Leveraged Learning is a deep dive into the trends forcing changes in the current educational landscape, and the opportunity that they create for experts with something to teach, and the lifelong learners that they serve.

Liberal Education: Analog Dreams in a Digital Age Independently Published

"In 1935, Adolf Hitler declared Munich the "Capital of the Movement." It was here that he developed his anti-Semitic beliefs and founded the Nazi party. Though Hitler's immediate milieu during the 1910s and 1920s has received ample attention, this book argues that the Munich of this period is worthy of study in its own right and that the changes the city underwent between 1918 and 1923 are absolutely crucial for understanding the rise of antisemitism and eventually Nazism in Germany. Before 1918, Munich had a decidedly cosmopolitan

flavor, but its open atmosphere was shattered by the November Revolution of 1918-19. Jews were prominently represented among many of the European revolutions of the late 1910s and early 1920s, but nowhere did Jewish revolutionaries and government representatives appear in such high numbers as in Munich. The link between Jews and communist revolutionaries was especially strong in the minds of the city's residents. In the aftermath of the revolution and the short-lived Socialist regime that followed, the Jews of Munich experienced a massive backlash. The book unearths the story of Munich as ground zero for the racist and reactionary German Right, revealing how this came about and what it meant for those who lived through it"--

Money Crown House Publishing Ltd
The ebook is designed to be read on devices with large color displays The Kindle edition is incompatible with iOS. See below for a list of supported devices. This second volume of *Sapiens: A Graphic History*, the full-color graphic adaptation of Yuval Noah Harari's #1 New York Times bestseller, focuses on the Agricultural Revolution—when humans fell into a trap we've yet to escape: working harder and harder with diminishing returns. What if humanity's major woes—war, plague, famine and inequality—originated 12,000 years ago, when Homo sapiens converted from nomads to settlers, in pursuit of the fantasy of productivity and efficiency? What if by seeking to control plants and animals, humans ended up being

controlled by kings, priests, and Kafkaesque bureaucracy? Volume 2 of *Sapiens: A Graphic History—The Pillars of Civilization* explores a crucial chapter in human development: the Agricultural Revolution. This is the story of how wheat took over the world; how an unlikely marriage between a god and a bureaucrat created the first empires; and how war, plague, famine, and inequality became an intractable feature of the human condition. But it's not all doom and gloom with this book's cast of entertaining characters and colorful humorous scenes. Yuval, Zoe, Prof. Saraswati, Cindy and Bill (now farmers), Detective Lopez, and Dr. Fiction, all introduced in Volume 1, once again travel the length and breadth of human history, this time investigating the

impact the Agricultural Revolution has had on our species. The cunning Mephisto shows them how to ensnare humans, King Hammurabi lays down the law, and Confucius explains harmonious society. The origins of modern farming are introduced through Elizabethan tragedy; the changing fortunes of domesticated plants and animals are tracked in the columns of the *Daily Business News*; the story of urbanization is portrayed as a travel brochure, offering discount journeys to ancient Babylon and China; and the history of inequality unfolds in a superhero detective story; with guest appearances by historical and cultural personalities throughout such as Thomas Jefferson, Scarlett O'Hara, Margaret Thatcher, and John Lennon. *Sapiens: A Graphic History*,

Volume 2 is a radical, witty and colorful retelling of the story of humankind for adults and young adults, and can be read on its own or in sequence with Volume 1.

Special Operations in the Age of Chivalry, 1100-1550 eBook Partnership

The first volume of the graphic adaptation of Yuval Noah Harari's global phenomenon and smash SUNDAY TIMES #1 BESTSELLER. Featuring 256 pages of gorgeous full-colour illustrations and wrapped in a beautiful package - this is the perfect Christmas gift for the curious beings in your life. One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one-homo sapiens. What happened to the others? And what may happen to us? In this first volume of

the adaptation of his ground-breaking book, renowned historian Yuval Harari tells the story of humankind's creation and evolution, exploring the ways in which biology and history have defined us and enhanced our understanding of what it means to be "human". From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* challenges us to reconsider accepted beliefs, connect past developments with contemporary concerns, and view specific events within the context of larger ideas. Featuring easy-to-understand text covering the first part of the original edition, this adaptation of the mind-expanding book furthers the ongoing conversation as it introduces Harari's ideas to a wider new readership.

