Getting the Message Through, the companion volume to Rebecca Robbins Raines' *Signal Corps*, traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War, through its stages of growth and change, to its service in Operation DESERT SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to be sine qua non to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of the branch.

"Pollan keeps you turning the pages . . . cleareyed and assured." —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir,

travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

When you take your four-wheel-drive (4WD) truck or SUV off-road, there is a whole new world to see and experience. The off-road community is huge and welcoming, and there are lifestyle shows to attend and trail-driving events to experience. With seat time and practice, your technical skills will improve. However, do you really want to head into the forest blindfolded? Driving off-road requires much more attention, skills, discipline, and preparation than merely driving around obstacles. Being fully armed with information regarding the most updated techniques is critical for today's motorized off-road driving enthusiast. *The Ultimate Off-Road Driver's Guide* covers topics about what to bring along for a trail ride and how to interact with other trail users. This book covers the various 4WD systems and how they work, how to drive on various terrain (mud, sand, snow, and rocks), and what to do when encountering each of those elements. An entire chapter is devoted to getting unstuck. Covered also are ways to communicate when you lose cellular phone coverage as well as navigation options so that you don't end up lost and on the local news channel.

This book is mandatory preparation for your off-road toolbox!

"While our leaders in Washington argue over block grants and competing plans to reform the human services bureaucracy, grassroots movements all across the land are quietly developing effective solutions to the problems of hunger, housing, employment, and education. Often overlooked by the media, these grassroots programs are not based on any radical economic theory, nor are they tied to any political agenda. They simply work, and we know they work because they are in place now, achieving astonishing results." "In the tradition of David Osborne and Ted Gaebler's *Reinventing Government*, Garr's close examination of what is actually working out there allows him to present a set of principles to guide any effort to help people climb out of poverty. Garr shows how the programs that work are guided by clear objectives; foster self-reliance rather than dependency by building on people's strengths; take a comprehensive approach to the complex array of an individual's problems and use in a variety of tools at once; deal with people one on one as distinctly important individuals; focus on prevention; demonstrate strong leadership."--BOOK JACKET. If you only buy one book to improve your life this year, make it this one. Temple Grandin, Liane Holliday Willey, Anita Lesko, Stephen M. Shore, and many other Aspie mentors, offer their personal guidance on coping with the daily stressors that Aspies have identified as being the most significant, in order of urgency - anxiety, self-esteem, change, meltdowns, depression, friendship, love, and much, much more. Based on years of personal experience, this book is packed with advice from Aspie mentors who have all been there and done that! World expert Dr. Tony Attwood rounds up each chapter with professional analysis and extensive recommendations. He includes essential information on destructive strategies that may look attractive, but that have counter-productive effects. Including full color artwork from Aspie artists showing visually how they interpret each stressor, this is THE inspirational guide to life for young adults, the newly diagnosed, and as a life-long reference for anyone on the spectrum - written by Aspies for Aspies.

A symposium and celebration was held at Aberdeen Proving Ground (APG), Maryland, in November 1996, to recognize and commemorate seminal Army contributions to the birth and development of modern computing. Primarily inspired by the 50th anniversary of the invention of the world's first general purpose electronic computer (the ENIAC), this two-day event also celebrated the dedication at APG of significant new computational resources provided by the Office of Secretary of Defense. On this occasion, scores of computing pioneers gathered at APG to reminisce about the accomplishments that stemmed from the Army's computation needs during World War II in particular, the need for the firing and bombing tables that were essential for accurate targeting of ground- and air-delivered ordnance.

The need for current and better quality training materials was cited by both certification program instructors and coordinators. In recognition of these shortcomings, the U. S. Department of Agriculture (USDA) funded a major project with Penn State University, The Ohio State University, and the National Safety Council to develop a National Safe Tractor and Machinery Operation Program (NSTMOP). The result is the NSTMOP Student Manual. This manual, including the task sheets, is the primary curriculum resource developed and designed to be used in a variety of instructional settings. The task sheets are divided into 6 sections: introduction;

safety basics; agricultural hazards; the tractor; connecting and using implements with the tractor; and material handling (skid steers, ATV, and utility vehicles). There are a total of 77 task sheets, 48 are identified as core topics. Also included are a skills and driving test layout map and evaluation forms.

After her Click'd catastrophe, Allie Navarro is determined to redeem herself. So when the class gets an assignment to create a mobile game from recycled code, Allie pairs up with

Courtney, her best friend from CodeGirls camp, to create the perfect app: Swap'd. Kids buy, sell, and trade stuff at school all the time. Candy. Clothes. Video games. Slime. Why not make a fiercely competitive, totally anonymous, beat-the-clock game out of it? Once Swap'd is in full-swing, Allie is certain that it's the answer to all her problems. She's making quick cash to help Courtney buy that really expensive plane ticket to come visit her. It's giving her an excuse to have an actual conversation with her super-secret crush. And it looks like she might finally beat her archenemy-turned-friend, Nathan. She's thought of everything. Or? has she? The second book in the Click'd series by New York Times best-selling author Tamara Ireland Stone weaves together middle school friendship, first crushes, and serious coding skills in another fun, fast-paced, and empowering novel that will have readers cheering Allie on from the first page to the last.
