The Straight-Talking
Student's Guide to the
Best Colleges For more
than thirty-five years,
The Insider's Guide to
the Colleges has been
the favorite resource of
high school students
across the country
because it is the only
comprehensive college
reference written and
researched by students
for students. In

interviews with
hundreds of peers on
campuses from New
York to Hawaii and
Florida to Alaska, our
writers have gotten the
inside scoop on every
school on topics
ranging from
professors and campus
life to dorms and
student activities. This
thirty-sixth edition has
been completely
revised and updated to
stay on top of campus
trends and attitudes.
Each school profile in
The Insider's Guide
cuts through the
veneer of brochures
and common
stereotypes to reveal
colleges as they're

seen through the eyes of their students. This comprehensive guide includes: - Revealing profiles of more than 330 top schools in the United States and Canada - Essential statistics for every school, from acceptance rates to the most popular majors - An insider's packing list detailing what every college student really needs to bring - A college quiz that helps students find the type of school that is right for them - FYI sections with candid student opinions and outrageous advice

The Graduate Program in Urban Planning and Traffic Engineering at Yale St. Martin's Griffin The Straight-Talking Student's Guide to the Best Colleges in the US With this new edition, The Insider's Guide to the Colleges has been, for 40 years, the most relied-upon resource for high school students looking for

honest reports on USA colleges from their fellow students. Having interviewed hundreds of their peers on more than 330 university and college campuses, and by getting the inside scoop on everything from the nightlife and professors to the newest dorms and wildest student organizations, the reporters at the Yale Daily News have created the most candid college choice guide available. In addition to the well-rounded profiles, this edition has been updated to include: Essential statistics for every school, from acceptance rates to popular majors A "College Finder" to help students pick the perfect school FYI sections with student opinions and

outrageous off-the-cuff advice, to further help in college selection. The Insider's Guide to the Colleges cuts through the glossy college brochures to get to the things that matter most to students trying to select a college, and by staying on top of trends, it gives those students and their parents the straightforward information they need to choose the school that's right for them. *Contribution from the Department of Chemical Engineering, Yale University ...* Engineering at Yale Announcement, Etc., Pertaining to the Undergraduate and Graduate Study Programs Offered by the School of Engineering and the Department of

STEM at Yale: Up Down
Up This book is a
history that tracks
Yale's progress in
science, technology,
engineering and
mathematics (STEM)
over two centuries.

This period includes
three major wars,
numerous recessions,
and one Great
Depression. Yale
University is now fully
capable of meeting the
enormous challenge of
preparing highly
intelligent students to
forward mankind's
quest for a better
world. In my extensive
research to write this
book, I perused the
writings and
biographies of many

great people. We begin
with President Timothy
Dwight IV and
Benjamin Silliman, two
Yale legends who
brought science and
engineering to Yale.
Dwight's goal was the
formation of the Yale
Medical School, and
Silliman was the
creative force that
made this happen.
Silliman, in his
continuing enquiry into
new sciences, was also
responsible for the Yale
Scientific School, the
first geology
department in the
country, and the
building of the Peabody
Museum. Joseph
Sheffield emerges in
the midst of the 19th
century as the
philanthropic supporter
of a separate Sheffield
Scientific School that
grew rapidly to become
the leading school of
its kind in the United

States. The turn of the century in 1900, combined with Yale's 200th anniversary in 1901, brought many alumni organizations into being, including the Yale Engineering Association, founded in 1914 on the eve of WWI. The Yale Aero Club and Marc Wortman's compelling book, "The Millionaires' Unit" introduced me to Trubee Davison and John Hammond, a Yale Sheffield Scientific School graduate and aviation pioneer, formed the first U.S. Navy air patrol unit during World War I. These Yale men are the acknowledged founders of the U.S. Naval Air Force, born in WWI and essential in WWII. My history ends positively. The remarkable efforts of President Richard

Levin's emphasis in Science, Technology, Engineering, and Mathematics (STEM) at Yale has increased Yale's impact globally and, in the biomedical cluster businesses in the New Haven, CT region. Levin and his colleagues have brought Yale into the company of elite world universities. His response to a national call to educate our youth for the Computer Age finds Yale once again in a leadership position. Ivy league schools have slowly accepted and are now introducing reinvigorated STEM programs. In 2007, Harvard announced its first new school in seven decades: the School of Engineering and Applied Sciences. Columbia University's program, through its

Fu Foundation School of Engineering and Applied Science, is the largest in the Ivy league. MIT is highly rated, but recognizes the need to build up its liberal arts programs. Our country's future as a global economic powerhouse is challenged as other nations realize that economic growth brings a better life for their people. To retain economic leadership in high technology, our best universities need new goals and major changes. In elementary and secondary school education, many countries are superior to the U.S. At the college and university level, our schools are judged superior to those of other countries. For the U.S. to retain its economic leadership, we need

improved STEM education policies at all levels -- particularly in our public school system. "Rising Above the Gathering Storm," a government study that dealt with this problem, is being implemented by follow-up projects and renewed concerns within the country's top universities. The best world universities must offer students a blend of humanities and the sciences to serve a fast-developing, complex world driven by new inventions. Leaders, schooled at Yale, will be among those who use these new tools to create a unified, peaceful, and better world. William Davison Glover
