How do lawyers think about and make the important decisions that

constitute the day-to-day practice of law? This book explores that question through an extensive empirical study of lawyers practicing divorce law in New England. The authors emphasize the importance of "collegial control" in shaping lawyers' decisions and identify a variety of "communities of practice" that serve as key agents of that control. Offering a new understanding of the nature of lawyers' work in divorce law as well as a new perspective on legal professionalism, this book

is required reading for scholars, students, and practitioners.

[Communications and Technology](#) Thinking Like a Lawyer In a common law system where cases play such an important role in legal problem-solving, lawyers must be able to synthesize ideas from groups of cases to figure out a jurisdiction's law at a particular point in time; in reality, however, many

lawyers aren't able to do so well enough for sophisticated law practice. Some lawyers understand and use this skill intuitively, but do not consciously think about the steps they actually take. Those in this group often do not sufficiently value case synthesis because it seems so obvious, with the result that they don't necessarily use this skill to its full potential. Others don't intuitively understand how to synthesize cases and have never learned a

methodology to do so. Lawyers in this situation simply are not able to manipulate case law adequately and consequently fail to produce the necessary depth of analysis to represent clients effectively. This article's goal is to ensure that lawyers in practice - and teachers in law schools who train future lawyers - have a sufficient understanding of synthesizing cases. To achieve this, the article begins by describing the theory behind this skill as

well as a methodology that will generate the subtle nuances of analysis necessary for sophisticated law practice. The article then proceeds to apply this methodology to a group of hypothetical cases that have been designed to demonstrate the complex permutations of actually working with a group of cases to solve a client's problem. This book uses samples of sales contracts and problems drawn from actual case files to engage students in the role of a lawyer

involved in a sales transaction. It is aimed at upper division students who are tired of reading and briefing cases and are interested in what lawyers really do. The text includes more narrative discussion than many texts, so students do not have to struggle to learn the basic rules. Instead, students can focus on developing proficiency in reading statutes and solving problems. Students use cases the way lawyers use cases: to solve problems. The problems in this text are

somewhat more complex than those found in most teaching texts. This book is unique due to its emphasis on deconstructing statutes and using a variety of visual aids to help students become experts in the application of the law to facts to solve a problem. In particular, it uses numerous diagrams to help students deconstruct statutes and to help students organize their analysis of sales problems. This book is part of the Context and Practice Series, edited by

Michael Hunter Schwartz, Professor of Law and Dean of the University of Arkansas at Little Rock Bowen School of Law. The 2013 supplement to Sales: A Context and Practice Casebook is available to professors upon adoption of this book. The supplement includes additional problems, tables, and errata based on students' in-class engagement with Sales, as well as three new practice exams. An Introduction to Law, Law Study, and the Lawyer's Role In this newly updated volume, Moliterno and Lederer take a fresh and innovative look at the subject of law and what law study and the practice of law entail by combining a traditional academic viewpoint with elements of law practice and ethics as it continues to be widely used in orientation

and introductory courses. The American legal system can be hard to understand. Going to law school is both difficult and anxiety-producing. Introduction to Law is designed to help in both areas. Written by two highly-experienced legal educators at America's oldest law school, Introduction to Law provides the reader with a written equivalent of William & Mary Law School's famous introductory law school week. Often light-hearted, this useful and pragmatic

book combines an innovative introduction to the American legal system with material on how to read and understand court cases and, critically, the lawyer's interaction with the client. All too often, legal texts ignore people, especially the client whose need for legal advice first engages the legal system. The text shows the reader how a lawyer must ascertain facts and goals from a client and then apply what the new lawyer (or law student) has learned

about law and its interpretation to solve the client's problem. Revised in 2004 to be fresher, more readable, and more timely in its current events references, Introduction to Law is an ideal book for a soon-to-be law student or for anyone who wants a better understanding of how our legal system and lawyers function. Lawyers in the Dock
This book discusses legal education in multicultural classes. Comparative law education is now widespread throughout

the world, and there is a growing trend in developed countries toward teaching global law. Providing theoretical answers on how to describe each legal culture and tradition side-by-side, it also explores educational methodological options to address these aspects without causing offence or provoking tension within a multicultural student community. The book examines nine countries on three continents, bringing together academic views and

educational insights from ten scholars in the field of comparative law. *Examples & Explanations for Professional Responsibility* Cambridge Scholars Publishing True Crime/Law/Current Affairs/Political Science and Government Provocation Sparkman use thought-provoking cases to illustrate the failures of a trial system we revere only because we have been told it is the best in the world — a system we have been too arrogant to question. Charley “I won’t leave any

witnesses next time.” Charley stated after being sentenced to ten years for the rape of three women. He subsequently pulled just over two years. Dwayne I asked Dwayne when he would stop committing crimes. He smiled his warm smile and replied. “When I’m dead.” Myth America has the greatest and fairest legal system conceived by the mind of man. Truth America has a trial system that cannot control crime and has legal services that are too complex and too expensive. More Truth

We have a large legal profession — criminal defense lawyers — who labor to return drunk drivers to our streets, burglars to our homes, and child molesters to our neighborhoods.

Revelation It works! We have the highest crime rate in the world with no apparent remedy other than surrendering our rights and building a police state. Solution Scrap our trial system and build a new one, effecting the most fundamental change in American government since 1789.

