Book Review Digest

Andrews McMeel  
Publishing

As Alan Rosenthal states in the preface to this new edition of his acclaimed resource for filmmakers, *Writing, Directing, and Producing Documentary Films and Videos* is “a book about storytelling—how to tell

great and moving stories about fascinating people, whether they be villains or heroes.” In response to technological advances and the growth of the documentary hybrid in the past five years, Rosenthal reconsiders how one approaches documentary filmmaking in the twenty-first century. Simply and clearly, he explains how to tackle day-to-day problems, from initial concept through distribution. He

demonstrates his ideas throughout the book with examples from key filmmakers’ work. New aspects of this fourth edition include a vital new chapter titled “Making Your First Film,” and a considerable enlargement of the section for producers, “Staying Alive,” which includes an extensive discussion of financing, marketing, festivals, and distribution. This new edition offers a revised chapter on

nonlinear editing, more examples of precise and exacting proposals, and the addition of a complex budget example with explanation of the budgeting process. Discussion of documentary hybrids, with suggestions for mastering changes and challenges, has also been expanded, while the “Family Films” chapter includes updated information that addresses rapid expansion in this genre.

A presentation of music and language within an integrative, embodied perspective of brain mechanisms for action, emotion, and social coordination. This book explores the relationships between language, music, and the brain by pursuing four key themes and the crosstalk among them: song and dance as a bridge between music and language; multiple levels of structure from brain to behavior to culture; the semantics of internal and

external worlds and the role of emotion; and the evolution and development of language. The book offers specially commissioned expositions of current research accessible both to experts across disciplines and to non-experts. These chapters provide the background for reports by groups of specialists that chart current controversies and future directions of research on each theme. The book looks beyond mere auditory experience, probing the embodiment

that links speech to gesture and music to dance. The study of the brains of monkeys and songbirds illuminates hypotheses on the evolution of brain mechanisms that support music and language, while the study of infants calibrates the developmental timetable of their capacities. The result is a unique book that will interest any reader seeking to learn more about language or music and will appeal especially to readers intrigued by the

relationships of language and music with each other and with the brain. Contributors Francisco Aboitiz, Michael A. Arbib, Annabel J. Cohen, Ian Cross, Peter Ford Dominey, W. *Grammar and Language Workbook* Picador  
The bestselling workbook and grammar guide, revised and updated!  
Hailed as one of the best books around for teaching

grammar, *The Blue Book of Grammar and Punctuation* includes easy-to-understand rules, abundant examples, dozens of reproducible quizzes, and pre- and post-tests to help teach grammar to middle and high schoolers, college students, ESL students, homeschoolers, and more. This concise, entertaining workbook makes learning English grammar and usage simple and fun. This updated 12th edition reflects the latest updates to English usage and grammar, and includes

answers to all reproducible quizzes to facilitate self-assessment and learning. Clear and concise, with easy-to-follow explanations, offering "just the facts" on English grammar, punctuation, and usage Fully updated to reflect the latest rules, along with even more quizzes and pre- and post-tests to help teach grammar Ideal for students from seventh grade through adulthood in the US and abroad For anyone who wants to understand the major rules and subtle

guidelines of English grammar and usage, *The Blue Book of Grammar and Punctuation* offers comprehensive, straightforward instruction. *501 Grammar and Writing Questions* OUP Oxford Many of us grimace when faced with grammar exercises. But in order to communicate with others, pass tests, and get your point across in writing, using words and punctuation effectively is a necessary skill. It's a fact that in our life today, good communication

skills-including writing-are essential. The good news is that grammar and writing skills can be developed with practice.

**The Creative Habit** John Wiley & Sons

This Independence Day edition of *The World is Flat 3.0* includes an exclusive preview of *That Used to Be Us: How America Fell Behind in the World It Invented and How We Can Come Back*, by Thomas L. Friedman and Michael Mandelbaum, on sale September 5th, 2011. A New Edition of the Phenomenal #1 Bestseller

"One mark of a great book is that it makes you see things in a new way, and Mr. Friedman certainly succeeds in that goal," the Nobel laureate Joseph E. Stiglitz wrote in *The New York Times* reviewing *The World Is Flat* in 2005. In this new edition, Thomas L. Friedman includes fresh stories and insights to help us understand the flattening of the world. Weaving new information into his overall thesis, and answering the questions he has been most frequently asked by

parents across the country, this third edition also includes two new chapters--on how to be a political activist and social entrepreneur in a flat world; and on the more troubling question of how to manage our reputations and privacy in a world where we are all becoming publishers and public figures. *The World Is Flat 3.0* is an essential update on globalization, its opportunities for individual empowerment, its achievements at lifting millions out of poverty, and its drawbacks--

environmental, social, and political, powerfully illuminated by the Pulitzer Prize--winning author of *The Lexus and the Olive Tree*.

