Hiring a nanny--and
getting along with her
afterward--may be one of
the most important things
that parents do, yet many
of us approach the whole
business with fear and

trembling, or at least a lot
of questions. Even
parents who may manage
dozens of employees at
work can be at a loss
when it comes to dealing
with the person who will
be looking after their
children. Nanny, au pair,
caregiver--no matter the
term, the thorny issues
remain the same: -How do
you find someone you like

and trust? -Should you
invite the nanny to
Thanksgiving dinner? -
When should you raise
her fee--and by how
much? -What should you
do when the au pair is a
flirt? -How do you sort out
the laundry and other
chores? -Nanny
surveillance--should you
spy? The Nanny Book
provides real, down-to-

earth solutions for almost every conceivable issue or problem. Filled with advice gleaned through interviews with families and nannies, this book will turn parents into their own experts. Other books focus almost exclusively on hiring a caregiver. The Nanny Book is the only guide that gives smart, parent-tested solutions to those sticky situations that can make or break the relationship.

There are many books that have been written about how to manipulate, amend, and control the

soil to enable high-yield crop production. This is not one of those books. This book will empower you to restore the capacity of your soil to function to produce crops while reducing your dependency on expensive inputs. Soil health is about restoring the capacity of the soil to function. Currently, most agricultural and garden soils are essentially dysfunctional. This book will open your eyes to the truth about how soil is supposed to function and help you restore it to full

health.

A Manual of Common Law WorldFish

◆EVERY art and every inquiry, and similarly every action and pursuit, is thought to aim at some

good; and for this reason the good has rightly been declared to be that at which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the products to be better than the activities. Now, as there are many actions, arts, and sciences, their ends also are many; the end of the medical art is health, that of shipbuilding a vessel,

that of strategy victory, that of economics wealth. But where such arts fall under a single capacity-as bridle-making and the other arts concerned with the equipment of horses fall under the art of riding, and this and every military action under strategy, in the same way other arts fall under yet others- in all of these the ends of the master arts are to be preferred to all the subordinate ends; for it is for the sake of the former that the latter are pursued. It makes no difference whether the

activities themselves are the ends of the actions, or something else apart from the activities, as in the case of the sciences just mentioned.◆