'[A] wonderful graphic novel... Smart, funny and dipped deep in the reality of what we as a species are...' Big Issue
Books of the Year

Mapping the Future of Undergraduate Career Education Peter Cuomo

A groundbreaking investigation of how illicit commerce is changing the world by transforming economies, reshaping politics, and capturing governments. In this fascinating and comprehensive examination of the underside of globalization, Moises Naím illuminates the struggle between traffickers and the hamstrung bureaucracies trying to control them. From illegal migrants to drugs to weapons to laundered money to counterfeit goods, the black market produces enormous profits that are reinvested to create new businesses,

enable terrorists, and even to take over governments. Naím reveals the inner workings of these amazingly efficient international organizations and shows why it is so hard — and so necessary to contain them. Riveting and deeply informed, *Illicit* will change how you see the world around you.

Education Trends in a Post-Pandemic Future in the Fields of Engineering, Science, Arts, Humanities, Commerce, Economics, Social Sciences, Law and Management - Challenges and Opportunities Baker Academic

In *Building a Learning Nation*, Chris Pratt and Allison Chin use powerful evidence to expose serious fault lines in the English learning and education system. The authors show that the result of a

thirty-year political consensus on education has been growing child mental ill-health, high levels of educational underachievement, major skill shortages, and a crisis in the retention and recruitment of teachers. Increasing numbers of children leading dysfunctional home lives, coupled with ineffective government education and skills policies over decades, are identified as the principal causes. The book explains how these problems make a defining contribution to the country's sluggish economic performance and deep social divisions. Above all else, *Building a Learning National* provides a compelling case for change. Unlike other critiques of contemporary education it provides a well thought out, workable alternative: promoting lifelong learning

for all; tackling underachievement; supporting families; radically changing the conditions within which schools operate; and developing the skills the nation needs.

Leveraged Learning National Academies Press

Renaissance military memoirs studied for what they reveal of contemporary attitudes towards war, selfhood and identity. This is a study of autobiographical writings of Renaissance soldiers. It outlines the ways in which they reflect Renaissance cultural, political and historical consciousness, with a particular focus on conceptions of war, history, selfhood and identity. A vivid picture of Renaissance military life and military mentality emerges, which sheds light on the attitude of

Renaissance soldiers both towards contemporary historical developments such as the rise of the modern state, and towards such issues as comradeship, women, honor, violence, and death. Comparison with similar medieval and twentieth-century material highlights the differences in the Renaissance soldier's understanding of war and of human experience.

The Third Industrial Revolution

Anchor

#1 NEW YORK TIMES BESTSELLER • In *Sapiens*, he explored our past. In *Homo Deus*, he looked to our future. Now, one of the most innovative thinkers on the planet turns to the present to make sense of today's most pressing issues. "Fascinating . . . a crucial global conversation about how to take on the

problems of the twenty-first century."—Bill Gates, *The New York Times* Book Review **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES AND PAMELA PAUL, KQED** How do computers and robots change the meaning of being human? How do we deal with the epidemic of fake news? Are nations and religions still relevant? What should we teach our children? Yuval Noah Harari's *21 Lessons for the 21st Century* is a probing and visionary investigation into today's most urgent issues as we move into the uncharted territory of the future. As technology advances faster than our understanding of it, hacking becomes a tactic of war, and the world feels more polarized than ever, Harari addresses the challenge of navigating life in the face of constant