The Hot Shoe Diaries

Peachpit Press

This book is a compilation of high-yield, at-a-glance summaries for various topics on which pathologists frequently need information in a quick reference format while at the microscope (or when cramming for the boards). The authors are early-career pathologists who have

compiled this book from the perspective of pathologists-in-training. The focus is not organ-based histologic criteria, but rather everything else that goes into pathologic diagnoses but is difficult to keep committed to memory. The emphasis is on immunohistochemistry, special stains, grading systems, molecular markers, tumor syndromes, and helpful clinical references. The book has a unique format in that the information is presented primarily in

tables and diagrams accompanied by minimal explanatory text. It is intended to serve as a 'peripheral brain' for pathology residents and also practicing pathologists, where frequently needed information is readily accessible and easy to navigate.

*What You Must Think of Me* John Wiley & Sons

You can hum it, but can you write it down? When most people think of a composer, they picture a bewigged genius like Mozart or Beethoven

frenetically directing mighty orchestras in the ornate palaces of Vienna. While that may have been the case once upon a time, modern composers make themselves heard far beyond the classical conservatoire and concert hall. These days, soundtracks are in high demand in industries such as TV, film, advertising, and even gaming to help create immersive and exciting experiences. Whatever your musical ambitions—composing a dark requiem in a beautiful Viennese

apartment or producing the next great Star Wars-like movie theme in LA—the fully updated Music Composition For Dummies hits all the right notes to help you become confident in the theory and practice of composition. To help you translate your musical ideas from fleeting tunes in your head to playable bars and notation on paper, professional composer and instructor Scott Jarrett and music journalist Holly Day take you on a friendly step-by-step journey through the

process of musical creation, including choosing the right rhythms and tempos, creating melodies and chord progressions, and working with instruments and voices. You'll learn how to match keys and chords to mood, use form to enhance your creativity, and write in different styles from pop to classical—and you'll even learn how to keep hammering away when inspiration eludes you. Organize and preserve your musical ideas  
Formalize your knowledge

with professional vocabulary Get familiar with composition apps and software Make a demo and market on social media Filled with musical exercises to help you acquire the discipline you need for success, *Music Composition For Dummies* has everything you need to turn your inner soundtrack into a tuneful reality!

*Language, Music, and the Brain* Cengage Learning This textbook covers the entire Business Process Management (BPM) lifecycle, from process

identification to process monitoring, covering along the way process modelling, analysis, redesign and automation. Concepts, methods and tools from business management, computer science and industrial engineering are blended into one comprehensive and inter-disciplinary approach. The presentation is illustrated using the BPMN industry standard defined by the Object Management Group and widely endorsed by practitioners and vendors worldwide. In

addition to explaining the relevant conceptual background, the book provides dozens of examples, more than 230 exercises – many with solutions – and numerous suggestions for further reading. This second edition includes extended and completely revised chapters on process identification, process discovery, qualitative process analysis, process redesign, process automation and process monitoring. A new chapter on BPM as an enterprise capability has been

added, which expands the scope of the book to encompass topics such as the strategic alignment and governance of BPM initiatives. The textbook is the result of many years of combined teaching experience of the authors, both at the undergraduate and graduate levels as well as in the context of professional training. Students and professionals from both business management and computer science will benefit from the step-by-step style of the textbook and its focus on

fundamental concepts and proven methods. Lecturers will appreciate the class-tested format and the additional teaching material available on the accompanying website. *Writing, Directing, and Producing Documentary Films and Videos, Fourth Edition* Book Company In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most

trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

*The Annotated Mona Lisa*  
McGraw-Hill/Glencoe

An innovative new anthology exploring how science fiction can motivate new approaches to economics. From the libertarian economics of Ayn Rand to Aldous Huxley's consumerist dystopias, economics and science fiction have often orbited each other. In Economic Science

