With the
Maritime
Labour
Convention
now in force
(as of August
2013), the
shipping
industry is
faced with a
new
international
convention
that has

comprehensiv
e implications
across all
sectors. This
vital text
provides
timely
analysis and
thought-
provoking
essays
regarding the
Convention's
application
and
enforcement
in practice.
Hailed as the
"Seafarer's Bill
of Rights" and
the "fourth
pillar" of the
international
regulatory
regime for
quality
shipping, the
Maritime
Labour
Convention is

set to
significantly
alter the
playing field
for key
stakeholders.
This book
offers diverse
and
interesting
commentary
in respect of
the
Convention's
impact on
core sectors of
the shipping
industry,
identifying
both strengths
and
weaknesses of
the
Convention,
as well as
potential
hurdles that
will need to be
overcome.
Each chapter

focuses on a different aspect of the Convention, ranging from individual rights of the seafarer to challenges of flag State implementation. Special attention is given to enforcement through examination of the innovative measures provided in the Convention itself, along with discussion of domestic enforcement mechanisms in certain States. Furthermore,

the book evaluates whether the Convention has filled existing gaps in maritime labour law, resolved prior difficulties or created new problems. This book expertly addresses issues of fundamental importance to national authorities, shipping professionals and associations, maritime lawyers and academics worldwide. --- In memory of Richard Shaw- --

 72: Celestial Logbooks of the Gold and Copper Invaders describes the bright celestial objects that were used for calendars and

<p>navigation for the last 10,000 years. This required counting and measuring angles which the prehistory and even pre-Ice Age cultures knew. This enabled these cultures to hunt, gather, and explore by boat looking for precious metals to sustain their cultures. Initial editorial reviews: "WOW, Magnificent, Beyond Significant." Jim Egan, Curator, Newport Tower Museum:</p>	<p>"Brilliant out of the box thinking." A past Kirkus Review stated: "...McMahon's reasoning is far from far-fetched... with an elegantly simple process of following history's clues...the ancient rock art symbols of seafaring communication." Lonnie Davis, Curator Historian, Ocmulgee Mounds National Historical Park, "Eye-opening ... The blinders finally came off!" The following</p>	<p>bright celestial objects are described and analyzed: Sun: circles, rectangles, diamonds, spirals, and solstice latitudes Moon: crescents, circles, rectangles, and lunar standstill latitudes Venus (72): hearts, rectangles, pentagons, and relative longitudes Sirius and Canopus: the eyes as pointer stars to the North and South Pole stars North Pole stars: Polaris,</p>
---	---	--

Thuban, Vega, and Deneb as the golden 30° rectangle Winter Triangle: Orion, the hunter, and his dogs, the equilateral triangle Summer Navigation Triangle: Northern Cross as passageways and chronometers Golden Location Triangle: Libra, le Balance, what is shipped is received The celestial object's geometries were built into a culture's mound and	temple structures becoming celestial observatories. These were sacred because they represented information concerning the locations of mines, storage facilities, harbors, temples, and "home." Geometric diffusionism came from the westward- bound seafaring explorers with their roots coming from the Fertile Crescent. Celestial counting and geometries	form a universal calendar and navigation language. The rock art shows the actual relative latitudes to the Sun solstices and Venus-based relative longitudes to a prime starting location of island locations (stargates) that were associated with the seafaring trips in search of gold and copper. <i>Our Country</i> Springer The Congressional Record is the

interdisciplinar
y collection
brings
together
experts in
various fields
of ship
archaeology
to shed new
light on the
role played by
ships and
sailing in the
exchange
networks of
the
Mediterranean

. Covering all parts of the Eastern Mediterranean , these outstanding contributions delve into a broad array of data – literary, epigraphical, papyrological, iconographic and archaeological – to understand the trade routes that connected the economies of individual cities and kingdoms. Unique in its interdisciplinary approach and focus on the Hellenistic period, this collection digs into the questions that others don't think to ask, and comes up with (sometimes surprising) answers. It will be of value to researchers in the fields of naval architecture, Classical and Hellenistic history, social history and ancient geography, and to all those with an interest in the ancient world or the seafaring life. *The Battle of Maldon* CRC Press

