Count and

explore the

zany world

and words of

Seuss in this

classic picture book. From counting to opposites to Dr. Seuss's signature silly rhymes, this book has everything a beginning reader needs! Meet the bumpy Wump and the singing Ying, and even the winking Yink who drinks pink ink. The silly rhymes and colorful cast of characters will have every child giggling from morning to night. From near to far from here to there, funny things are everywhere.

Originally created by Dr. Seuss himself, Beginner Books are fun, funny, and easy to read. These unjacketed hardcover early readers encourage children to read all on their own, using simple words and illustrations. Smaller than the classic large format Seuss picture books like *The Lorax* and *Oh, the Places You'll Go!*, these portable packages are perfect for practicing readers ages 3-7, and lucky

parents too! **Multiplication Word Problems** Stenhouse Publishers 2020 Mathical Award Winner Telling a story about pigeons should be simple. But what's a narrator to do when the number of feathered friends is constantly changing? Can our intrepid storyteller use math facts to keep up with the unstable quantities. . . or is this pigeon-centric tale doomed? *One Fish Two Fish Red Fish Blue Fish*

Kindergarten Number Games (Add to Ten - Level 3) RH
 Childrens Books
 Giving your preschooler a great start in math doesn't have to be complicated. Learn how to use fun but purposeful games and activities to

give your young child the best possible foundation. Preschool Math at Home will guide you step-by-step as you introduce your preschooler to the world of numbers. Your child will develop a thorough understanding of the numbers up to ten, including: counting comparing and ordering numbers recognizing written numerals beginning addition and subtraction All of the

activities are quick and playful, with lots of movement, manipulatives, and games. Each takes less than five minutes, with no special materials needed other than a few household items. Play each game several times for a full year of preschool math curriculum.

preschool/kindergarten subtraction worksheets (includes 8 printable kindergarten PDF books worth \$60.71) *Preschool Math Games (Kindergarten Subtraction/ta King Away Level 2)* Random House Books for Young Readers Motivated Minds--a practical guide to ensuring your child's success in school. What makes students succeed in school? For the past twenty years, the focus has been on building children's self-esteem to help them achieve more in the classroom. But positive reinforcement hasn't necessarily resulted in measureable academic improvement. Through extensive research, combined with ongoing classroom implementation of their ideas, Deborah Stipek, Dean of the School of Education at Stanford, and Kathy Seal have created a program that will encourage motivation and a love of learning in children from toddlerhood through elementary school. Stipek and Seal maintain that parents and teachers can build a solid foundation for learning by helping children to develop the key elements of success: competency, autonomy, curiosity, and critical relationships. The authors offer both practical

advice and strategies on understanding different learning styles for Math and reading as well as down-to-earth tips about how to manage difficult issues -- competition, grades, praise, bribes, and rewards -- that inevitably arise for parents and teachers. Most important, Stipek and Seal help parents create an enriching environment for their children at home that will mesh with the school experience

and become a positive, effective climate for learning.
