The book encompasses a wide range of

topics on practical geography taught to the B.A./B.Sc. students of Indian universities. Numerous examples and diagrams have been included in the text with the sole aim of enabling the students to have a comprehensive grasp of the subject. Attempt has also been made to present a well-balanced treatment of each topic. Topics like measurement of ground areas from maps, determination of class-interval for choropleth maps, representation of agricultural, industrial and transport data, choice of map projections, interpretation of topo-sheets, etc., have been included in this book and discussed in detail. Books treating various aspects of practical geography need regular up-dates. Therefore, the latest available material has been used to update this edition. Guidance of learned college and university teachers has enabled the author to present the subject-matter clearly and accurately. It is hoped that in addition to developing a keen interest for practical geography, it will form the basis for a more advanced study of the subject among the students. *Geographic Literacy* Teacher Created Materials

Political maps are often the first kind of maps children learn about. They feature the boundaries of countries, states or provinces, and cities, as well as such physical features as lakes and oceans. Children will learn how to use these kinds of maps that are so important to project work.

Goode's School Atlas Vikas Publishing House

With 96 pages of authoritative world maps, a comprehensive index, 69 city maps, and a thematic section providing information on topics covered in geography, humanities and economics courses, Philip's World Atlas is recommended for students as well as for general home reference. The 96 pages of physical and political maps give a balanced coverage of the world at well-

chosen scales. The hill-shading on the physical maps provides an exceptionally vivid portrayal of landforms. The 32-page introductory section - 'The World in Focus' - covers key geographical themes such as the Earth's position in the Solar System, the structure of the Earth, climate and weather, the environment, population, resources, economics and international organizations. The 48-page 'World Cities' section provides urban-area and city-centre maps marking tourist sites for 69 of the world's most important cities, backed up by a comprehensive index. Full-page satellite images for 9 of the cities featured complete this section. The 35,000-name index includes geographical features as well as towns and cities, with both letter-figure grid references and latitude and longitude co-ordinates.

The 35,000-name index includes geographical features as well as towns and cities, with both letter-figure grid references and latitude and longitude co-ordinates. The New Reference Atlas of the World Knowing how to read common types of maps is a worthwhile skill. While computers have made paper maps seem outdated, many people still check out weather maps, road maps, and even simple political maps online. Through examples and full-color images, readers are introduced to physical maps, climate maps, and more. The main content includes basic map concepts, such as using map keys, scale, and latitude and

longitude. From population to precipitation, the maps included will aid readers in understanding both mapmaking and the world around them.
