When another brother got himself into college, Tara decided to try a new kind of life. Today more than one and a half million children are being taught at home by their own parents. In this expanded edition of the book that helped launch the whole movement, Pat Farenga has distilled John Holt's timeless understanding of the ways children come to understand the world and added up-to-the-moment practical advice. Rather than proposing that parents turn their homes into miniature schools, Holt and Farenga demonstrate how ordinary parents can help children grow as social, active learners. Chapters on living with children, "serious play," children and work, and learning difficulties will be of interest to all parents, whether home schooling or not, as well as to teachers. This new edition is supplemented with financial and legal advice as well as a guide to cooperating with schools and facing the common objections to home schooling. Teach Your Own not only has all the vital information necessary to be the bible for parents teaching their own children, it also conveys John Holt's wise and passionate belief in every child's ability to learn from the world that has made his wonderful books into enduring classics.

From two-time Newbery Medalist Kate DiCamillo comes a story of discovering who you are — and deciding who you want to be. When Louisiana Elefante's granny wakes her up in the middle of the night to tell her that the day of reckoning has arrived and they have to leave home immediately, Louisiana isn't overly worried. After all, Granny has many middle-of-the-night ideas. But this time, things are different. This time, Granny intends for them never to return. Separated from her best friends, Raymie and Beverly, Louisiana struggles to oppose the winds of fate (and Granny) and find a way home. But as Louisiana's life becomes entwined with the lives of the people of a small Georgia town — including a surly motel owner, a walrus-like minister, and a mysterious boy with a crow on his shoulder — she starts to worry that she is destined only for good-byes. (Which could be due to the curse on Louisiana's and Granny's heads. But that is a story for another time.) Called "one of DiCamillo's most singular and arresting creations" by The New York Times Book Review, the heartbreakingly irresistible Louisiana Elefante was introduced to readers in Raymie Nightingale — and now, with humor and tenderness, Kate DiCamillo returns to tell her story.

Home educator Laura Berquist presents a modern curriculum based on the time-tested philosophy of the classical Trivium—grammar, logic and rhetoric. She has given homeschoolers a valuable tool for putting together a "liberal arts" curriculum that feeds the soul, as well as the intellect. Her approach, covering grades K - 12, is detailed and practical, and it is adaptable by

parents and teachers to any situation. This third revised edition includes a much expanded section for a high school curriculum, and an updated list of resources for all grades.

Trust is the story of a homeschool family in Louisiana that wasn't ready to choose between homeschooling and high school sports. A lawmaker's campaign promise over a glass of water led to a three-year struggle with athletic and education associations that lobbied at the state capitol. Prep sports and politics are big in Louisiana, and to disturb the status quo of either is not for the faint of heart. Believing some problems are better solved than accepted thrust Lisa Arceri into a very unfamiliar world of politics and policy-making. The trials and defeats of going through the legislative process are the setting for this family's experience of God's sovereignty and faithfulness.

Publishers Weekly bestseller · A joyful and accessible homeschool guide to making learning a part of everyday life Parents who are deeply invested in their children's education can be hard on themselves and their kids. When exhausted parents are living the day-to-day grind, it can seem impossible to muster enough energy to make learning fun or interesting. How do parents nurture a love of learning amid childhood chaos, parental self-doubt, the flu, and state academic standards? In this book, Julie Bogart distills decades of experience—homeschooling her five now grown children, developing curricula, and training homeschooling families around the world—to show parents how to make education an exciting, even enchanting, experience for their kids, whether they're in elementary or high school. Enchantment is about ease, not striving. Bogart shows parents how to make room for surprise, mystery, risk, and adventure in their family's routine, so they can create an environment that naturally moves learning forward. If a child wants to pick up a new hobby or explore a subject area that the parent knows little about, it's easy to simply say "no" to end the discussion and the parental discomfort, while dousing their child's curious spark. Bogart gently invites parents to model brave learning for their kids so they, too, can approach life with curiosity, joy, and the courage to take learning risks.

