Spanning more than 800 kilometers of India's eastern coastline, the Vizag-Chennai Industrial Corridor (VCIC) is part of the country's East Coast Economic Corridor. This initiative can help unify the large domestic market as well as integrate the Indian economy with the dynamic global value chains of Asia and drive India's Act East policy. VCIC will also be an important component of the government's Make in India campaign to attract foreign investors and encourage the creation of manufacturing hubs in the country. The new industrial corridor is expected to spur growth by augmenting existing investment in world-class transport networks, infrastructure, and industrial and urban clusters that are supported by a robust institutional framework and a competitive business environment. By linking areas that are lagging in development with dynamic industrial and urban clusters, VCIC will create employment opportunities that alleviate poverty and reduce inequality. As a coastal corridor, VCIC can provide multiple access points to international gateways. Greater connectivity and economic integration between South Asia and the rest of Asia is likely to contribute significantly to development and foster regional cooperation as well.

Directory of Libraries in India Springer

In the realm of trade, there exists a long tradition of labelling products with the emphasis on their place of origin to

convey their quality. These products with Geographical Indications (GIs) tag, in the parlance of intellectual property rights, indicate the link between the geographic location and the product and represent the collective rights of the territory-specific communities that are engaged in the production of that commodity. With its entry into the World Trade Organization, India has implemented GI within a legal framework. Through select case studies of products like textiles and crafts in South India, Regional Products and Rural Livelihoods looks at the ramifications of GI implementation at macro and micro levels. It explores the involvement of stakeholders with respect to the reputation of a place/community and the institutional challenges that emerge in the process of GI implementation. This volume highlights the need for collective action by stakeholders to actualize economic gains through GI and analyses its possible outcomes, such as improved livelihoods for producers and authentic products for the consumers.

Company News and Notes Sri Sathya Sai Sadhana Trust, Publications Division Thinking Design looks at 'design' in its broadest sense and shows how design originates in 'human need' which is not only physical but also psychological, socio-cultural, ecological and spiritual. The book calls for broad-based, socially integrated designs with a large global vision that offer creative solutions to a variety of subjects rather than providing multiplicity of objects. Exploring the course taken by design during the time of Gandhi and in the following era, the author advocates the need for service- or process-oriented designs in contrast to product-oriented designs. The book explores the history of traditional design and its evolution. On one hand it takes

the reader through the cultural-roots of design, and, on the other, it explores new technologies and their applications in design. A remarkable feature of the book is the way its narrative is enlivened with case studies detailing design inventions, interspersed with tales of Mullah Nasiruddin that provide a tongue-in-cheek take on aspects of design. This book will be an insightful reference for design professionals, academics and students in institutes conducting research on design and for those in the industrial/technical design departments of Engineering colleges.

Welding of Maraging Steels Asian Development Bank

ICM 2010 proceedings comprise a four-volume set containing articles based on plenary lectures and invited section lectures, the Abel and Noether lectures, as well as contributions based on lectures delivered by the recipients of the Fields Medal, the Nevanlinna, and Chern Prizes. The first volume will also contain the speeches at the opening and closing ceremonies and other highlights of the Congress

Probability and Statistics: Sankalp Publication

1. The book is designed for the preparation of IAS Paper 2. Qualifiers are given for the revision of the individual subject
3. 15 practice sets are divided into 4 sections
4. Each paper is accompanied by OMR Sheet to track the performance
5. Subjectwise Performance Assessment Card is provided to avoid unnecessary errors

The thoroughly revised and updated edition of "UPSC General Studies Paper - 1 15 Practice Sets" which is designed to promote self evaluation by enabling you to not only revise concepts, but also track your progress. Its 15 practice sets educate you about the entire syllabus and latest

pattern of questions, asked in the examination, along with the changes that took place in the pattern of questions during last year. The book has been divided into 4 major stages for the complete practice. STAGE 1: KNOW THE EXAM TREND: this stage contains Previous Years' Solved Papers (2021-2019) to help aspirants know the latest trend of the examination. STAGE 2: PRACTICE WITH EXAM TREND: this stage provides 5 practice sets to practice according to the prescribed latest paper pattern, STAGE 3: CROSS THE CUT OFF: this stage has 5 Practice Sets that help students in crossing the cut-off of the exam. STAGE 4: BE READY FOR PRELIMS: Lastly, 5 practice sets given in this section make students to get ready for prelims. TOC Stage 1: Know The Exam Trend, Stage 2: Practice With Exam Trend, Stage 3: Cross The Cut Off, Stage 4: Be Ready For Prelims

