Pocket Companion for Physical Examination and Health Assessment Cengage AU

"Health assessment is the foundation of safely caring for patients across the life span. Nurses need a concise, easy-to-follow guide that provides essential coverage of a routine head-to-toe focused or comprehensive health assessment. The second edition of Essential Health Assessment

continues to be a core textbook for the undergraduate student nurse or a reference guide for the practicing nurse. Nurses must identify normal from abnormal findings and recognize when a finding is outside the spectrum of "normal." This book concentrates on essential, need-to-know information and techniques and excludes the nonessential information that does not need to be emphasized for health assessment"--

Health Assessment for Nursing Practice - Binder Ready Elsevier

Physical Assessment of the Newborn, 5th Edition, is a comprehensive text with a wealth of detailed information on the assessment of the newborn. This valuable and essential resource illustrates the principles and skills needed to gather assessment data systematically and accurately, and also provides a knowledge base for interpretation of this data. Coverage addresses: gestational assessment, neurologic assessment, neonatal history, assessment of the dysmorphic infant, and systemic evaluation of individual body systems, as well as key information on behavioral and pain assessment, including the use of specific tools with various groups ranging from term to extremely preterm infants. Numerous tables, figures, illustrations, and photos, many of them in full color, are a major strength that enhances the book's usefulness as a clinical resource. The text is an excellent teaching tool and resource for anyone who performs newborn examinations including nurses, neonatal and pediatric nurse practitioners, nurse-midwives, physicians and therapists. It can also serve as a core text for any program preparing individuals for advanced practice roles in neonatal care. KEY FEATURES: An authoritative and renowned text that comprehensively addresses all key aspects of newborn assessment Provides a well-ordered evaluation of individual body systems. Assists the practitioner in identifying infant state, behavioral clues, and signs of pain, facilitating individualized care. Comprehensively addresses the tremendous range of variation among newborns of different gestational ages. The content is amplified by numerous photos and illustrations, many in full color Includes Power Point slides and an Image Bank

Pocket Companion for Physical Examination and Health Assessment, 4th edition, is a convenient and portable clinical tool for carrying out a holistic, head-to-toe assessment. This handbook is useful either as an adjunct to the Jarvis text, or as an independent primer of basic assessment skills. The Pocket Companion features all the essentials: health history points, exam steps for each body system, normal versus abnormal findings; integrated life span and transcultural considerations; and over 100 meticulously prepared color illustrations. All of this is presented in an attractive and user-friendly format that mirrors the core text. Revised and updated to match the text, the Pocket Companion is cross-referenced to the text by page number for those times when the reader needs more detailed information. Consistent, student-friendly format matches the core text, with each body system chapter divided into the following major sections: Anatomy (corresponds with Structure and Function section in the text); Subjective Data; Objective Data; Nursing Diagnoses; and Abnormal Findings. Attractive full-color design highlights key information for quick, easy reference. Objective Data (method of examination) is presented in a clear, two-column layout that is easy to follow. Normal Range of Findings content is listed in the left column, and the corresponding Abnormal Findings are described in the right column. Relevant Developmental Considerations are highlighted with a special icon, and cover age-specific life span content for pediatric, pregnant, and aging adult patients. New pain and domestic violence content has been added to bring the book up-to-date with these pertinent assessment topics. Over 100 full-color illustrations enhance learning by presenting anatomy and physiology and examination techniques more clearly. Selected Transcultural Considerations are highlighted with a special icon to provide a context for care of a multicultural patient group. Summary Checklists at the end of each body system chapter provide a cue-card review of exam steps. Nursing Diagnoses are listed for each region of body system being assessed (contains the most recent NANDA Taxonomy II terminology). Numerous helpful summary tables at the end of each chapter enhance clinical functionality.