The National Book Award Finalist and New York Times bestseller that became a guide and balm for a country struggling to understand the election of Donald Trump "A generous but disconcerting look at the Tea Party. . . . This is a smart, respectful and compelling book." —Jason DeParle, The New York Times Book Review When Donald Trump won the 2016 presidential election, a bewildered nation turned to *Strangers in Their Own Land* to understand what Trump voters were thinking when they cast their ballots. Arlie Hochschild, one of the most influential sociologists of her generation, had spent the preceding five years immersed in the community around Lake Charles, Louisiana, a Tea Party stronghold. As Jedediah Purdy put it in the *New Republic*, "Hochschild is fascinated by how people make sense of their lives. . . . [Her] attentive, detailed portraits . . . reveal a gulf between Hochschild's 'strangers in their own land' and a new elite." Already a favorite common read book in communities and on campuses across the country and called "humble and important" by David Brooks and "masterly" by Atul Gawande, Hochschild's book has been lauded by Noam Chomsky, New Orleans mayor Mitch Landrieu, and countless others. The paperback edition features a new afterword by the author reflecting on the election of Donald Trump and the other events that have unfolded both in Louisiana and around the country since the hardcover edition was published, and also includes a readers' group guide at the back of the book.

A fresh portrayal of one of the architects of the African American intellectual tradition, whose faith in the subversive power of education will inspire teachers and learners today. Black education was a subversive act from its inception. African Americans pursued education through clandestine means, often in defiance of law and custom, even under threat of violence. They developed what Jarvis Givens calls a tradition of "fugitive pedagogy"—a theory and practice of Black education in America. The enslaved learned to read in spite of widespread prohibitions; newly emancipated people braved the dangers of integrating all-White schools and the hardships of building Black schools. Teachers developed covert instructional strategies, creative responses to the persistence of White opposition. From slavery through the Jim Crow era, Black people passed down this educational heritage. There is perhaps no better exemplar of this heritage than Carter G. Woodson—groundbreaking historian, founder of Black History Month, and legendary educator under Jim Crow. Givens shows that Woodson succeeded because of the world of Black teachers to which he belonged: Woodson's first teachers were his formerly enslaved uncles; he himself taught for nearly thirty years; and he spent his life partnering with educators to transform the lives of Black students. *Fugitive Pedagogy* chronicles Woodson's efforts to fight against the "mis-education of the Negro" by helping teachers and students to see themselves and their mission as set apart from an anti-Black world. Teachers, students, families, and communities worked together, using Woodson's materials and methods as they fought for power in schools and continued the work of fugitive pedagogy. Forged in slavery, embodied by Woodson, this tradition of escape remains essential for teachers and students today.

NEW 2021 EDITION of the best-selling notary prep guide to the difficult Louisiana exam. (NOTE: This one is keyed to the blue 2021 state textbook.) The Louisiana Notary Exam has a 20% pass rate. The Notary Exam has an official Study Guide you use during the exam. But the Study Guide has no index, no big picture, no study strategies, no exam-day tips, not enough cross-references. . . . and few of the forms notaries use that they test. It doesn't explain most-tested subjects, past exams, or recent changes to the Guide. It's got the law and notary rules, but it's missing essentials for any such textbook. This book has all that-and much more that anyone contemplating the exam should read. It even includes crucial information about notary practice for the newbie notary, and is useful to experienced notaries for its expanded cross-references, complete index, and summary lists. Basically it's the rest of the official Study Guide they somehow omitted. Why would they leave out the index, of all things? Reminder: a 20% pass rate. As a senior law teacher and member of two state bars, Professor Childress still needed to pass the Louisiana Notary Exam to practice as one. It's a challenging exam for everyone, yet he found in the 'Study Guide' lots of trees but little forest-and even less real guidance. Determined that current test-takers can do better with more real help, he wrote this book and geared the page numbers-including an index, cross-references, lists, and illustrated explanation of successions, community property, wills, and authentic acts-to the latest edition of the state's official text, *Fundamentals of Louisiana Notarial Law and Practice*. An affordable addition to the Self-Study Sherpa Series from Quid Pro Books, that actually pays for itself twice over with its 'one weird trick' saying how to save \$65 in fees in the notary qualification process. This is the trade paperback edition available at online and other bookstores.