This second volume of "Sathyam Sivam Sundaram" narrates the life history of Bhagawan Sri Sathya Sai Baba, covering the period 1962 to 1968, when He was at the age of 36 to 42 years, in Prof. N. Kasturi's inimitable, poetic style. Prof. N. Kasturi is the chosen biographer of Bhagawan, who lived with Swami and experienced the Divine Leelas, during these years and it is most appropriate to get this first-hand information from his

writings for our benefit. Bhagawan's historic letter dated 25.05.1947, in His own handwriting declaring His task, vow, and mission is included in this volume. Many incidents and miracles that happened during this period with Bhagawan's grace are brought out in this volume most interestingly, along with many, appropriate photographs, which will form a garland for the living and loving Divinity, Bhagawan Sri Sathya Sai Baba. Prof. Kasturi gives a clarion call to all: "Come! Give me your hand. We shall go along, page after page, sharing the wonder and the wisdom, the awe and the mystery, the truth and the testimony, the glory and the grandeur, and the abundance of the peace."

IEEE Membership Directory Springer Nature

To commemorate the completion of 125 years of the great Mathematician Sri Srinivasa Ramanujan, which was also celebrated as National Mathematics Year, the Department organised a two-day National Seminar titled 'Algebra and Analysis—Gateway to Modern Technology' on 29th and 30th of January 2013. The seminar focused on the vital role of Algebra and Analysis in technological development and industry.

Dataquest Oxford University Press
This book features a collection of high-quality, peer-reviewed papers presented at the Fourth International Conference on Intelligent Computing and Communication (ICICC 2020) organized by the Department of Computer Science and Engineering and the Department of Computer Science and Technology, Dayananda Sagar University, Bengaluru, India, on 18-20 September 2020. The book is organized in two volumes and discusses advanced and multi-disciplinary research regarding the design of smart computing and informatics. It focuses on innovation paradigms in system knowledge, intelligence and sustainability that can be applied to provide practical solutions

to a number of problems in society, the environment and industry. Further, the book also addresses the deployment of emerging computational and knowledge transfer approaches, optimizing solutions in various disciplines of science, technology and health care.

Advances in Computational and Bio-Engineering Northern Book Centre

This comprehensive work focuses on literature relating to the textile traditions of Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, and Sri Lanka. Indexes by author, museum, geographic location, and subject allow immediate access to relevant sources. Indian Books in Print Springer

This book gathers state-of-the-art research in computational engineering and bioengineering to facilitate knowledge exchange between various scientific communities. Computational engineering (CE) is a relatively new discipline that addresses the development and application of computational models and simulations often coupled with high-performance computing to solve complex physical problems arising in engineering analysis and design in the context of natural phenomena. Bioengineering (BE) is an important aspect of computational biology, which aims to develop and use efficient algorithms, data structures, and visualization and communication tools to model biological systems. Today, engineering approaches are essential for biologists, enabling them to analyse complex physiological processes, as well

as for the pharmaceutical industry to support drug discovery and development programmes.

World Scientific

The art of Kalamkari painting is one of the oldest among the traditional arts of India. Written in a lucid style, the book not only explores the origin of the beautiful craft and other traditional design forms, but also documents their evolution while carving a road-map for the future.

Southern Economist Pearson

Education India

This volume brings together the finest research on aesthetics and the philosophy of art by stalwart critics and leading scholars in the field. It discusses various themes, such as the idea of aesthetic perception, the nature of aesthetic experience, attitude theory, the relation of art to morality, representation in art, and the association of aesthetics with language studies in the Indian tradition. It deliberates over the theories and views of Aristotle, Freud, Plato, Immanuel Kant, T. S. Eliot, George Dickie, Leo Tolstoy, R. G. Collingwood, Michael H. Mitias, Monroe C. Beardsley, and Abhinavagupta, among others. The book offers a comparative perspective on Indian and Western approaches to the study of art and aesthetics and enables readers to appreciate the similarities and differences between the conceptions of aesthetics and philosophy of art on a comparative scale detailing various aspects of both. The first of its kind, this key text will be useful for scholars and researchers of arts and aesthetics, philosophy of art, cultural studies, comparative literature, and philosophy in general. It will also appeal to general readers interested in the philosophy of art.

