JUSTICE LACI

The Critique of Judgment
Psychology Press
Originally published in 1989, a guide for students coming for the first time to the study of democracy, who often find it difficult to trace the development of the idea and to place it in historical context. In this accessible and informative text, Jon Roper introduces the reader to arguments for and against criticisms of the concept of democracy. He does so through examination of the statements and writings of major nineteenth-century politicians and philosophers, in the United States and the United Kingdom.

Politics and the English Language Routledge

Why do critics feel impelled to unmask and demystify the works that they read? What is the rationale for their conviction that language is always withholding some important truth, that the critic's task is to unearth what is unsaid,

naturalized, or repressed? These are the features of critique, a mode of thought that thoroughly dominates academic criticism. In this book, Rita Felski brilliantly exposes critique's more troubling qualities and proposes alternatives to it. Critique, she argues, is not just a method but also a sensibility--one best captured by Paul Ricoeur's phrase "the hermeneutics of suspicion." As the characteristic affect of critique, suspicion, Felski shows, helps us understand critique's seductions and limitations. The questions that Felski poses about critique have implications well beyond intramural debates among literary scholars. Literary studies, says Felski, is facing a legitimation crisis thanks to a sadly depleted language of value that leaves the field struggling to find reasons why students should care about Beowulf or Baudelaire. Why is literature worth bothering with? For Felski, the tendencies to make literary texts the object of suspicious reading or, conversely, impute to them qualities of critique, forecloses too many other possibilities. Felski offers

an alternative model that she calls "postcritical reading." Rather than looking behind the text for its hidden causes, conditions, and motives, she suggests that literary scholars place themselves in front of a text, reflecting on what it calls forth and makes possible. Here Felski enlists the work of Bruno Latour to rethink reading as a co-production between actors, rather than an unraveling of manifest meaning, a form of making rather than unmaking. As a scholar with an abiding respect for theory who has long deployed elements of critique in her own work, Felski is able to provide an insider's account of critique's limits and alternatives that will resonate widely in the humanities.

[Saving Your Marriage Before It Starts](#) Zondervan

A powerful challenge to the way we understand the politics of race and the history of anti-racist struggle Whether class or race is the more important factor in modern politics is a question right at the heart of recent history's most contentious debates.

Among groups who should readily find common ground, there is little agreement. To escape this deadlock, Asad Haider turns to the rich legacies of the black freedom struggle.

Drawing on the words and deeds of black revolutionary theorists, he argues that identity politics is not synonymous with anti-racism, but instead amounts to the neutralization of its movements. It marks a retreat from the crucial

passage of identity to solidarity, and from individual recognition to the collective struggle against an oppressive social structure. Weaving together autobiographical reflection, historical analysis, theoretical exegesis, and protest reportage, *Mistaken Identity* is a passionate call for a new practice of politics beyond colorblind chauvinism and "the ideology of race."

Contemporary deep-reaching changes – whether in financial or real economy, in Europe's political conditions, in the context of scientific theories, in the field of global (environmental) security, or gender relations – are also a challenge to philosophy. The volume comprises cutting-edge scholarly articles from renowned philosophers with various geographical backgrounds

and from different philosophical strands. Next to investigating general questions as to the relation of philosophy and critique (What is philosophical critique and which philosophical concepts of critique are of importance today? Where do we need it most? Where are its limits?), the articles focus on issues like theories of democracy and modes of election; the roles of emotions in the political realm; challenges from a widespread discontent in society to politics and science; changes to social identities and different theoretical approaches to social identity formation. The book is indispensable for all who are interested in what contemporary philosophy has to say on crucial issues of our time.

