Cracking the Code to Profit AuthorHouse

What is *Cracking the Code to Profit*?

Cracking the Code to Profit is the complete, start to finish blueprint for building a REAL BUSINESS in the lawn care and landscaping industry. The author, Ryan Sciamanna, shares all his knowledge on how he went from a solo operator to six crews in three years. Who is the book for? *Cracking the Code to Profit* is for anyone thinking about starting a lawn care business to companies trying to break through the \$200k to \$300k gross revenue barrier. If

you would like to, but are not already, making \$100k per year as the owner of your lawn care company, you will benefit from reading this book. Why Ryan wrote the book: In 2016 Ryan narrowed his lawn care companies service offering down to lawn mowing and lawn treatments only. Prior to that, his company was a full-service lawn and landscape service provider offering all of the typical services including mulching, pruning, cleanups, leaf removals, hardscapes, landscape design and installation, and snow removal. He made the change in his business model to increase profit margins and reduce the amount of time required of him as the owner of the business. Naturally, he needed to find referral partners for his lawn care customers because they still

had other lawn and landscape needs his company no longer performed. He contacted several other lawn and landscape business owners in his area and told them he wanted to send them referrals for the work his company no longer performed and only asked they don't 'steal' his customers for the services they were still providing. After shooting off the first several referrals, Ryan quickly realized that a lot of these companies needed help and until they improved their business operations, referring his clients to them was only making him look bad! He has since stopped referring work with the exception of a couple companies that proved they would provide his customers quality work at fair prices and actually be reliable. Ryan says, "I think most lawn

care business owners started their business just like I did...they enjoyed the work and were good at it, so they said, why not work for myself. In the beginning, it usually goes pretty smooth, but as they add more and more customers and eventually need to hire employees, they get in over their heads. I did the same thing, but quickly educated myself on how to run an actual business and not just be self-employed." He organized all of his knowledge into Cracking the Code to Profit in hopes it will save new business owners years of frustration. Ryan read a similar 'book' before he started his business that his father had bought for him online. It was actually just a word document that someone had written on starting a lawn care business and his

dad printed it off for him. It cost his father \$79.95 for that! Ryan still has that 'book' and even though it was overpriced, terrible quality and a lot of the information was not good, he still credits that book towards helping him get his business off the ground. What you can expect from *Cracking the Code to Profit - How to Start a Lawn Care Business: The book flows in chronological order from starting your business to your exit strategy. Ryan put every detail he could recall from his own experience. You can see the book chapters in the book preview. After each chapter, action steps are included so you know exactly what you need to do. At the end of the book, you will find the resource section for continued learning and execution. You can expect to have a*

much better understanding of how to start and grow your lawn care business is a healthy, profitable way. Ryan's contact info is also included in the book. He would love to hear from you after you finish it!

Commercial landscaping businesses are in high demand just like lawn care is for residential buildings. It is not a seasonal business, although they thrive more in some seasons. However, you will make the most money from your landscaping business between April and October. There are many opportunities in landscaping businesses because they are not just limited to lawn care. You can care for lawns, design landscapes, or

even make money during winter by melting snow. Expanding to commercial level? Do you want to offer your landscaping services to businesses? Commercial landscaping businesses allow you to build a team and offer your services to bigger clients. It can be a great option if your vision is to generate maximum profit and establish your brand in the market. People have made millions of dollars yearly from commercial landscaping services. They all had their starting point and made it to the top. You can do the same. This book consists of the information you need to start a thriving landscaping business that pays. You will learn different strategies to transition from residential to commercial business, how to find the right clients, and how to build your own

landscaping franchise for maximum profit margin.

Bringing Nature Home Entrepreneur Press

When Avent announced that he was quitting his job to build a specialty nursery, his former horticulture professor begged his student to reconsider, telling him he couldn't possibly make a profit "without doing something illegal." More than ten years and 20 nursery catalogs later, Avent owns a thriving national business with nearly 30 employees. He wrote *So You Want to Start a Nursery* to debunk myths about the ornamental-plants nursery business and what it takes to succeed, whether you're a backyard hobbyist or a wholesale grower. (And he still has a clean arrest record.) Assuming that the reader has

some basic knowledge about how plants are grown, *Avent* focuses on the business and planning concerns of the nursery owner. While recounting humorous stories of his baptism by fire as a beginning nurseryman, *Avent* also provides a primer on the nursery industry as a whole, with discussions of the merits and disadvantages of retail, wholesale, mail-order, and liner operations, to name just a few. Readers of this book will obtain the tools they need to make a business plan of their own. This book is a must-read for horticulture students, industry insiders, and advanced gardeners who dream of turning their passion for plants into a job they love.

Every day talented and passionate gardeners think to themselves, "There

must be a way to turn this into a career.” So You Want to Be a Garden Designer helps them turn that dream into reality by providing the practical, step-by-step information every budding designer needs to develop and nurture a thriving garden design business. A successful, self-made garden designer herself, Love Albrecht Howard conveys not only the basic skills required for the profession, but also the crucial details that can mean the difference between success and failure. Among the many questions she explores with warmth, humor, and a big dose of reality are:

- What do I need to learn?
- How do I tackle fences, stairs, decks, and other construction projects?
- How can I avoid using chemicals?
- What’s the best way to deal with challenging personalities? With

extensive photographs, practical drawings, and clearheaded advice, So You Want to Be a Garden Designer is the comprehensive manual that all garden designers will wish they’d had from the start.

You will learn how to build your business by using low and no cost ways to satisfy customers, as well as ways to increase sales and have customers refer others to you. You will learn about basic accounting and bookkeeping procedures, auditing, successful budgeting, and profit planning development, as well as thousands of great tips and useful guidelines. This manual delivers innovative ways to streamline your business. Learn new

ways to make your operation run smoother and increase performance. Successful entrepreneurs will appreciate this valuable resource and reference it in their daily activities as a source of ready-to-use forms, Web sites, operating and cost cutting ideas, and mathematical formulas that can easily be applied to their operations. The companion CD-ROM contains all the forms found in the book, as well as a sample business plan you can adapt for your own use.

Start Your Own Lawn Care or Landscaping Business Createspace Independent Publishing Platform

A good lawn is very often the central feature of a modern garden, whether in town or the countryside. It therefore needs much more care and very often extra expert care than many of the other

plants in the garden. The properly maintained lawn is no longer just an area of grass but the backdrop or canvas for the rest of the garden. If the lawn looks good, so will the rest of the garden. Although this manual has been written with the professional gardener or aspiring lawn care specialist in mind, many of the aspects of lawn care within the volume are no more than practical advice which will be of interest and use to both the professional and amateur. This manual is business-oriented and in fact starts with generic questions about starting up a business plan and focuses down to launching a properly constituted lawn care business. It also outlines all the pitfalls of not only being in business for yourself but the implications of employing people, as well as all the

anticipated issues which can result from contracting. It is constructed in such a way that whether you are thinking of starting a lawn care business or whether you are already involved, there will be something of use to you. Everything is included from how to go about your accounting to making your business legal...with even a section on the correct tools to acquire. It is written by an experienced gardener who has created a successful lawn care business and who is now passing on his experience by highlighting both the positive and negative aspects of not only working within the horticultural industry but how to go about building a business from scratch. The manual is written in a very readable and sympathetic way rather than in a technical and prescriptive

style, so that it provides both an informal professional and semi-professional and informative reference source for all gardeners, without ignoring the amateur!