Fictions, editor William Davies has deliberately merged the two worlds, asking how we might harness the power of the utopian imagination to revitalize economic thinking. Rooted in the sense that our current economic reality is no longer credible or viable, this collection treats our economy as a series of fictions and science fiction as a means of anticipating different economic futures. It asks how science fiction can motivate new approaches to economics and

provides surprising new syntheses, merging social science with fiction, design with politics, scholarship with experimental forms. With an opening chapter from Ha-Joon Chang as well as theory, short stories, and reflections on design, this book from Goldsmiths Press challenges and changes the notion that economics and science fiction are worlds apart. The result is a wealth of fresh and unusual perspectives for anyone who believes the economy is too important

to be left solely to economists. Contributors AUDINT, Khairani Barokka, Carina Brand, Ha-Joon Chang, Miriam Cherry, William Davies, Mark Fisher, Dan Gavshon-Brady and James Pockson, Owen Hatherley, Laura Horn, Tim Jackson, Mark Johnson, Bastien Kerspern, Nora O Murchú, Tobias Revell et al., Judy Thorne, Sherryl Vint, Joseph Walton, Brian Willems  
*American Accent Training*  
 Basic Books  
 James Stewart's Calculus series is the top-seller in

the world because of its problem-solving focus, mathematical precision and accuracy, and outstanding examples and problem sets. Selected and mentored by Stewart, Daniel Clegg and Saleem Watson continue his legacy of providing students with the strongest foundation for a STEM future. Their careful refinements retain Stewart's clarity of exposition and make the 9th Edition even more useful as a teaching tool for instructors and as a learning tool for students.

Showing that Calculus is both practical and beautiful, the Stewart approach enhances understanding and builds confidence for millions of students worldwide. We've all felt occasional pangs of shyness and self-consciousness, but for the 15 million Americans with social anxiety disorder, the fear of being scrutinized and criticized

can reach disabling proportions. Such was the case for Emily Ford, who shares her firsthand experiences in these pages. Emily's true story of fear, struggle, and ultimate triumph is sure to resonate with other socially anxious teenagers and young adults. Emily's frank, often witty, sometimes poignant account of how she negotiated all the obstacles of social anxiety--and eventually overcame them with the help of therapy and hard work--makes for

compelling reading. Yet this book is more than just a memoir. Emily's story is coupled with the latest medical and scientific information about the causes, diagnosis, treatment, and self-management of social anxiety disorder (or SAD). Readers will find a wealth of solid advice and genuine inspiration here. In engaging, accessible language--and with the help of psychiatrist Michael Liebowitz--she discusses what is known and not known about social anxiety disorder in

adolescents. She outlines the various psychotherapies available for those with SAD and explains how to seek professional help, how to talk to family and friends about the illness, and how to handle difficult social situations. The result is both an absorbing story and a useful guide that will help to ease the isolation caused by SAD, encouraging young people to believe that, with commitment and hard work, they can overcome this illness. Part of the Adolescent Mental

Health Initiative series of books written specifically for teens and young adults, *What You Must Think of Me* will also be a valuable resource for friends and family of those with SAD. It offers much-needed hope to young people, helping them to overcome this illness and lead healthy, productive lives.

**Big Blues** Simon and Schuster

The U.S. Census Bureau has reported that 56.7 million Americans had some type of disability in 2010, which represents

18.7 percent of the civilian noninstitutionalized population included in the 2010 Survey of Income and Program Participation. The U.S. Social Security Administration (SSA) provides disability benefits through the Social Security Disability Insurance (SSDI) program and the Supplemental Security Income (SSI) program. As of December 2015, approximately 11 million individuals were SSDI beneficiaries, and about 8 million were SSI

beneficiaries. SSA currently considers assistive devices in the nonmedical and medical areas of its program guidelines. During determinations of substantial gainful activity and income eligibility for SSI benefits, the reasonable cost of items, devices, or services applicants need to enable them to work with their impairment is subtracted from eligible earnings, even if those items or services are used for activities of daily living in addition to work. In

addition, SSA considers assistive devices in its medical disability determination process and assessment of work capacity. The Promise of Assistive Technology to Enhance Activity and Work Participation provides an analysis of selected assistive products and technologies, including wheeled and seated mobility devices, upper-extremity prostheses, and products and technologies selected by the committee that pertain to hearing and to

communication and speech in adults.

### **The Promise of Assistive Technology to Enhance Activity and Work Participation**

Cengage Learning

When it comes to photography, it's all about the light. After spending more than thirty years behind the lens—working for National Geographic, Time, Life, and Sports Illustrated—Joe McNally knows about light. He knows how to talk about it, shape it, color it, control it, and direct it. Most importantly, he

knows how to create it...using small hot shoe flashes. In *The Hot Shoe Diaries*, Joe brings you behind the scenes to candidly share his lighting solutions for a ton of great images. Using Nikon Speedlights, Joe lets you in on his uncensored thought process—often funny, sometimes serious, always fascinating—to demonstrate how he makes his pictures with these small flashes. Whether he's photographing a gymnast on the Great Wall, an alligator in a swamp, or a

fire truck careening through Times Square, Joe uses these flashes to create great light that makes his pictures sing. *Los Angeles Magazine* Springer Science & Business Media *Out of Control* chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.