Real critique has become a lost skill among collaborative teams today. Critique is intended to help teams strengthen their designs, products, and services, rather than be used to assert authority or push agendas under the guise of "feedback." In this practical guide, authors Adam Connor and Aaron Irizarry teach you techniques, tools, and a

framework for helping members of your design team give and receive critique. Using firsthand stories and lessons from prominent figures in the design community, this book examines the good, the bad, and the ugly of feedback. You'll come away with tips, actionable insights, activities, and a cheat sheet for practicing critique as a part of your collaborative process. This book covers: Best practices (and anti-patterns) for giving and receiving critique Cultural aspects that influence your ability to critique constructively When, how much, and how often to use critique in the creative process Facilitation techniques for making critiques timely and more effective Strategies for dealing with difficult people and challenging situations

A Theory of Justice

For liberals, the question "Do others live rightly?" seems to demand a follow-up question: "Who am I to judge?" Peaceful coexistence, in this view, is predicated on restraint from morally evaluating our peers. But Rahel Jaeggi argues that criticizing is not only valid but also useful. Moral judgment is no error—the

error lies in how we go about it.

Baldwin's personal reflections on movies gathered here in a book-length essay are also an appraisal of American racial politics. Offering an incisive look at racism in American movies and a vision of America's self-delusions and deceptions, Baldwin challenges the underlying assumptions in such films as *In the Heat of the Night*, *Guess Who's Coming to Dinner*, and *The Exorcist*. Here are our loves and hates, biases and cruelties, fears and ignorance reflected by the films that have entertained us and

shaped our consciousness. And here too is the stunning prose of a writer whose passion never diminished his struggle for equality, justice, and social change.

The Intimate Critique
"O'Reilly Media, Inc."

For a long time now, readers and scholars have strained against the limits of traditional literary criticism, whose precepts—above all, "objectivity"—seem to have so little to do with the highly personal and deeply felt experience of literature. *The Intimate Critique* marks a movement away from this tradition. With their rich spectrum of personal and passionate voices, these essays challenge and ultimately breach the boundaries between criticism and narrative, experience and expression, literature and life. Grounded in feminism and connected to the race, class, and gender paradigms in cultural studies, the twenty-six contributors to this volume—including Jane Tompkins, Henry Louis Gates, Jr., Shirley Nelson Garner, and Shirley Goek-Lin Lim—respond in new, refreshing ways to literary subjects ranging from Homer to Freud, Middlemarch to The

Woman Warrior, Shiva Naipaul to Frederick Douglass. Revealing the beliefs and formative life experiences that inform their essays, these writers characteristically recount the process by which their opinions took shape--a process as conducive to self-discovery as it is to critical insight. The result—which has been referred to as "personal writing," "experimental critical writing," or "intellectual autobiography"—maps a dramatic change in the direction of literary criticism. Critique as Social Practice
Duke University Press
This book is a complete translation of Marx's critical commentary on paragraphs 261-313 of

Hegel's major work in political theory. In this text Marx subjects Hegel's doctrine on the internal constitution of the state to a lengthy analysis. It was Marx's first attempt to expose and criticize Hegel's philosophy in general and his political philosophy in particular. It also represents his early efforts to criticize existing political institutions and to clarify the relations between the political and economic aspects of society. The Critique provides textual evidence in support of the argument that Marx's early writings do not exhibit radically different doctrinal principles and theoretical and practical concerns from his later work. This edition also includes a translation of the introduction Marx wrote for his proposed revised version of the Critique which he never completed. In a substantial introduction, Professor O'Malley provides valuable information on Marx's intellectual development.

Women in the Fine Arts, from the Seventh Century B.C. to the Twentieth Century A.D.
Cambridge University Press
In the past 15 years a host of critical thinking

books have appeared that teach students to find flaws in the arguments of others by learning to detect a number of informal fallacies. This book is not in that tradition. The authors of this book believe that while students learn to become vicious critics, they still continue to make the very mistakes they criticize in others. Thus, this book has adopted the approach of teaching the construction of good arguments first and then introducing criticism as a secondary skill. Moreover, the emphasis of the book is not on learning to name fallacies, but on being able to identify weaknesses in an argument so as to be able to construct an effective critique of that argument. The book is accompanied by a workbook featuring a wealth of examples to help students acquire the material.
