge and develop the principles of liberty bequeathed to him by carefully preserving and diffusing these liberties among his fellow men. Volume 7 in the 7-volume Streams of History series, which presents a vivid picture of the growth of Western Civilization from the early source of the historic stream back in the Nile, the Tigris-Euphrates and the Indus valleys, and then its widening and deepening as it moves westward. The series highlights the contributions of each culture to the stream of history and shows how its contributions are caught up and carried on to future peoples and nations. The student is led to see how each grows out of that which precedes, and shadows forth what follows, and that the discovery of America, and its subsequent institutional development was the fruitage of a seed which lay deep in the historic soul of Europe. Suitable for ages 12 and up.

Flowing through the heart of Cincinnati to the Ohio River, the Mill Creek is one of the most severely polluted & physically degraded urban streams in the United States. The book is a valuable case study on how human activity & land use impact water resources over time. It chronicles the stream's environmental history, beginning with a description of the creek's geological past & its pristine ecosystem in the early 1700s. The author examines the environmental impacts of forest clearcutting by early settlers, of industrialization & of channelization of the creek by the Army Corps of Engineers. The book ends with a summary of present day environmental problems & outlines a restoration strategy for repairing the damage. "This book will become the foundation for restoration work ahead & provides a model for people working to reclaim other streams in cities in crisis across the United States," said Paul Labovitz, Rivers, Trails & Conservation Assistance Program, National Park Service. "This volume will be useful to students in a variety of disciplines, including history, environmental & urban history, political science, regional & city planning, biology & to general readers concerned with environmental issues," said Zane L. Miller, Professor of History & Director, Center for Neighborhood & Community Studies, University of Cincinnati. Order from RUMCRP, Two Centennial Plaza #610, 805 Central Avenue, Cincinnati, OH 45202; (513) 352-1588.

Stream of History; Decorations by James Daugherty Routledge

First pictorial history of Asian Lutherans in the Evangelical Lutheran Church in America (ELCA) and its predecessor church bodies. The 275-page volume includes historical essays, congregational profiles, brief worker biographies, two theological appendixes and more. Behold the Stream is the third book in a trilogy about Asian Lutherans.

Island in the Stream

The Routledge Handbook of the History of Global Economic Thought offers the first comprehensive overview of the long-run history of economic thought from a truly international perspective. Although globalization has facilitated the spread of ideas between nations, the history of economics has tended to be studied either thematically (by topic), in terms of different currents of thought, or individually (by economist). Work has been published in the past on the economic thought traditions of specific countries, but this pioneering volume is unique in offering a wide-ranging comparative account of the development of economic ideas and philosophies on the international stage. The volume brings together leading experts on the development of economic ideas from across the world in order to offer a truly international comparison of the economics within nation-states. Each author presents a long-term perspective on economics in their region, allowing global patterns in the progress of economic ideas over time to be identified. The specially commissioned chapters cover the vast sweep of the history of economics across five world regions, including Europe (England, Scotland, Ireland, Italy Greece, Spain, Portugal, Germany, Sweden, Russia and the Ukraine), the Americas (the USA, Canada, Mexico and Central America, Spanish-Speaking South America, Brazil and the Caribbean), the Middle East (Turkey, Israel, Arab-Islamic Economics, Persia/Iran, North Africa), Africa (West Africa, Southern Africa, Mozambique and Angola), and the Asia-Pacific Region (Australia and New Zealand, China, Southeast Asia, the Asian Tigers, India.) This rigorous, ambitious and highly scholarly volume will be of key interest to students, academics, policy professionals and to interested general readers across the globe.

The Silent Stream

The Secretary of State in President Clinton's first term in office presents thirty-seven of his most important speeches, each introduced by an extensive essay that describes its occasion, purpose, and policy implications and includes personal reflections. Simultaneous. UP.

History, Physical Effects, and Management Implications of Large Organic Debris in Western Oregon Streams

Gives glimpses of some of the most characteristic features of the countries and peoples in ancient

times in the Near East: the early herders; those living in the two great river valleys-the Nile and the Tigris-Euphrates; and the Jews and Phoenicians living between these two valleys. Emphasizes the ideas each culture contributed to the general historical stream. Volume 1 in the 7-volume Streams of History series, which presents a vivid picture of the growth of Western Civilization from the early source of the historic stream back in the Nile, the Tigris-Euphrates and the Indus valleys, and then its widening and deepening as it moves westward. The series highlights the contributions of each culture to the stream of history and shows how its contributions are caught up and carried on to

future peoples and nations. The student is led to see how each grows out of that which precedes, and shadows forth what follows, and that the discovery of America, and its subsequent institutional development was the fruitage of a seed which lay deep in the historic soul of Europe. Suitable for ages 8 and up.