The Pearson CSAT Manual 2012

SAGE Publishing India

Inspired by the knowledge revealed in the books written by Yoga-Gurus of Yogada Satsanga Society of India, he has searched and found out correlations among the ancient-scriptures, yoga-texts, and modern-sciences developed since 1700 A.D after the inventions of microscope and telescope. He explains how the cause behind all the causes happens to be the Creator of Universe, within and without. His synthesis provides root-level-remedies for the present-day problems such as population explosion, depletion of non-renewable resources, extinction of species due to pollutions of all sorts, health problems due to anxieties and unnatural living styles, clashing of religious beliefs causing violent incidents, etc. The author has laid a bridge of understanding between the ever-diverging modern sciences, and converging ancient scriptures. · Modern sciences offer 'clues' to know the hidden-meanings of symbolic and encrypted words in Vedas, Bible, etc. · Scientific explanations for a few key-verses in RIK Veda. · Correlations among physics, meta-physics, and physiology. · Strategies behind the creation of solar system, at the third stage. · Electrons play tremendous roles in the body and matter. · Justification, by three-bodies-theory, of diversity in species. · How man is the image of God, but with very limited powers. · A Scientist can create a new thing using other materials. · A Successful Yogi can dissolve his own body and re-appear. · How past-life memories and habits also influence rebirths. · Journeys of the soul across happier worlds before liberation. · Creative powers of the alphabet of Sanskrit, the Divine Language. ·

Reconciliation of religious beliefs is sure to fetch peace.

Annual Report Taylor & Francis

Probability and Statistics is designed for engineering students studying the core paper on probability and statistics during their second or third years. It includes detailed explanation of theory with numerous examples and exercises, as well as relevant references to engineering applications. Each chapter also has numerous objective type questions, and answers and hints are provided for all the exercise problems and objective type questions.

Computer Communication,

Networking and IoT Autobiography of Ahmed Sayeed

This book is a compilation of selected papers from the 1st Indo-China Research Series in Geotechnical and Geoenvironmental Engineering held in May 2020 online. The webinar series was held at a time of COVID-19 pandemic, when there is lack of physical connectivity. The cutting-edge research topics in Civil and Environmental Engineering ranging from bio-geotechnology, methane gas hydrates, frozen soils, rock testing, and related high-rise buildings response under wind loading will be covered. The contents make valuable contributions to academic researchers and engineers in the industry and provide a platform for demonstrating joint research between scientists from India and China. These are the first proceedings of its kind to demonstrate and motivate more joint research cooperation in Civil and Environmental Engineering between two countries. It was done mainly to motivate youth research scholars to understand each other and develop long-term cooperation.

UPSC 15 Practice Sets General Studies

Paper 1 2022 Arihant Publications India limited

This volume contains the proceedings of the 11th International Conference on Structural Analysis of Historical Constructions (SAHC) that was held in Cusco, Peru in 2018. It disseminates recent advances in the areas related to the structural analysis of historical and archaeological constructions. The challenges faced in this field show that accuracy and robustness of results rely heavily on an interdisciplinary approach, where different areas of expertise from managers, practitioners, and scientists work together. Bearing this in mind, SAHC 2018 stimulated discussion on the new knowledge developed in the different disciplines involved in analysis, conservation, retrofit, and management of existing constructions. This book is organized according to the following topics: assessment and intervention of

archaeological heritage, history of construction and building technology, advances in inspection and NDT, innovations in field and laboratory testing applied to historical construction and heritage, new technologies and techniques, risk and vulnerability assessments of heritage for multiple types of hazards, repair, strengthening, and retrofit of historical structures, numerical modeling and structural analysis, structural health monitoring, durability and sustainability, management and conservation strategies for heritage structures, and interdisciplinary projects and case studies. This volume holds particular interest for all the community interested in the challenging task of preserving existing constructions, enable great opportunities, and also uncover new challenges in the field of structural analysis of historical and archeological constructions.