and disorienting change and raises the important questions we need to ask ourselves in order to survive. In twenty-one accessible chapters that are both provocative and profound, Harari builds on the ideas explored in his previous books, untangling political, technological, social, and existential issues and offering advice on how to prepare for a very different future from the world we now live in: How can we retain freedom of choice when Big Data is watching us? What will the future workforce look like, and how should we ready ourselves for it? How should we deal with the threat of terrorism? Why is liberal democracy in crisis? Harari's unique ability to make sense of where we have come from and where we are going has captured the imaginations of

millions of readers. Here he invites us to consider values, meaning, and personal engagement in a world full of noise and uncertainty. When we are deluged with irrelevant information, clarity is power. Presenting complex contemporary challenges clearly and accessibly, *21 Lessons for the 21st Century* is essential reading. "If there were such a thing as a required instruction manual for politicians and thought leaders, Israeli historian Yuval Noah Harari's *21 Lessons for the 21st Century* would deserve serious consideration. In this collection of provocative essays, Harari . . . tackles a daunting array of issues, endeavoring to answer a persistent question: 'What is happening in the world today, and what is the deep meaning of these events?'"—BookPage (top pick)

Summary of 21 Lessons for the 21st Century by Yuval Noah Harari

HarperCollins

This book brings together key perspectives from scholars in the Global South and Global North to illustrate diverse ways in which the UN's Global Citizenship Education (GCED) agenda can promote social justice and be used as a vehicle for negotiating and learning about diverse and shared objectives in education and the global public sphere. Recognizing the historical function of education as a prominent public sphere site, this book addresses questions around how forms of global education can serve as public sphere sites in various contexts today and in the future. Specifically, it questions established notions of education and proposes new

interpretations of the relationship between practices of education and the public sphere to meet the needs of our contemporary turbulent era and a post-2020 world. By offering conceptual analyses, examples of policy and educational practices which promote global learning, democratic citizenship, common good, and perspective-taking, the text offers new critical understandings of how GCED can contribute to the public responsibilities and roles of education. Chapters consider examples such as non-formal adult education at the Mexico-US border, teachers' responsibilities in Japan and Finland, developments in education policy and practices in Brazil, civic religious teachings in Canada, online learning in the United States and China,

and support to the participation of women in higher education in Pakistan. Given its unique approach, and the range of case studies it brings together, this book is a timely addition to the literature on education in the global public sphere. It will prove to be an invaluable resource for scholars working at the intersections of global education and transnational education policies, and for teachers involved in global education.

Education for Life and Work

HarperCollins

A complete summary of Yuval Noah Harari book 21 Lessons for the 21st Century About the original book: 21 Lessons for the Twenty-First Century is an in-depth look at present world politics and humanity's immediate future written

by historian, philosopher, and prominent author Yuval Noah Harari. Harari believes that the coming together of biotechnology and artificial intelligence might spell the end of history, with certain people becoming godlike.

Despite the global implications of this issue, most individuals are distracted by irrelevant information and are unaware of the argument taking place around them. - The book is divided into five sections: - A discussion of the primary technological and political challenges confronting the global community - Potential responses to these challenges - An analysis of how humans can rise to the occasion to help solve these challenges - A discussion of whether humans can truly comprehend the global nature of these problems - The Harari's

solution for assisting humans in gaining clarity.

Sapiens Routledge

The Annual Review of Comparative and International Education covers significant developments in the field of comparative and international education. This 2020 edition begins with a collection of discussion essays about comparative education trends and directions written by both professional and scholarly leaders.