While there is growing evidence of the importance of marine ecosystems for our societies, evidence shows also that pressures from human activities on these ecosystems are increasing, putting the health of marine ecosystems at stake worldwide. Hence, Blue Economy is becoming an important component of future socio-economic development strategies (e.g. this is called Blue Growth in Europe), that

eventually can result in increasing pressures at sea, and despite the current regulatory framework (in particular with the Oceans Act, in USA or Canada, and the Marine Strategy Framework Directive, in Europe), it is likely that this situation will continue in the future. Ensuring all those connected to the sea, directly or indirectly, gain a better understanding of the importance of

the seas, the human-sea interactions and opportunities to act better and reduce impacts from human pressures, is central to Ocean Literacy (OL). Receiving increasing attention in Europe and USA, OL is a challenge for all parts of society: educators & trainers, children and professionals, civil society and scientists, consumers and policy/decision makers. It is seen as part

of the package of solutions that will lead to a change in behavior and practice, thus reducing impacts and resulting in healthier marine ecosystems, whilst allowing development opportunities offered by seas are seized in a sustainable manner. This Research Topic focuses on the issues and options for effective OL worldwide. It discusses: (1) existing experiences in OL (formal and informal

education for children, training for professionals, tools for raising awareness of consumers - and of investors in the marine sectors...) and their effectiveness (from understanding better to acting differently); (2) the role OL could play (in interaction with innovation, regulation, economic incentive, social norms...) to support human capital development

as key component of sustainable growth; and (3) pre-conditions for effective OL for different sectors and target groups. Questions relevant to OL include: Which knowledge - produced by whom - to share and how? Who to target - and how to effectively reach those targeted? How to design OL initiatives - including by mobilizing those targeted (via living lab approaches e.g.) - to ensure

effective OL and pave the way for behavior change? What are the knowledge gaps that limit our capacity to design effective OL? As scientists, it is likely you have many more questions to offer and discuss.

This book constitutes the refereed proceedings of the Third International Conference on Learning and Collaboration Technologies,

LCT 2016, held as part of the 18th International Conference on Human-Computer Interaction, HCI 2016, in Toronto, Canada, in July 2016, in conjunction with 14 thematically similar conferences. The 1287 papers presented at the HCI 2016 conferences were carefully reviewed and selected from 4354 submissions. The papers cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The papers included in this volume are organized in the following thematic sections: instructional design; interaction techniques and platforms for learning; learning performance; web-based, mobile and ubiquitous learning; intelligent learning environments; learning technologies; collaboration technologies; and cultural and social aspects of learning and collaboration technologies. *North Atlantic Treaty Organization. NATO posture and U.S. strategy* The Seafarer's Mind is a wonderful resource for seafarers. The book is rich in narrative and case studies and covers a wide range of issues and challenges facing sailors

on the high seas. A hard hitting account which unpacks the realities of a modern version of indentured labour, the author provides hope in the often harsh world of seafaring. This is a practical guide to living in isolating and confined situations where temptations abound and moral compasses are often abandoned. Martin Otto is the world's leader in serving seafarers

through his international mission work. He is to be commended for being God's advocate in such an insightful, humble and practical manner. This book will become a widely read text and is sure to become a key reference for all seafarers seeking to live a Godly life in an often harsh and unforgiving environment. I recommend it wholeheartedly. Professor Ross Dowling AM Global

 qualifications.
 This handy
 revision guide
 is the one
 book that
 Deck Officer
 Cadets,
 Master and
 Deck Officers
 will want by
 their side
 when studying
 for the much-
 feared oral
 exams. Expert
 marine
 training
 director Simon
 Jinks strips

back the masses of information to the core essential points that are easy to absorb and quick to remember when it comes to the oral assessment. The MCA Deck Officer (Officer of the Watch, Chief Mate and Master) syllabi cover a vast amount of information that candidates are required to understand and use in their oral exam, which for many presents a major stumbling block to

qualification. While it inevitably takes a long time for candidates to build up this wealth of knowledge, this study aid is the perfect refresher, listing the key points and including helpful sample questions and worked examples on tidal working, radar plotting and more. Written in simple terms, this trusted crammer covers all the principal areas of the MCA's exam syllabus, including

sections on business and law conventions, pollution prevention, responses to emergencies and distress signals. Clearly presented, it is packed with straightforward diagrams and flow charts, making it ideal for revising. This is an invaluable reference for all international STCW Deck Officer candidates, and covers both MCA and Flag State oral exams. It is also suitable

for Near Coastal and Boatmaster apprentices, Workboat crew apprentices, Yachtmaster Offshores, Yachtmaster instructors, and fishermen going for their fishing licences on larger vessels, and for shore

workers such as vessel superintendents, maritime managers and trainers. There is specific information for all vessels, with sections on smaller, code and domestic vessels.
