Approximately 4.7 million designated English language learners attend public schools (Office of English Language Acquisition, 2002). It is predicted that by the 2030s, English language learners will account for about 40 percent of the school-age population. Yet very few teachers have been trained to address the needs of these students, and the questions they ask are the same as they asked decades ago: Who are English language learners and what are effective ways for schooling them? What kind of educational program brings about the best results? What are sound practices for facilitating English language acquisition? How can English language learners have academic success in subject areas? How do we teach English language learners in our classrooms? - p. 5.

**Providing mainstream teachers with effective strategies for supporting English language learners academically, emotionally and socially** Guilford Press

How does the home culture of Latino immigrant students differ from the "mainstream" culture of U.S. schools? Why is it important for teachers to understand the differences? How can educators take advantage of students' cultural traits to improve classroom management, student performance, and school-parent relations? Carrie Rothstein-Fisch and Elise Trumbull answer these and many other questions by drawing on the experience and collective wisdom of teachers in the Bridging Cultures Project, a five-year action research study of elementary

classrooms with high percentages of immigrant students. The authors present a simple framework for understanding cultural differences, comparing the "individualistic" culture that prevails in American education with the "collectivistic" culture that characterizes most of the world's population, including many of the Latino immigrant students in U.S. classrooms. At the heart of the book are teacher-developed strategies that capitalize on the cultural values that these students and their families offer, such as an emphasis on helping, sharing, and the success of the group. The strategies cover a wide spectrum of

issues and concerns, including \* Communication with families \* Open house and parent-teacher conferences \* Homework \* Attendance \* Learning in the content areas \* Motivation and rewards \* Classroom rules \* Assessment and grading

Managing Diverse Classrooms: How to Build on Students' Cultural Strengths presents both the research foundation and the practical perspectives of seasoned teachers whose classroom-tested approaches have produced positive results.