Transformative Education for Regeneration and Wellbeing Emerald Group Publishing

We know that power is shifting: From West to East and North to South, from presidential palaces to public squares, from once formidable corporate behemoths to nimble startups and,

slowly but surely, from men to women. But power is not merely shifting and dispersing. It is also decaying. Those in power today are more constrained in what they can do with it and more at risk of losing it than ever before. In *The End of Power*, award-winning columnist and former Foreign Policy editor Moisés Naím illuminates the struggle between once-dominant megaplayers and the new micropowers challenging them in every field of human endeavor. Drawing on provocative, original research, Naím shows how the antiestablishment drive of micropowers can topple tyrants, dislodge monopolies, and open remarkable new opportunities, but it can also lead to chaos and paralysis. Naím deftly covers the seismic changes underway in business, religion,

education, within families, and in all matters of war and peace. Examples abound in all walks of life: In 1977, eighty-nine countries were ruled by autocrats while today more than half the world's population lives in democracies. CEO's are more constrained and have shorter tenures than their predecessors. Modern tools of war, cheaper and more accessible, make it possible for groups like Hezbollah to afford their own drones. In the second half of 2010, the top ten hedge funds earned more than the world's largest six banks combined. Those in power retain it by erecting powerful barriers to keep challengers at bay. Today, insurgent forces dismantle those barriers more quickly and easily than ever, only to find that they themselves become vulnerable in the

process. Accessible and captivating, Naím offers a revolutionary look at the inevitable end of power—and how it will change your world.

Measuring Up in Higher Education
Springer

This book presents essential insights into lifelong learning and education in healthy and sustainable cities, providing a basis for strategies to help achieve the 2030 Agenda sustainable development and health promotion goals. The interface between environment, health and lifelong learning is fundamental to attaining these goals, and as such, the book gathers interdisciplinary reflections from researchers, educators and other experts concerning the links between environmental quality, human health, human education and well-being, and

addressing inequality, unplanned urbanization, migration, lifestyles, and consumption and production patterns. Topics include: Urban planning to address inequality in health and urban poverty; Healthy cities and healthy environments; Governance for sustainable development; Social determinants of health oriented on sustainable development goals; Education and lifelong learning for sustainability; Energy security, access and efficiency; Sustainable cities, buildings and infrastructure.

Annual Review of Comparative and International Education 2020 Simon and Schuster

The essays in this collection contemplate the various intersections and barriers between artificial intelligence along with

the values and practices of liberal education. For the proponents of liberal education as a core component of undergraduate education, the study of literature, history, philosophy, and the social sciences, like their objects and their forms of practice, are perceived to be about what is essentially human. In spheres previously thought to be exclusively human domains, modern, digitally-constructed artificial intelligence has profound implications for liberal studies, how they may be practiced, and why they are important. This collection explores the implications of AI and the world it is shaping as a potential threat and augmentation of liberal education. These essays also demonstrate how liberal studies illuminate the meaning and significance of AI and how they have

shaped its development and character. The contributors to this volume write from the perspectives of philosophy, classical studies, political theory, fine art, curriculum development, and computing and information science. Several essays consider how the conventional concerns and agendas of liberal education have acquired a new urgency in the digital age. They reflect upon how the deployment of artificial intelligence confronts and problematizes what it means to be human, and how liberal education is needed to preserve and ensure what makes us humans thrive. Other essays consider how AI must be understood as an extension of our humanity and how the ethos must inform the further development and deployment of new technologies of

liberal education. These challenging essays pose hard questions and the unflinching exploration of matters at the cutting edge of science, culture, and how they merge together with education.

Homo Deus Random House

The author of the international bestseller *Sapiens: A Brief History of Humankind* looks at covert operations and assassination plots in the medieval period, matching anything to be found in our own era.

Sapiens and Homo Deus: The E-book Collection Random House

The edited volume advocates for teaching systemic ethics as a form of life-long learning within nature's classroom to support social and environmental justice. This book also explains critical systemic thinking as

both an individual and a collective responsibility through many ways of knowing spanning the arts and sciences to inspire creativity. This volume contributes to theory and practice by making suggestions as to how to re-frame the content, structure and process of education for transformation. This volume makes a case for a more relational understanding of human beings and other species. This volume also explores a more integrated curriculum where learners are given the opportunity to explore many ways of knowing and learning to earn, learn and grow a future through circular economies, co-operatives and learning communities. This book highlights how the models of sustainable development focus on education for wellbeing in line