Law Practice in Modern Educational

Administration Springer Examples & Explanations for Professional Responsibility, Sixth Edition, is a thorough and comprehensive text that can be used by students as a study aid and by professional responsibility teachers as a class text. It covers the whole field of professional responsibility, focusing not only on the ABA Model Rules, but on the often-complex relationship

between the rules and doctrines of agency, tort, contract, evidence, and constitutional law. Beginning with the formation of the attorney-client relationship, the book proceeds through topics including attorneys' fees, malpractice and ineffective assistance of counsel, confidentiality and privilege rules, conflicts of interest, witness perjury and litigation misconduct, advertising and solicitation, admission to practice, and the organization of the legal

profession. Coverage includes all subjects that are tested on the Multistate Professional Responsibility Exam (MPRE), including: A chapter on judicial ethics, a subject tested on the MPRE and not often covered thoroughly, if at all, in law school professional responsibility courses. Updated discussion and examples based on recent developments in the law, including the ABA's simplification of the rules on advertising and solicitation, new Model

Rule 8.4(g) on discrimination in the practice of law, the California Supreme Court's Sheppard Mullin opinion on advance waivers of conflicts, and continuing developments in the impact of technology on the practice of law. More MPRE-style multiple-choice questions in the Examples. New to the Sixth Edition: Revised and updated to reflect recent developments in the law having to do with lawyering, including new ABA rules, ethics opinions,

and cases. New and revised examples and explanations in many chapters. Professors and students will benefit from: Comprehensive, updated coverage of all areas of professional responsibility, with attention to areas that are particularly challenging for students (as well as many practicing lawyers!), such as conflicts of interest and privilege and confidentiality. A study aid that without "teaching to the test," provides students with thorough

preparation for the MPRE, which is the first licensing exam that many law students take.

On Your Case Aspen Publishing

This book presents the current state of the art regarding the application of logical tools to the problems of theory and

practice of lawmaking. It shows how contemporary logic may be useful in the analysis of legislation, legislative drafting and legal reasoning concerning different contexts of law making. Elaborations of the process of law making have variously emphasised its political, social or economic aspects. Yet despite strong interest in logical analyses of law, questions remains about the role of logical tools in law making. This volume attempts to bridge that

gap, or at least to narrow it, drawing together some important research problems—and some possible solutions—as seen through the work of leading contemporary academics. The volume encompasses 20 chapters written by authors from 16 countries and it presents diversified views on the understanding of logic (from strict mathematical approaches to the informal, argumentative ones) and differentiated choices concerning the aspects of law making taken into

account. The book presents a broad set of perspectives, insights and results into the emerging field of research devoted to the logical analysis of the area of creation of law. How does logic inform lawmaking? Are legal systems consistent and complete? How can legal rules be represented by means of formal calculi and visualization techniques? Does the structure of statutes or of legal systems resemble the structure of deductive systems? What are the logical relations between

the basic concepts of jurisprudence that constitute the system of law? How are theories of legal interpretation relevant to the process of legislation? How might the statutory text be analysed by means of contemporary computer programs? These and other questions, ranging from the theoretical to the immediately practical, are addressed in this definitive collection. [Sales](#) Kluwer Law International B.V.  "When professionals reflect on their work, they often speak of "learning by doing" or of using professional "instinct" or "intuition." Social and behavioral scientists characterize these phenomena as "implicit learning" and using "tacit knowledge." This volume explores learning and professional practice in several interestingly different disciplines from the perspectives of both the insiders who populate

these workplaces and the social scientists who are interested in their work for more theoretical reasons. The book thus includes not only critical workplace experiences but also an understanding of the psychological mechanisms that underlie learning from experience in professional disciplines. It will be valuable to theoretical and applied psychologists, particularly those interested in professional education and training."--Jacket.

provide what you need most to be successful in your law school classes. *Contracts in Context: From Transaction to Litigation*, covers contract law from a transactional perspective, including: A contract's structure and terms, Contract formation legal requirements, andThe negotiation, drafting, and performance of contracts, as well as the litigation of contracts, including a review of a contract's interpretation, enforcement, and remedies. *Contracts in Context: From Transaction*

to Litigation explores why parties enter into contracts, how written contracts are customarily structured, and how and why parties use contract design and terms to achieve their goals. The book is unique because it introduces students to customary contract provisions, and walks students through the lifecycle of a contract, including (i) pre-formation activities such as due diligence, preliminary negotiations, and contract drafting, (ii) contract formation, performance,

and amendment, and (iii) dispute activities, such as interpretation, enforcement, defenses, and remedies. The book explores how parties "contract around" default requirements of the law, in addition to satisfying mandatory aspects of the law, through contracts. The book describes the role of both the transactional lawyer and litigator in working with contracts. It presents much of the material in expository fashion rather than only or primarily through cases. This allows

students to learn the doctrine more easily. It also allows for more time on applying the law to new situations. The book challenges students to apply contract law through transactional and litigation practice and simulation problems, which are adaptable to the classroom and asynchronous setting. New to the Second Edition: Additional materials covering the professional identities of attorneys, in addition to their professional responsibilities. Revised

practice problems for students to apply the contract law doctrine and private ordering principles they have learned. Expanded discussion of the role of contracts and contract law in widening and correcting power imbalances. Several new cases to enhance the learning experience. Professors and students will benefit from: Material presented on contract design and terms so that students understand how contracts are used in practice by businesspersons and how

contract law supports this private ordering. Many examples of contract language to demonstrate why and how parties customize contracts to further their goals. Discussion of the role of the transactional lawyer in working with contracts so that students can begin to develop important transactional skills and wrestle with some of the professional dilemmas transactional lawyers frequently face. Explanations of contract law and other material presented through

expository text to give students a more comprehensive and clearer view of what limits the law imposes on their private ordering through contracts and which requirements can be contracted around. A large set of problems, many of which involve tasks assigned to new transactional lawyers and litigators, to allow students to learn the material through active participation and critical thinking.