**The Book of Adventure Games** The Art of Better Retail Banking  
"This new book on retail

banking is both readable and innovative. Its analysis is unusually accessible in its style, and the book's conclusions and predictions will be rightly thought provoking. The customer is gaining real power and this new book's insights on the importance of leadership, the need to unleash creativity and to make a bank's IT and people resource work together more effectively for customer satisfaction are important pointers to the shape of future competitive

differentiation." --Sir Mervyn Pedelty, Recently retired Chief Executive, The Co-operative Bank plc, smile, CIS and Co-operative Financial Services "A stimulating read. A readable and lively book that is always informative, sometimes controversial and invariably challenging. The authors don't expect readers to agree with it all, but the readers will undoubtedly gain some fresh insights and perspectives on the multiple issues facing management in a rapidly

changing industry." -- Chris Lendrum CBE, Recently retired Vice Chairman, Barclays Bank "This book is clear enough for the layman and thorough enough for any banker to obtain an excellent sense of the options for successful strategies for their retail businesses. The challenges of technology introduction, cost of production and scope of service are driving banks into responses increasingly similar to other industry sectors. These forces have been

apparent for some years but are so evident now they can no longer be ignored. This book provides an excellent guide to mapping that future." --Joseph DeFeo, CEO, CLS Bank. "This is a useful guide to retail banking that provides a thought-provoking view on the state of The Art (of Better Retail Banking). Clearly retail banking can get better, and must! To steal an analogy from the conclusion, there is a sea change going on - consumers are looking more and more for

greater simplicity and value, and so many banks are still making such heavy weather of it. This book does a good job of charting the current developments." -- Lindsay Sinclair, CEO, ING Direct UK. "A whistle-stop tour of all aspects of retail banking. This is a very readable and insightful real world mix of theory, strategy, tactics and practice. They have even managed to make banking sound exciting. But mostly they have been able to cut through the complexity to remind

us all that success in retail banking is not just about finance and efficiency - it is about customers and staff, who are all too often forgotten about." --Craig Shannon, Executive Director - Marketing, Co-operative Financial Services. "The authors live up to their promise of providing managers and students with a clear exposition of the retail banking sector and how banks can confront the challenging future they face. This book is a practical manual with lots of useful advice. I was

looking for new insights in this book - and I found them!" --Professor Adrian Payne, Professor of Services Marketing, Director, Centre for Services Management, Cranfield School of Management. "A key determinant of any organisation's success will be an enhanced understanding of 'value' as defined by customers, employees, shareholders and other stakeholders. Value can mean different things to these different groups, and this book has set itself the objective of

identifying the approaches that will improve the value proposition for all of these interested parties. It achieves this objective." -- Professor Steve Worthington, Faculty of Business and Economics, Monash University. "An enjoyable and useful read. It provides a good perspective on the role of IT and how IT suppliers and professionals need to contribute to future developments in retail banking strategy and implementation. It helps provide guidance for the

significant challenges ahead for both suppliers and consumers." MIT Press  
 Composing Music for Games is a guidebook for launching and maintaining a successful career as a video game composer. It offers a pragmatic approach to learning, intensified through challenging project assignments and simulations. Author Chance Thomas begins with the foundation of scoring principles applicable to all media, and then progresses serially through core

methodologies specific to video game music. This book offers a powerful blend of aesthetic, technique, technology and business, which are all necessary components for a successful career as a video game composer.  
The World Is Flat 3.0 John Wiley & Sons  
 One of the world's leading creative artists, choreographers, and creator of the smash-hit Broadway show, *Movin' Out*, shares her secrets for developing and honing your creative talents—at once prescriptive and

inspirational, a book to stand alongside *The Artist's Way* and *Bird by Bird*. All it takes to make creativity a part of your life is the willingness to make it a habit. It is the product of preparation and effort, and is within reach of everyone. Whether you are a painter, musician, businessperson, or simply an individual yearning to put your creativity to use, *The Creative Habit*

provides you with thirty-two practical exercises based on the lessons Twyla Tharp has learned in her remarkable thirty-five-year career. In "Where's Your Pencil?" Tharp reminds you to observe the world -- and get it down on paper. In "Coins and Chaos," she gives you an easy way to restore order and peace. In "Do a Verb," she turns your mind and body into coworkers. In "Build a

*Bridge to the Next Day*," she shows you how to clean the clutter from your mind overnight. Tharp leads you through the painful first steps of scratching for ideas, finding the spine of your work, and getting out of ruts and into productive grooves. The wide-open realm of possibilities can be energizing, and Twyla Tharp explains how to take a deep breath and begin...