with the UNESCO approach outlined in 2021 that emphasizes the systemic nature of education rooted in protecting the environment and supported by the participation of active global citizens. This volume demonstrates transformation of our thinking and practice is overdue and calls for changing the narrative through our standing together and redesigning systems of education to prioritize a more holistic worldview that embraces the planet and living systems. The focus of this volume is on values, perspectives and ways to make a difference through addressing a range of practical concerns, such as: food, energy and water security. Ontologically the editors' perspective is shaped by recognising kinship with nature, as expressed by

Indigenous custodians. Epistemologically the editors and contributors to this volume explore ways to enhance education based on working across cultures and disciplines using a cross cultural approach and mixed methodology. Axiologically the editors support the notion of transformative research that promotes balancing non-anthropocentrism with an approach that draws on Indigenous wisdom whilst addressing patriarchal notions through gender mainstreaming.

Grandmom's Recipes Harper Collins

In an era of relentless change and uncertain futures, governments and individuals alike are grappling with technological, political and social issues unique to the twenty-first century. How should we respond to modern-day

phenomena, such as frighteningly intelligent computers, globalization and the fake news epidemic? And what about the threat of terrorism - should we take action or take a deep breath and relax? In this summary, you'll discover the answer to all these questions and more. You'll learn how to future proof your children by changing your approach to education, what robots and automation mean for the future of white-collar work and why the question of immigration is threatening to destroy twenty-first-century Europe. Author Yuval Noah Harari has formulated some important lessons to help us deal with these fascinating times. These summaries seek to highlight the six most crucial ones. PLEASE NOTE: This is a summary and analysis of the book and NOT the original

book. Our summaries aim to teach you important lessons in a time-efficient and cost-effective manner. They are coherent, concise, and comprehensive, highlighting the main ideas and concepts found in the original books. Unessential information is removed to save the reader hours of reading time. Save time and money while completing your reading list.

Eternity in Their Hearts Springer Nature Accessible, readable and engaging, *Becoming a Teacher* draws on Alan Newland's decades of professional work and academic study in education to set out the key principles for developing and understanding the professional values essential to becoming a good teacher. The book features a constructive examination of the Teachers' Standards

and shares a series of illustrative scenarios, exemplar strategies and practical resources that will equip trainee teachers with easy-to-understand but justifiable rationales to deal with a range of contentious and sensitive issues that they are likely to encounter during the course of their career. It also explores a series of searching questions relating to the philosophical nature of teaching, the definitions of legal, ethical and moral responsibility as a teacher, and what it means- objectively- to be professional. *Becoming a Teacher* therefore serves as a professional studies course reader for trainees and early career teachers, as well as a core text for tutors, lecturers, mentors and CPD leads delivering both the compulsory aspects of the ITT Core

Content Framework for all qualified teacher status (QTS) courses and Early Career Framework CPD.

In Hitler's Munich Basic Books

Startling Evidence of Belief in the One True God in Hundreds of Cultures Throughout the World Has the God who prepared the gospel for all people groups also prepared all people groups for the gospel? Don Richardson, author of the best - selling book *Peace Child*, has studied cultures throughout the world and found within hundreds of them startling evidence of belief in the one true God. In *Eternity in Their Hearts*, Richardson gives fascinating, real - life examples of ways people have exhibited in their histories terms and concepts that have prepared them for the gospel. Read how Pachacuti, the Inca king who

founded Machu Picchu, the majestic fortress in Peru, accomplished something far more significant than merely building fortresses, temples or monuments. He sought, reached out and found a God far greater than any popular god of his own culture. And there have been others throughout the world, like him, who've tried to receive the blessing of the gospel. Get ready to be amazed at these intriguing examples of how God uses redemptive analogies to bring all men to Himself, bearing out the truth from Ecclesiastes that God has also set eternity in the hearts of men.
